# OUR RESIDENCY PROGRAMS INCLUDE:

## GENERAL SURGERY

NU School of Medicine's General Surgery Residency is a five-year program designed to train doctors of medicine in general surgery by focusing the program on basic and clinical research that enhances patient care expertise and surgical practice.

## PEDIATRICS

The Pediatrics residency is a three-year program to train medical doctors to become general pediatricians. The Program provides the residents with the foundation competencies to be ready to practice general pediatrics in different clinical settings or to continue their post-graduate medical training in pediatric sub-specialties or research.

## FAMILY MEDICINE

The Family Medicine Residency Program is a three-year full-time program, aimed at training family physicians. This Program offers education in accordance with the Accreditation Council for Graduate Medical Education (ACGME) core competencies.

## RADIOLOGY

The Radiology residency is a five-year program with the first three years of rotations through all radiological sub-specialties including pediatrics, emergency radiology, gastrointestinal, chest, musculoskeletal cardiovascular, breast imaging, ultrasound, positron emission tomography, computerized tomography magnetic resonance imaging.

## UROLOGY

The Urology residency is a five-year residency program including two years of general surgery training and three years of specialist urology training program. The residents will acquire the knowledge, skills, and abilities to provide outpatient and inpatient management of urological diseases.

## OPHTHALMOLOGY

The Ophthalmology residency program is a four-year program aiming to prepare a fully educated, independent, enterprising, ethically responsible, creative, and scientifically innovative specialist, interested in nurturing democratic values. This individual should be capable of fully solving eye care problems and working effectively in a team.

## OBSTETRICS AND GYNECOLOGY

The Obstetrics and Gynecology (OB/GYN) Residency Program is a four-year postgraduate program encompassing all aspects of obstetrics and gynecology, designed to provide progressively increasing patient care and surgical experience and responsibility.

## INTERNAL MEDICINE

The Internal Medicine Residency is a three-year program to prepare superb medical doctors to practice internal medicine with a culture of safety and continuous quality improvement. Our program trains fully competent physicians to pursue career in ambulatory care, hospital medicine or pursue further subspecialty training.

## ANATOMIC PATHOLOGY

The Residency Program in Anatomic Pathology (AP) is a 3-year program aimed at training medical doctors to become general specialist pathologists with interpretive and diagnostic skills on all pathological tissues obtained from all human body organ systems.

## ANESTHESIOLOGY AND CRITICAL CARE

The Anesthesiology and Critical Care Residency is a four-year program to train medical doctors to become Anesthesiologists and Critical Care specialists who are able to work in hospital or outpatient settings. By providing excellent clinical training and mentorship, our aim is to produce leaders in all realms of anesthesiology, including the operating room, intensive care unit, labour and delivery floor, and pain clinic.

## PSYCHIATRY

The Psychiatry residency program is a 3-year program designed to provide medical doctors with fundamental training in general psychiatry to become Psychiatrists who are able to work in hospital or outpatient settings.

## ORTHOPAEDICS AND TRAUMATOLOGY

The Orthopaedics and Traumatology residency program is a five-year program aiming to prepare a fully educated, independent, enterprising, ethically responsible, creative, interested in scientific innovations and nurturing democratic values specialist who can fully solve problems and work in a team.
