Tsinghua SIGS Wechat

Message from the Dean

As Tsinghua University's global strategic outpost, Tsinghua SIGS aspires to sculpt a pioneering model for graduate education and research that fuels technological innovation and drives societal advancement.

At SIGS, our efforts have been steadfastly guided by a commitment to the Three Highs: fostering high-level international cooperation, nurturing high-caliber talent development, and promoting high-quality innovation practices.

We have firmly anchored our objective in serving as a catalyst for Tsinghua University's disciplinary excellence, enhancing its global engagement, and integrating cutting-edge innovation, thereby solidifying its esteemed position among the world's leading universities.

The past years have been distinguished by noteworthy accomplishments and substantial progress. We take immense pride in the strides we made—with innovation, interdisciplinarity, and openness working in concert to propel our development.

Driven by innovation, we have strengthened our capacity to turn ideas into impact and build a globally competitive academic community. Our top-tier talent pool has grown to include over 80 national-level experts and 8 academicians. In 2025, 5% of our full-time faculty were named Clarivate Highly Cited Researchers, while 28% ranked among the top 2% of scientists for single-year impact and 11% for career-long impact.

Building on Tsinghua University's strategic presence in Shenzhen, we are redefining graduate education and research to empower innovation and societal transformation. Our student community has now expanded to over 6,100 individuals, all supported by a robust and dynamic academic framework.

We break down traditional barriers to foster interdisciplinary clusters where innovations emerge to solve real-world problems. Our academic structure brings together dozens of disciplines within an innovative "6+1" framework, encompassing six frontier engineering fields with one non-engineering discipline. To date, seven of our disciplines have achieved global recognition, ranking in the top 1% of the Essential Science Indicators (ESI), with Materials Science soaring to the top 1‰.

This interdisciplinary approach is also reflected in our engineering education reform that cultivates innovative, practice-oriented capabilities in outstanding engineers for the new era.

Grounded in openness, we cultivate an open, inclusive and vibrant ecosystem that drives our institutional development. We have broadened our network to more than 80 partner universities across the globe. Our campus warmly embraces international students from 56 different countries and regions. Our faculty, too, exemplifies remarkable international diversity, with 23% comprising international scholars and 93% possessing overseas research or study experience, nurturing a truly cosmopolitan and vibrant academic culture.

Our openness extends to industry by developing partnerships with more than 200 high-tech companies, including Huawei and Tencent. We actively work to transfer and commercialize our cutting-edge achievements, building an efficient industry-academia-research collaboration. We also bridge our resources with the broader community by offering continuing education services and sharing our research resources.

In 2026. Shenzhen is set to host the APEC summit, advancing its ambition to become a beacon of future urban development. In this spirit of relentless progress, we at SIGS are wholeheartedly embracing our pioneering role—nurturing an open, innovative, and interdisciplinary community that is shaping the next generation of graduate education. It is within this collaborative, risk-taking and out-of-box thinking environment, as highlighted by *The Washington Post*, that ideas flourish, generate meaningful impact, and drive global scientific advancement.

Forging ahead with a unified sense of purpose, we reaffirm the mission that binds us together: lead with integrity, discover beyond horizons, serve with commitment, and advance for humanity. This is our solemn promise.

Constructing this future demands the collective effort of us all, and we eagerly anticipate standing shoulder to shoulder with you in the years ahead.

Ouyang Zheng
Dean of Tsinghua SIGS

Tsinghua SIGS Overview

Tsinghua University

With over 115 years of academic heritage, Tsinghua embodies a legacy of innovation and unwavering excellence. Established with a vision to drive progress and societal advancement, Tsinghua remains dedicated to nurturing a diverse community of thinkers, creators and leaders, contributing to global peace, prosperity, and sustainable development. The assembly of innovative minds and visionaries at Tsinghua strives to fulfill the significant needs of the country and actively builds a community with a shared future for mankind.

Ranked 12th in the Times Higher Education World University Rankings 2026
Ranked 17th in the QS World University Rankings 2025: Top global universities

Tsinghua Shenzhen International Graduate School

Tsinghua Shenzhen International Graduate School (Tsinghua SIGS) is a public graduate education institution jointly established by Tsinghua University and the Shenzhen Municipal People's Government against the backdrop of national efforts to deepen higher education reform and promote the development of the Guangdong-Hong Kong-Macao Greater Bay Area.

