About Luiss University

Located in the eternal city of Rome, Luiss is an international university specialized in the social sciences, providing a diverse learning environment based on entrepreneurship, responsibility and sustainability.

At Luiss, we inspire and enable a better world, believing that social sciences play - and will continue to play - a central role in the emerging digital society.

Since its founding, Luiss has developed privileged relationships with the business community, through its affiliation with Confindustria, the General Confederation of Italian industry, as well as with legal studios, government institutions and civil society. Luiss has also forged special relationships with European and Italian institutions, thanks to the numerous faculty members that have served within them.

The Luiss educational model combines academic rigor with practical relevance.

Why Luiss

- English-speaking University
- Internationally recognized degrees
- Full scholarships for talented students
- Italian lifestyle: Art, history and culture
- High employability
- Top-ranked programs
- Societal impact
- Enquiry-based, experiential, and interdisciplinary learning
- Safe and healthy environment
- Sense of community belonging through the Luiss Alumni Network

Its main features are:

- **Research-led**: Luiss faculty members are top experts in their fields, actively engaged in their research communities as well as in their professional and management communities.
- **Experience-based**: Luiss relies upon a highly selected pool of top executives, chartered consultants and diplomats to discuss topics they experience systematically.
- **Problem-driven**: our programs require students to engage in projects and research, in which they are expected to develop solutions to real-world problems.

The Luiss model is strengthened by a life largelearning approach which challenges students’ intellectual curiosity, inspires individual effort and self-discovery and encourages independent and critical thinking.

Luiss is included in numerous prestigious international university and business school rankings.

**QS - ranked**
In the top 50 universities in the world for Politics and International Studies

**FT - ranked**
Among the world's top 100 Masters in Management, Luiss also ranks third in Career Progress

**EQUIS - accredited**
Luiss is accredited by Equis, a recognition only given to the top 1% Business Schools and Departments in the world

**Ranked #1 by Il Sole 24 Ore**
According to the nation’s leading ranking system, Luiss is the best private university in Italy

**AMBA - accredited**
Luiss Business School is accredited by AMBA (Association of MBAs), the most authoritative international accreditation for MBA programs, granted to only two percent of business schools worldwide

**CENSIS - ranked**
Luiss is ranked first in medium-sized private universities by Censis, Italy's most authoritative socio-economic research institute. According to Censis, Luiss stands out in the fields of international development, merit-based support, scholarships, communication and digital services
Life largelearning

A richer, broader evolution of lifelong learning, this distinctive educational philosophy offers unique opportunities for growth and enhancement academically, personally and professionally.

Lifelong learning

Training students from a young age and throughout their professional careers.

Enquiry-based learning

Luiss develops strategies that enhance the synergies between scholarly research and student education, including the implementation of an innovative education model that puts students’ questions and critical thinking skills at the center of all activity.

- Academically: Luiss faculty members are top experts in their fields, actively engaged in their research communities and providing students with a solid, academic foundation.
- Professionally: Luiss draws upon its connections with top executives, diplomats and other key figures to bring students real-world perspectives and models.
- Personally: Luiss students are engaged in a wide variety of research and projects that enhance their so-called “soft skills”, from flexibility and teamwork to problem solving and time management.

- Summer Schools
  Designed for secondary school students

The BA program in Economics and Business aims at training open-minded and internationally-oriented students. The course provides an extensive preparation in the most important economic fields and an excellent introduction to the fields of business and finance. Moreover, the program offers an introduction to the functioning of the main European institutions and to the regulatory requirements of various markets, with a special focus on competition and antitrust law. Student insights will be enriched by the international learning environment offered by Luiss, with a constant interaction between international students and faculty and the opportunity to study a semester abroad at one of our many partner universities.

**Luiss Uniqueness**

- **Synergies between Research and Learning**: You will learn from top research.
- **Interdisciplinarity and Large learning**: You will learn to integrate ideas and information across multiple settings and contexts.
- **Active Learning**: You will experience engaging lectures based on discussion, collaboration, production, and practice.
- **Continuous Assessment**: Your knowledge and skills will be evaluated throughout the entire semester using different methodologies.
- **Edu-Tech**: You will make use of innovative technologies specifically adapted to higher education teaching and learning.

"This course gave me the opportunity to learn about important economics, business and finance topics and go on an exchange program to London, where I am currently working."

Politics: Philosophy and Economics

The BA in Politics: Philosophy and Economics sets students on an international career path from day one, with an understanding of various disciplines from history and law to political science, sociology, economics, statistics, methodology and how they impact on contemporary societies, with the possibility to specialize in the third year with three elective courses. Teaching is enhanced by data analysis and computer skills workshops, soft-skills, academic language, internships, and opportunities to study abroad. Graduates will have improved their knowledge of English, the program's working language, and one foreign language (chosen from Arabic, Chinese, French, Portuguese, Spanish, German and Russian).

Luiss Uniqueness

- Trained by Top Scholars and Experts: You will gain knowledge from top scholars and experts in their fields.
- Interdisciplinarity and Largelearning: You will learn how to make connections across subjects within your curriculum.
- Project-Based Learning: You will be challenged with real-world issues and encouraged to solve these either through individual or teamwork activities.
- Internal Network Immersiveness: You will interact with other students who are at different points along their study path and from different programs.

“An eye-opening experience that will certainly guide you towards a successful professional career and a bright future.”

Management and Computer Science

An innovative program aimed at training a new leading class at the cutting edge of today’s digital revolution, which answers specific demands from national and international job markets. MaCS combines strong quantitative skills in computer and data science with the rigorous thinking of economics and management, blending traditional courses in economics, entrepreneurship, law and statistics with a significant presence of STEM topics, and training students on algorithms, coding, artificial intelligence, and data management. Graduates will be fully bilingual in digital and business. The high percentage of foreign instructors and students and the opportunity to spend the third year abroad create a multicultural experience.

Luiss Uniqueness

- Trained by Top Scholars and Experts: You will gain knowledge from top scholars and experts in their fields.
- Synergies between Research and Learning: You will learn how to analyze and interpret data.
- Interdisciplinarity and Largelearning: You will learn to integrate ideas and information across multiple settings and contexts.
- Active Learning: You will experience engaging lectures based on discussion, collaboration, production, and practice.
- Project-Based Learning: You will be challenged with real-world issues and encouraged to solve these either through individual or teamwork activities.
- Edu-Tech: You will make use of innovative technologies specifically adapted to higher education teaching and learning.
- External Network Immersiveness: You will interact with alumni and our external partners through several activities such as guest lectures.

“This course allowed me to go beyond the traditional study of Management, thanks to the innovative and future-oriented approach given by Computer Science.”

Corporate Finance Master’s Degree adopts innovative teaching methods, helping students to translate theory into useful practice. Students are exposed to case studies, simulations, company presentations and inspiring talks by top managers and professionals. By the end, graduates acquire all the professional and personal skills useful to start a successful career in the field of corporate finance. Students also have the opportunity to participate in the prestigious QTEM program, an exclusive network of 19 world-class universities and leading multinational organizations that aims to forge a link between academia and industry. Students spend one year in two partner institutions to experience foreign cultures and perspectives, earning a supranational degree certification.

Economics & Finance

The Master’s degree program offers qualified teaching across a full range of sub-sectors of finance and economics. During the course of study, students acquire the theoretical and analytical preparation that is strongly requested by commercial and investment banks, managers, the financial services sector, and public or private institutions operating in economic research. The training offer also makes use of teachers with experience in the professional world and regulatory agencies. Particularly deserving students will enroll in RoME - which is a Master in Economics - a path of excellence and complexity dedicated to those who intend to deepen the methodologies and advanced economic research.

Luiss Uniqueness

Synergies between Research and Learning: You will learn how to analyze and interpret data.

Interdisciplinarity and Largelearning: You will learn to integrate ideas and information across multiple settings and contexts.

Edu-Tech: You will make use of innovative technologies specifically adapted to higher education teaching and learning.