Officially unveiled on March 29, 2019, Tsinghua SIGS was founded as an expansion of the Graduate School at Shenzhen, Tsinghua University (established in 2001). It prioritizes the development of top engineering disciplines at Tsinghua University, complemented by the Innovation Management discipline.

In line with Tsinghua's development strategy and Shenzhen's industry demands, we build upon three distinctive strengths: innovation in graduate education and research, interdisciplinarity that breaks down conventional boundaries to solve real-world problems, and openness that fuels global collaboration, industry partnerships, and a vibrant, inclusive ecosystem for sustainable growth.

Tsinghua SIGS Overview

Tsinghua Motto

Self-discipline and Social Commitment

Tsinghua Spirit

Actions Speak Louder than Words

Tsinghua SIGS Mission

Lead with Integrity, Discover beyond Horizons, Serve with Commitment, Advance for Humanity

Tsinghua SIGS Vision

Tsinghua Shenzhen International Graduate School aspires to become a world-class graduate school with Chinese characteristics by advancing high-level international cooperation, cultivating high-caliber talent, and driving high-quality innovation. It aims to serve as a global magnet for outstanding minds, an international hub for nurturing future innovation leaders, and a cutting-edge center for addressing humanity's most critical challenges, thereby contributing to both China and the world.

Why Shenzhen

Located on the southern coast of China, Shenzhen is a core city in the Guangdong-Hong Kong-Macao Greater Bay Area, and serves as the bridgehead of the country's reform and opening-up. Over four decades of rapid development, it has become a pioneering metropolis in the Chinese mainland and has earned its title as China's Silicon Valley.

Leveraging its leading role as a special economic zone, a national economic hub, and a national innovation city, Shenzhen is accelerating its transformation into a globally influential capital of innovation and creativity.

Shenzhen is committed to creating a whole-process innovation ecological chain of "basic research + technical research + achievement industrialization + technology finance + talent support" to form a market-oriented technological innovation system with enterprises as the main body and featuring deep integration of production, education and research. Currently, it is home to more than 25,000 internationally successful Chinese high-tech companies, including Huawei, Tencent, BYD, TP-Link, Konka, ZTE, DJI, etc.

Transcending Boundaries

At Tsinghua SIGS, our academic structure brings together dozens of disciplines within an innovative "6+1" framework, encompassing six frontier engineering fields with one non-engineering discipline. Each institute focuses on a strategic area of future development, forming a highly interconnected ecosystem that fosters interdisciplinary research and education.These key areas align closely with Shenzhen's industrial development goals, driving regional economic transformation and supporting the innovation-driven growth of the Guangdong-Hong Kong-Macao Greater Bay Area. Through this integrated approach, our disciplines contribute directly to Tsinghua University's vision of becoming a leading global institution.

Global Faculty with Vision and Impact

At Tsinghua SIGS, we have gathered a highly global faculty team who bring their vision, passion, and dedication to education. More than 90% of our faculty members have overseas experience, enriching our campus with diverse perspectives and cross-cultural insights.

We have gathered 8 academicians and a number of national high-level talents. In 2025, we welcomed 6 new academicians, including Professor Charles M. Lieber, a world-renowned scholar in the fields of nanoscience and chemistry, along with 4 national high-level talents.

Teaching and Learning

Cultivating Future Innovation Leaders

At Tsinghua SIGS, we are redefining the landscape of graduate education by nurturing an open, innovative, and interdisciplinary community. We offer both academic and professional degree programs to cultivate versatile, high-level talents.

Our academic programs focus on nurturing innovation at the source and pioneering disruptive technologies, aiming to drive technological advancement and industrial transformation.

Our professional programs emphasize the integration of engineering technology with innovative management, providing students with hands-on industry experience to become well-rounded professionals.

Building on this foundation, we offer a comprehensive global education that includes 13 programs taught fully in English, and 11 joint degree programs with renowned international institutions. Students have the opportunity to study abroad through our degree or collaborative research programs.