External Network Immersiveness: You will interact with alumni and our external partners through several activities such as guest lectures.

“This Master was incredibly enriching, allowing me to both construct beautiful relationships, and to acquire the analytical skills required to successfully pursue my career in Economics.”
Valeria Gargiulo
E-mail: valeria.gargiulo@alumni.luiss.it

Data Science and Management

The Master’s program in Data Science and Management is right at the frontier of the digital revolution. Its aim is to train data scientists with a specific focus on business, economics and management, by combining solid technical-scientific (STEM) and economic disciplines. This careful blend between the two different disciplines, which is a distinguishing feature of the program, meets the increasing demand for new professionals who are perfectly bilingual in data science and business.
In particular, the Master trains a new generation of business leaders who are capable of leveraging new technologies and data-driven insights to improve many of the core businesses of modern organizations.

Luiss Uniqueness

Synergies between Research and Learning: You will learn how to analyze and interpret data.
Enquiry-Based Learning: You will learn how to apply scientific methods to produce new knowledge and communicate it to different audiences.

Interdisciplinarity and Largelearning: You will learn to integrate ideas and information across multiple settings and contexts.

**Global Management and Politics**

The Master’s degree program in Global Management and Politics fills a gap in our global world: the need to shape professionals able both to act within companies and to tackle global complex issues. The underlying thought is that global management requires skills to go beyond disciplinary barriers, with firm grounds on social science and methodological rigor. The program starts with a focus on the economic, legal and business foundations of global management. Then, students go through organizational and strategic issues and, finally, touch upon issues concerning the political implications of globalization, international relations, the dynamics of international, governmental and non-governmental organizations and activities related to fairly representing corporate, stakeholder and institutional interests.

**Luiss Uniqueness**

- **Enquiry-Based Learning:** You will learn how to apply theories to address complex problems in relevant social settings.
- **Interdisciplinarity and Largelearning:** You will learn to integrate ideas and information across multiple settings and contexts.
- **Be Curious Like an Enquirer:** You will reinforce your analytical and communication skills through integrative activities.
- **Be a Project-Based Intern:** you will gain expertise to thrive in the complex and ever-changing job market and society we live in.

- **External Network Immersiveness:** You will interact with alumni and our external partners through several activities such as guest lectures.

**International Relations**

The Luiss master’s degree program in International Relations offers a global mindset and interdisciplinary studies in key subjects to jump start a career with international institutions, non-governmental and governmental organizations and private companies operating around the world. Major in Diplomacy: Its main goal is to form diplomatic personnel to join international representation around the world.

“Joining Luiss was the best choice I’ve ever made in my academic and professional career. Luiss gave me the necessary knowledge and provided me the right incentives to experience and deepen my interests, giving me the opportunity to test myself in multiple fields and improve my self-confidence and my skills. If I could go back, I’d make the same choice again!”

Costanza Andreini
E-mail: costanza.andreini1@gmail.com
LinkedIn: linkedin.com/in/costanza-andreini-0a590b146

**Law, Digital Innovation and Sustainability**

The Master of Science in Law, Digital Innovation and Sustainability equips experts in innovation — and in particular, students with a legal or managerial background — with the instruments necessary to interpret the current digital and ecological transitions in society and the economy, offering them a solid legal background with equally
strong interdisciplinary, managerial and technical knowledge based on both social and hard sciences. Its open, ethical, and collaborative enquiry-based methodology is framed by Luiss efforts towards an entrepreneurial and engaged university in which learning is challenge and project-based.

Luiss Uniqueness

Management

Drawing on unrivaled corporate connections via Confindustria – the largest Italian confederation of industry – the Master in Management uses an innovative teaching approach that balances academic rigor with managerial relevance. The Master in Management program consists of core courses that advance students’ knowledge in the functional areas of management and elective courses that offer specialized knowledge and real-life examples in the areas of Entrepreneurship and Innovation, International Management, and Luxury, Fashion and Made in Italy. The course is completely taught in English, internationally ranked, and offers numerous double degree options and other exchanges to enrolled students.

The Master’s degree in Policies and Governance in Europe (PAGE) responds to a changing world in which policy decisions are taken at different, linked levels - EU, international, national, regional and local. It prepares students to use public policy analysis in practice by drawing on different disciplines, including political science, law, economics, sociology, demography and management. It is directly linked to current events in the real world and it provides students with the key skills for their future. After a broad first year, students take a specialized track in expanding policy fields in which Luiss has great expertise – Economic Governance and Market Regulation or Cultural Heritage Policies.

Luiss Uniqueness

- Trained by Top Scholars and Experts: You will gain knowledge from top scholars and experts in their fields.
- Synergies between Research and Learning: You will learn from top research.
- Interdisciplinarity and Large Learning: You will learn to integrate ideas and information across multiple settings and contexts.
- Project-Based Learning: You will be challenged with real-world issues and encouraged to solve these either through individual or teamwork activities.
- Active Learning: You will experience engaging lectures based on discussion, collaboration, production, and practice.

Strategic Management

The program allows students to acquire competences and knowledge in developing effective strategies to succeed in the world of business. Students will learn how to properly define corporate strategy, create a business culture and vision, develop business and competitiveness, and adjust the organization structure and management. The program will offer students the opportunity to enrich themselves on a cultural level, to open their perspectives to new horizons, to create networks with international students and companies. All this is achieved through the experience and the knowledge of professors with expertise in both academia and industry.

“Strategic Management properly balances academic developments and career aspirations. During the lessons, experts engage students by proposing empirical cases and business challenges to be solved.”

Digital Programs

(2 years, 120 ECTS)

On-live and not online — by changing one letter, we have dramatically transformed the meaning of higher education programs delivered using digital technologies.

On-live means a virtuous combination of individual work and teamwork, interdisciplinarity, blended learning, a high level of interaction among students and instructors, project-based and research-based learning with AI-based tools to support individual study and monitor progress, as well as virtual internships and other insights and experience from the real world for an on-believable learning experience that will help students develop a mindset that is geared towards creating solutions to future challenges.

Marketing

The digital course in Marketing aims to increase both basic knowledge and specialized skills in the field of marketing.

The program creates professional profiles that respond to the needs of businesses and organizations by honing avant-garde marketing skills. The MSc in Marketing also responds to the needs of students from diverse backgrounds that are interested in a rigorous and original Marketing program and in complexity management.

Luiss adopts an advanced learning modality called "On-live" through which students take active part of the courses and are the major players during the blended learning path. This is characterized by synchronous and asynchronous sessions, ensuring flexibility and compatibility with other commitments, and by the possibility to schedule team work and TA interactions. Personalization is another key feature, thanks to AI-based tools supporting individual study and progress monitoring.

The program is further enhanced by its students’ diverse backgrounds, whose skills can be shared and combined to generate enormous value for the job market. During the course, there will be the chance to experience the world of companies through virtual internships.
Strategic Management

The digital course in Strategic Management allows students to acquire competences and knowledge in developing effective strategies to succeed in the world of business. Students will learn how to properly define a corporate strategy, create a business culture and vision, develop business and competitiveness, adjust the organization structure and management.

Students will enrich their background with innovation and planning-based skills and competences.

Luiss adopts an advanced learning modality called “On-live” through which students take active part of the courses and are the major players during the blended learning path. This is characterized by synch and asynch sessions, ensuring flexibility and compatibility with other commitments, and by the possibility to schedule team work and TA interactions. Personalization is another key feature, thanks to AI-based tools supporting individual study and monitoring of progress.

The MSc in Strategic Management in Luiss will offer students the opportunity to enrich themselves on a cultural level, to open their perspectives to new horizons, to create networks with international students and companies. All this is achieved through the experience and the knowledge of professors and practitioners that have lots of expertise in both academia and industry.

Finally, students will be challenged by writing a research-based thesis and by experiencing the world of companies through virtual internships. These activities complete the students’ learning path and make them ready to manage complexity and be worldwide business leaders.