Global Engagement

Tsinghua SIGS has achieved remarkable success in cultivating talents for global governance, ranking first among Tsinghua University's science and engineering schools for three consecutive years. Over the past five years, a total of 29 students have interned or worked within the United Nations system, spanning eight countries including the United States, Italy, and Switzerland.

Tsinghua SIGS continues to expand resources for global governance education by establishing regular cooperation frameworks with the UN system and other multilateral institutions, offering students opportunities to engage in global issues and contribute Tsinghua's wisdom to global governance.

> At Tsinghua SIGS, I gained the opportunity to engage meaningfully on a global stage. As the only Chinese youth representative, I took part in drafting the Guide for Youth Engagement in Asia-Pacific's Just Energy Transition and later helped organize an APFSD side event. SIGS empowered me to grow from a field observer into an international policy participant—bringing youth perspectives into regional sustainable energy governance.

Yang Shuojia
PhD Student in Hydraulic Engineering

Interdisciplinary Innovation Practice

The interdisciplinary innovation practice course is a distinctive program for engineering education reform. Centered on the goal of cultivating innovative, practice-oriented capabilities in outstanding engineers for the new era, this course series encourages students to engage with real-world industry needs, cases, and data. Through hands-on practice, students are guided to identify problems using design thinking, define them with innovative thinking, and solve them with engineering thinking, ultimately producing "product-oriented" outcomes with practical value.

Entrepreneurship and Innovation

While cultivating academically outstanding top-tier talents, Tsinghua SIGS also places strong emphasis on fostering innovation and entrepreneurship, particularly to meet the needs of regional economic and social development and align with Shenzhen's growth priorities.

Tsinghua SIGS has developed an integrated innovation-driven learning system, offering a range of courses in innovation and entrepreneurship, and organizing and participating in related competitions to strengthen students' creativity and entrepreneurial capabilities. In addition, the school provides comprehensive support and services to help students transform ideas into viable ventures and engage in exchanges with peers from overseas universities.

Excellent Engineering Leadership Program

Tsinghua SIGS regards industry-academia joint training as a key driver of engineering education reform, aiming to integrate the strengths and resources of both academia and industry to cultivate interdisciplinary engineering talents and to foster a win-win ecosystem in which education empowers industry and talent drives the future.

To date, the school has formed cooperation with over 200 enterprises covering a wide range of industries, including power, materials, environment, computing, logistics, manufacturing, marine, construction, semiconductors, and robotics.

A cornerstone of this initiative is the innovative “dual-mentor” system, a key mechanism for talent development. Under this, each student has an on-campus advisor and an industry mentor who will collaboratively guide them throughout the entire learning process to ensure their research integrates academic frontiers with practical industry value.

The industry mentor primarily oversees the student’s day-to-day practical work in the enterprise, while the on-campus advisor is responsible for monitoring the student’s academic studies.

Discovering beyond Horizons

Research and Innovation

Research at Tsinghua SIGS is rooted in a vision that extends beyond discovery to address the fundamental questions of "what the world will be" and "what the world should be." We believe that major innovations start with tackling grand challenges and that science should serve human well-being — a conviction that drives our “Challenges in Science and Technology” innitiative.

Guided by this initiative, we actively promote interdisciplinary, cross-border, and cross-industry dialogue to spark creativity and imagination at the frontiers of knowledge, so as to advance regional and global progress, making meaningful contributions to a shared future for humanity.

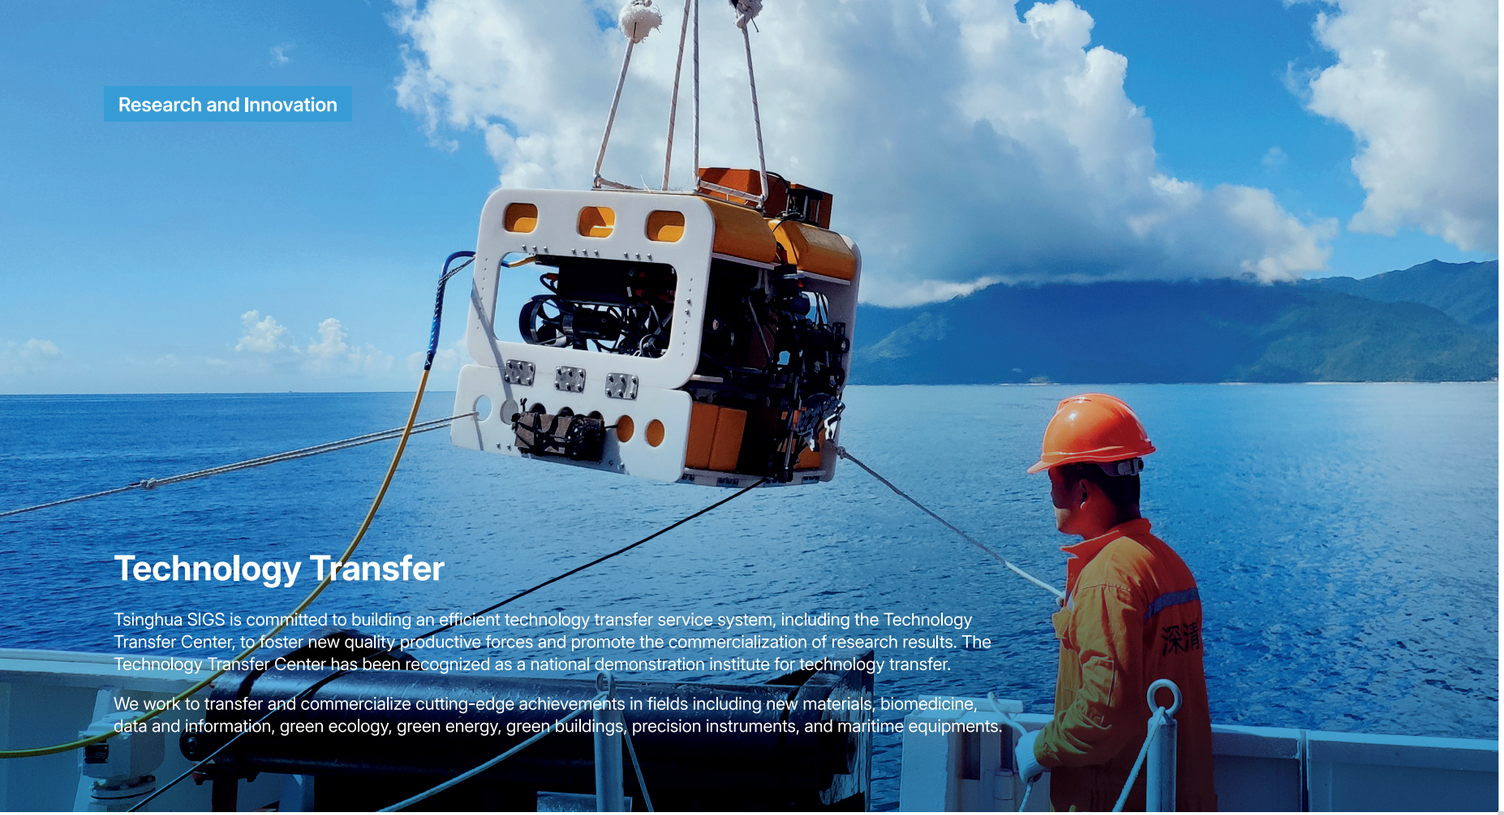

National and Provincial / Ministerial Level Key Laboratories

- National-local Joint Engineering Laboratory for Personalized Anti-Cancer Innovative Drugs
- National-Local Joint Engineering Laboratory for Carbon Functional Materials
- Two Bays Five Innovation Paths International Open Innovation Center
- Guangdong Provincial Key Laboratory of Thermal Management Engineering & Materials
- 2021 Industrial Internet Innovation and Development Project—Industrial Internet Basic Support and Empowerment Public Service Platform for Key Fields
- Guangdong Provincial New Energy Storage Pilot Platform (Electrochemical Energy Storage Materials and Devices)

Nobel Laureate Laboratories

- Shenzhen Geim Graphene Center
- RISC-V International Open Source Laboratory

Technology Transfer

Tsinghua SIGS is committed to building an efficient technology transfer service system, including the Technology Transfer Center, to foster new quality productive forces and promote the commercialization of research results. The Technology Transfer Center has been recognized as a national demonstration institute for technology transfer.