Departments

Department of Business and Management

The Department of Business and Management offers undergraduate and graduate programs, and together with the Luiss Business School, is EQUIS accredited. Primary areas of faculty research include: accounting and performance measurement systems; business, corporate and international strategy; corporate governance; digital innovation and transformation; ethics, responsibility and sustainability; finance and banking; innovation and industry evolution; law and economics; marketing and consumer behavior; organization theory and HRM; computer and data science.

Department of Economics and Finance

The Department of Economics and Finance offers undergraduate and postgraduate programs and ranks high on the list of Italian Economics departments. Primary areas of faculty research include: macro and micro economics, econometrics, applied statistics and probability, mathematical economics and finance, game theory, financial economics, industrial organization, labor economics, public economics, international trade and finance, behavioral economics and finance.

Department of Law

The Department of Law organizes the degree program for the single-cycle, five-year degree course in Law and the master’s degree in Law, Digital Innovation and Sustainability. It also promotes and coordinates scientific research and offers PhD programs in the legal field. Its primary areas of research are law and new technologies, law and innovation, international and European law.

Department of Political Science

The Department of Political Science ranks among the top 75 worldwide, according to the QS Ranking. Its primary areas of research are European politics and integration, international relations, political theory, elections, parties, public opinion and representative institutions, democracy and democratizations, public policies, security and terrorism.
Schools

Luiss Business School

Luiss Business School develops and promotes research in different academic fields with a focus on Strategy and Corporate Renewal, Corporate Governance and Performance Measurement, as well as Innovation and Organization Design. The research is grounded in knowledge of business processes and corporate environments and covers emergent key areas, such as Ethics, Responsibility and Sustainability. Experiential activities and personal leadership serve as a bridge between the needs of the corporate and public organizations and the academic world.

Luiss School of Government

Luiss School of Government SoG is a graduate school training high-level public and private officials to handle political and governmental decision-making processes. Founded in 2010, SoG has become one of the leading institutions in Europe for teaching and research. SoG students are offered advanced courses in a range of different fields so that they can acquire an innovative understanding of how institutions and policies are managed at national, European and international levels.

Luiss School of Law

Luiss School of Law represents an innovation in the field of legal studies in Italy. LSL was conceived within the framework of the international strategic objectives being pursued by Luiss Guido Carli. It is targeted to whoever intends to acquire or further develop outstanding legal training or to deepen the scientific research in the various branches of Law with an international focus.

Luiss School of European Political Economy

Luiss School of European Political Economy is a research and policy center focused on European affairs. It aims at providing valuable inputs to the Italian and European debate on the process of European integration and institution building while strengthening the Italian government’s ability to develop effective strategies.

Luiss School of Journalism

The Massimo Baldini School of Journalism offers its students specialized training in the area of IT systems and new forms of multimedia communication along with solid theoretical knowledge and daily technical and practical exercises. The school emphasizes the importance of new technologies, while also giving students a solid foundation in the basics of the profession: press, radio and television.
Living in Rome

Rome is the capital of Italy, the fourth most populous city in the European Union and one of the most visited cities in the world. It’s also the only city in the world which contains a whole country – the Vatican City – and is one of the cities with the highest number of diplomatic missions, including those of the Italian Republic, the Vatican City and various international organizations such as FAO, IFAD and WFP. Rome is often referred to as the Eternal City, spanning 28 centuries of history since its founding in 753 B.C., making it a historic marvel. It also has great travel connections, a mild Mediterranean climate and intense urban energy. It is considered a safe city to live in, especially in the areas around Luiss University, and its outgoing people are known for their style, love of football and their world-famous cuisine with great restaurants and cafes that can be sampled on every corner.
Luiss Summer University offers one and two-week programs to students from around the world. The courses touch on current themes using intensive and unique interdisciplinary approaches. Courses are designed for master’s level students interested in taking a deep dive on specific themes, as well as bachelor’s level students who would like to explore topics before choosing a master’s program.

The programs are divided into several areas:

1. International Management
2. Marketing
3. Advanced Political and Social Sciences
4. Economics and Finance
5. Sport Management
Welcome Desk
Dedicated staff to provide students with information on administrative formalities, activities and other opportunities throughout their time at Luiss.

Housing service
Luiss works with a real estate agency to provide comfortable housing options near the University.

Italian courses
Complementary Italian courses are offered to international students to provide basic knowledge of the language and facilitate everyday communication.

Cultural integration
Students are offered a wide range of cultural activities, from exploring unusual and secret places in Rome to contests, competitions and sports events.

Visas and residence permits
Assistance to non-EU students who need to apply for visas or residence permits in order to study and live in Italy. Special sessions are dedicated to help students complete the requested documentation.

Sports and medical certifications
Track and field, soccer, rowing, cycling, volleyball, swimming, basketball, rugby, skiing, tennis and other athletic opportunities, plus a free medical check-up and medical certifications for amateur sports.

Luiss counseling
A service focused on culture shock, available to students who might need help or advice on culture-related issues.

Buddy and tandem programs
A peer-to-peer initiative to help integrate international students and enhance their Luiss experience by immersing them in campus life.

Tutoring service
University tutors help students to build an educational path that meets their job market goals by supporting them in making academic choices. Academic tutors organize study groups on specific subjects and exam workouts through the Academic Gym.

Career Service
Thanks to its connections with more than 500 public and private institutions as well as multinational companies, Luiss is able to provide students and graduates with real career opportunities, supporting them in entering the job market through internships, meetings and seminars with leading international companies and institutions. With more than 120 annual meetings, the Career Services Office increases students' chances of getting hired by offering the support of skilled recruiting professionals.

Luiss LOFT
The Laboratory of Fabulous Things (LOFT) is a hub for students, staff and professors to connect, explore and stimulate their creativity while delving into tech culture, creativity, design and digital production. It offers several spaces for coding, co-working, video production, editing and watching films.
Luiss Language Café

The Luiss Language Café is a multilingual home for creative collaboration, with three makerspaces and a theater area. Students can meet to enjoy the latest news in different languages, drink free coffee, browse the café’s international newspapers, magazines and over 700 books.

Soft Skills and Student Development for Life Learning

Soft Skills

From Case Analysis and Business Games to the Geek Café, the School for Public Policy, Building Europe and the Lab for the Governance of Commons, Luiss students experiment with games, teamwork and role-playing while being encouraged to think outside of the box.

Ethics, Responsibility and Sustainability

Today’s leaders cannot overlook ethics and sustainability. This series of initiatives includes volunteering, community gardening, collaboration with non-profit associations and NGOs - in Italy and abroad - to improve community awareness and understand how to play a unique role in creating value for society.
Luiss EnLabs, The Startup Factory

€145k provided by LVenture Group to each startup accepted

2
Acceleration programs every year

800
Applications in the deal flow every year

20
Startups accelerated every year and eventually introduced to investors for new rounds of investments

80%
Success rate in terms of third-party investments at the end of the path

1,500
Jobs created by startups in the LVenture Group portfolio

9,000
Square meters of office space in Rome and Milan

Luiss EnLabs: The Startup Factory is one of the leading startup accelerators in Europe.

The accelerator is a joint venture between LVenture Group – a venture capital operator listed on the Italian Stock Exchange – and Luiss University.

Luiss EnLabs is based in The Hub – LVenture Group, a 9,000-square-meter innovation space in the heart of Rome, and in the Milano Luiss Hub.
Luiss Alumni 4 Growth

Luiss Alumni 4 Growth – LA4G – fully owned by Luiss Guido Carli University, manages the Investment Club of Luiss Alumni as an advisory company.

The club’s main objective is to support the ecosystem of Luiss-related startups and entrepreneurs: startups founded, co-founded or managed by Luiss graduates or incubated or accelerated in systems connected to the University, such as Luiss EnLabs.