We work to transfer and commercialize cutting-edge achievements in fields including new materials, biomedicine, data and information, green ecology, green energy, green buildings, precision instruments, and maritime equipments.

Industry-Academia Research Collaboration

Shenzhen's unparalleled concentration of State-owned enterprises (SOEs), global tech giants, and innovative companies creates a thriving ecosystem that directly amplifies SIGS's research capabilities and strategic objectives. Our deep-rooted collaborations with industry giants manifest in co-creating cutting-edge research.

Tsinghua SIGS has established and innovated its mechanisms for industry-academia-research collaboration, building strong relationships with major enterprises, including China Southern Power Grid, Huawei, China Resources Beverage, Tencent, Midea Group, and OCT Group, as well as various social organizations.

Bridging SIGS to the World

Tsinghua SIGS is dedicated to promoting global academic cooperation to address complex global challenges. Through collaboration with leading universities worldwide, we foster global knowledge exchange, advance research and innovation across disciplines.

We are equally committed to cultivating globally minded talents. Through strategic partnerships with more than 90 universities and institutions across 45 countries and regions, we offer a wide range of exchange and mobility programs that prepare students to thrive in an interconnected world.

90+

Global Cooperation

Global Academic Conferences

Tsinghua SIGS strengthens its global academic leadership by hosting a diverse range of international conferences, forums, and symposia, fostering sustained, high-level exchanges with leading institutions worldwide. Throughout the year, the school organizes events such as the Structural Superlubricity Conference, the International Forum on Graphene in Shenzhen & International Conference on 2D Materials, and the AI Competency Training Symposium Across Belt and Road Universities.

Overseas Academic Exchange Program

The Overseas Academic Exchange Program aims to comprehensively enhance students' international outlook, global mindset, and capacity to engage in global transformation. The program focuses on strengthening academic capabilities through diverse, multi-tiered international training initiatives across four categories: overseas academic exchange, visiting study programs, overseas internships, and international conferences.

In 2025, the program supported 1,600 full-time students in participating in overseas academic exchanges, visiting study programs, international conferences, and industry-related practical training.

SIGS Global Summer School

The SIGS Global Summer School centers on SIGS's eight scientific research areas, providing a platform for students to expand their international outlook, engage in cross-cultural communication and exchange with peers worldwide.

The program provides a shared platform for global students to exchange ideas and share experiences, while continuously enhancing the school's international influence.

AUA - THU SIGS Asia Deep Dive Program

In cooperation with the Asian Universities Alliance (AUA), the AUA–THU SIGS Asia Deep Dive Program focuses on the theme of "Youth Leadership for Sustainable Development."

The program features academic lectures, urban research, company visits, and cultural experiences across Shenzhen, Guangzhou, and Beijing, helping Asian youth gain a deeper understanding of China's development and fostering a shared vision for regional sustainable development.

A Truly Global Community

Jemma Louther

From South Africa
Urban Systems

What drew me to Tsinghua SIGS was its commitment to interdisciplinary thinking, innovation, and addressing real urban challenges on a large scale.

The program encourages critical inquiry while grounding learning in contemporary urban realities, offering a balance between theory and application that I value deeply. It has allowed me to engage with cities not as isolated projects, but as interconnected social, spatial, technological, and political systems.

Ziganshin Artur Radikovich

From Uzbekistan
Environmental Science and New Energy Technology

For me, the most unique aspect of Tsinghua SIGS is its interdisciplinarity. There are so many bridges among the different institutes. You can choose courses and work on projects with any of them.

Beyond academics, the density of events on campus is incredible—every day brings a new conference, competition, or cultural activity. These opportunities don't just build a strong academic record; they shape you into a confident person with a growing network of peers from diverse fields, universities, and often, from all over the world.

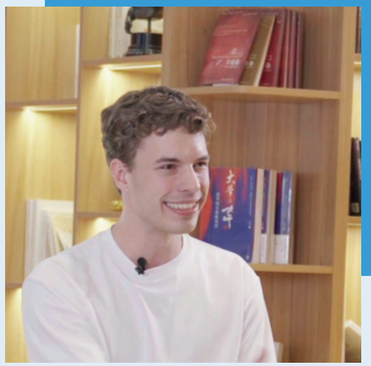

Tsinghua SIGS is dedicated to fostering a truly global community where students from diverse backgrounds live and learn together across cultures. Currently, the campus hosts international students from more than 70 countries and regions.