The Luiss Alumni Investment Club follows a benefit logic, with returns on investment engaged in projects promoting social sustainability. The support first goes to social mobility through studies: LA4G supports the mentorship of young people from disadvantaged communities to help them gain admittance to Luiss with full scholarships, covering also the cost of travel and housing. Based on returns, the project will expand to the international level with the same logic.

Today, less than two years after its establishment, the LA4G Investment Club counts sixty members, three corporate club members and five startups in its portfolio, chosen from over two-hundred projects evaluated by a team of Luiss faculty and graduates. The activities of the investment club are supported by a qualified investment advisory board made up of Luiss alumni, experts in equity investments, venture capital and startups.

The five startups:

- Insoore
- Neosurance
- Keyless
- SkinLabo
- FrescoFrigo

With LA4G, Luiss aims to consolidate its leadership in startup entrepreneurship, bridging a gap in Italian innovation financing, thanks to its extraordinary network of alumni.
Building Partnerships, Securing Opportunities

Student mobility

With approximately 230 exchange agreements in 47 countries all over the world, Luiss is committed to continuing its global development to provide students with the chance to immerse themselves in a rich environment that complements a high-quality education. Luiss students hail from 85 different nationalities.

Double Degrees

Thanks to its extensive and ever-increasing network of partners, Luiss enables students to spend study periods abroad and to achieve additional degrees to enrich their résumés and stand out among their peers.

“
A Double Degree is the best choice to develop and refine your intercultural skills. It is difficult to learn intercultural skills by reading a book or sitting an exam; they require full immersion in an environment which is multicultural, multiethnic and multilingual.”

Professor Andrea Prencipe
Rector, Luiss University
Academic Programs
Double Degrees, International Combined Programs, Joint Degrees, Twinning Programs

Back to index
Luiss Campuses

Viale Pola
The historic Luiss campus and the University’s headquarters. The campus is home to the Luiss Schools of Journalism and Law and hosts some courses of the Department of Law.
Viale Romania

Completely renovated in 2007, the campus offers advanced technology and services and is home to the Department of Economics and Finance, Business and Management, and Political Science. The grounds of over 33,000 square meters are set in a park in the center of Rome.
Via Parenzo

Housing the Department of Law, this building from the 1930s is considered one of the best examples of the period’s architectural trends. Structured into various terraces and study spaces, it offers a great community atmosphere.
Villa Blanc

An architectural jewel of the 19th century, Villa Blanc is home to the Luiss Business School, ensuring students a unique learning experience thanks to a combination of digital technologies and a prestigious historical setting.
Luiss University helps students find housing near campus, offering a variety of options to suit different needs: Luiss residences, affiliated residences and private rooms and apartments.

Maria Teresa Panunzi
Located in the same building as the Luiss Library, near the Viale Pola and Via Parenzo campuses, the residence offers both single and double rooms. Services include a doorman during the day and security at night, a laundry room, cleaning and linen services, kitchens, common areas and Wi-Fi.

Pola
Located near the historic Viale Pola campus, home to the Department of Law and the School of Law, as well as the Via Parenzo campus, the residence is connected to the Viale Romania campus via the University’s free shuttle bus service. The residence has both single and double rooms.

Lisbona
Near the Viale Romania campus, the residence provides both single and double rooms. Available services include a doorman during the day and security at night, a laundry room, cleaning and linen services, kitchens, common areas and Wi-Fi.

Collegio Universitario di Merito Don Nicola Mazza
The residence offers both single and double rooms with bathrooms. Services include a cafeteria, a small gym, a music room and spaces to study, relax and socialize. The residence also has a doorman during the day and security at night, a laundry room, cleaning and linen services, and Wi-Fi.

Villa Betania
This residence is divided into small apartments with a living room, small kitchen, bathrooms and bedrooms. The building offers a doorman during the day and security at night, a laundry room, cleaning and linen services, and Wi-Fi.
Adoption Lab

The Adoption Lab Project connects students with companies, helping them to deepen their knowledge of the work environment.

The employers of leading companies “adopt” selected students, offering them the chance to work on projects and do an internship upon graduation.

During the first year of the program, AdLab arranges visits to headquarters of partner companies and meetings with employers, who explain company policies and the skills required to reach important professional goals.