Daniel Szabo

From Hungary
Exchange student from Technical University of Munich

I'm an exchange student from TUM, studying robotics and machine learning. What impressed me most at Tsinghua SIGS are the frequent and effective communication with professors and on-site inspections of companies and factories.

Besides, there are a lot of cultural events on campus. It was great fun that I participated in the Chinese Cultural Heritage Festival and experienced the Chinese New Year spirit.

Joshua Johnson

From Barbados
Data Science and Information Technology

I completed my Master's in Engineering Management at Tsinghua University's main campus in Beijing, and now pursue my PhD at Tsinghua SIGS in Shenzhen.

I've truly enjoyed my time at both campuses, each offering a unique experience. What stands out most about SIGS is its high-tech environment—life here is incredibly convenient, with public e-bikes on campus, face-scanning and fingerprint systems in the dorm, and even drone-delivered food.

Just like the main campus, there is always something happening here. From tours and competitions to dragon boat racing and countless other activities, life at SIGS is always vibrant and engaging.

Anna Reztsova

From Russia
AI + Innovation Design

I have always been open to new ideas, actions, and people, and the interdisciplinary approach of the AI + Innovation Design Program at Open FIESTA reflects that perfectly. The unique combination of AI and design inspires me to think globally and create solutions that make people's lives easier and better.

Career and Development

The Next Chapter

Tsinghua SIGS offers a unique career development support system that provides students with extensive resources to enhance career readiness and support long-term professional growth. The Career Development Center's offerings include career-oriented counseling, industry clubs, competency-building workshops and training camps, social practice opportunities, online and offline job fairs, and talent programs with international organizations.

In 2025 Pursing Advanced Degrees

12%

of SIGS graduates chose to pursue further study for advanced degrees

Employment by Region

30.3%

of SIGS graduates were employed in Guangdong-Hong Kong-Macao Greater Bay Area

Finding Your Career Path

SIGS graduates are building successful careers at key tech companies in China, including Huawei, BYD, Tencent, and Meituan, as well as in international organizations such as the United Nations Secretariat and the Food and Agriculture Organization of the United Nations.

Top Industries (Past 5 Years)

- Information technology and software services
- Education
- Public management and social organizations
- Finance
- Manufacturing
- Scientific research and technical services

ISSC

The International Students & Scholars Center (ISSC) aims to serve as a one-stop service and management platform for international students and scholars.

It coordinates a full range of services, including the enrollment and registration of international students, visa and residency processing, cross-cultural engagement, and campus life support. The center has also developed flagship programs such as the SIGS Global Summer School, AUA (Asian Universities Alliance) youth exchange activities, and the International Cultural Carnival to foster interaction between Chinese and international faculty and students.

Student Clubs

Tsinghua SIGS has 48 student clubs spanning sports, culture and the arts, academics and technology, public service, and regional culture.

Sports clubs carry forward Tsinghua's tradition of "No sports, No Tsinghua." Cultural clubs foster a strong sense of humanity and youthful vitality on campus. Academic and practice-oriented clubs focus on cutting-edge trends and social needs, supporting student development.

Psychological Counseling Center

Established in December 2005, the Psychological Counseling Center comprises a team of 10 full-time and part-time counselors from diverse training backgrounds, equipped with specialized expertise. Supported by an exclusive SIGS AI-powered counseling system, the center offers a wide range of personalized psychological services tailored to students' diverse needs.

Life at Tsinghua SIGS

Cultural and Sports Facilities

We provide students, faculty, and staff with access to its various cultural and sports facilities and the shared amenities of the University Town of Shenzhen, offering a modern, green, beautiful, and comfortable campus environment.

Life at Tsinghua SIGS

Tsinghua SIGS offers students a vibrant and all-encompassing campus experience in the heart of the innovative city of Shenzhen. Within the campus, students can enjoy a full range of facilities, engage with a diverse and inclusive global community, and participate in a wide array of activities. Beyond campus, the dynamic urban setting provides a rich complement that enhances both academic pursuit and personal development.