The second year focuses on putting acquired skills to work and testing participants’ problem-solving and teamwork skills. In addition, host companies give AdLab students specific projects to work on as consultants. Luiss tutors collaborate with teams and companies, supervising the activities.

At the end of the first semester of the second year, students present their projects to employers, who provides feedback on the collaboration period as offering advice regarding résumé preparation.

Top students may be offered an internship at a partner company after graduation.

Luiss Library

Renovated both in terms of its vision and spaces, the Luiss Library is specialized in the Social Sciences and serves as the primary reference point for scientific research, supplying constant support to the teaching programs of the University.

In order to strengthen the digital services offered, the Library offers off-campus access to its online catalog and electronic collections with over 500,000 e-books, more than 170,000 e-journals and 180 databases.

The Library is open from Monday to Saturday. Its open and multifunctional spaces give students the opportunity to study, take advantage of the bibliographic research support services, and access the print collections, with around 103,000 books and over 1,170 magazines.

Scholarship

In addition to guaranteeing quality academics, Luiss offers a variety of financial aid programs and services to support students who decide to invest in their futures and maintain high academic standards throughout their careers.

Luiss seeks out highly motivated students from alleconomic and cultural backgrounds who possess the ambition to become agents of change.

Thanks to the contribution of leading companies, foundations and individuals from the Luiss network in Italy and around the world, the University can guarantee economic support to 10% of the student population.

Luiss currently offers a range of tuition exemptions, including:

Full and partial exemptions: STEM scholarships, scholarships for students with high GMAT/GRE scores, scholarships for students with high ACT/ACT/IB scores

Full scholarships, including mom and board:

- The International Training Program
- The Corridoi Umanitari Program
Tuition and Admissions

For students obtaining a secondary school diploma or bachelor’s degree abroad, there will be five rounds of admissions during the academic year (November to May 2022). For the criteria, modalities, and timelines, please consult the admissions calls, which are published on the luiss.edu website.

During the application phase, candidates may indicate the degree program they wish to be admitted to and the selection procedure they wish to participate in. Should they choose the Orientation Workshop procedure, they will attend orientation activities and then participate in an admission exam. Should they participate in the International Selection procedure, their profile will be directly evaluated by the Admission Board who will assess the student’s academic background and transcript of records, English level and any optional certifications.

Documents or data required to complete the online application (in pdf or image format):

- Certificate showing the studies completed to date (updated transcript of records or, if not available, provisional transcript) and associated grades;
- Details of a sponsoring teacher/professor, who may be contacted by the admissions commission;
- Other optional certification (for example SAT/ACT or GMAT/GRE);
- English language certificate attesting a level of at least B2 according to the Common European Framework of Reference (CEFR);
- ID or passport.

Exempted from the selection process for the Three-year and Single-cycle Degree Programs are candidates in possession of:

- A SAT/ACT certificate with the following minimum scores: SAT - Total score 1090 (out of 1600) ACT - Total score 20 (out of 36);
- Students with a full IB diploma obtained abroad with a grade or predicted grade of at least 30;
- Achievement of the Gaokao (National College Entrance Examination of China) with minimum scores to be determined based on the region, in accordance with the requisites determined by the relative call for applications which will be published starting from Spring 2022.

Exempted from the selection process for the Master’s Degree Programs are candidates in possession of:

- A GMAT or GRE certificate with the following minimum scores: GMAT: 550 (out of 800) GRE: Verbal 145 (out of 170) and Quantitative 145 (out of 170);

For the Master’s Degree Course in Management, a A GMAT or GRE certificate with the following minimum scores:

- GMAT: 600 (out of 800)
- GRE: Verbal 150 (out of 170) and Quantitative 150 (out of 170).
Leading figures from politics, business and academia regularly make presentations or participate in conferences at Luiss.

Past visitors included:

- Kwame Anthony Appiah, Professor of Philosophy and Law, New York University
- Elisabetta Belloni, Director General of the Security Intelligence Department (DIS)
