The College of Business Administration (CBA) at PSU offers four (4) undergraduate programs: Accounting, Aviation Management, Finance, and Marketing.

These programs are designed to enable graduates to meet and respond proactively to the local and international business environments that are fast changing, complex, global, and diverse. The degree programs expose students to the breadth of business knowledge, scientific tools and techniques, and support services.

The Accounting, Finance and Marketing, programs were developed taking into account the needs of the local community, the interdisciplinary nature of the subjects, and the ever changing nature of the development in these fields. The rigor of AACSB standards together with two benchmarking exercises guided and informed the crafting of the curriculums of these degree programs. CBA faculty examined the content and structure of the business colleges at three exemplary Saudi universities before turning their attention to the content and design of the top American undergraduate business programs.

The Aviation Management program, launched in fall of 2011, is representative of the CBA ability to respond to community needs and job market demands. Saudi Arabia has set course to develop its transportation system to facilitate business, travel and tourism in the nation and the air transport industry is the key link in this drive hence the CBA responded to this situation and partnered with the preeminent international school in aviation, Embry Riddle Aeronautical University, in fashioning the curriculum for AVM program.
In brief, the CBA's four undergraduate programs are well constructed to enable student acquisition of the knowledge needed and the professional skills demanded in their respective fields. Lastly, these programs are guided by the following vision and mission of the CBA.
CBA VISION
The College of Business Administration aspires to be the hallmark of excellence and innovation in business education in the Kingdom of Saudi Arabia and the Middle East.

COLLEGE MISSION
The College of Business Administration aims to create an innovative academic environment that promotes excellence in business education, research, and service in the Kingdom of Saudi Arabia through commitment to quality and continuous improvement in accordance with international standards.

The College of Computer & Information Sciences takes into account the needs of the local community, the interdisciplinary nature of its fields, and navigating the rapids of change and innovation in the science. In putting together the CCIS degree programs, the contents and structures of curricula and practices the United States, Canada, Germany and the UK are taken into account, as well as the recommendations of these leading international bodies:
The College of Computer & Information Sciences takes into account the needs of the local community, the interdisciplinary nature of its fields, and navigating the rapids of change and innovation in the science. In putting together the CCIS degree programs, the contents and structures of curricula and practices of the United States, Canada, Germany and the UK are taken into account, as well as the recommendations of these leading international bodies:

- Association of Computer Machinery (ACM)
- Association of Information Systems (AIS)
- Association of Information Technology Professionals (ATIP)
- Computer Science Accreditation Commission (CSAC)
- Institute of Electrical and Electronics Engineers (IEEE)

The CCIS opened its doors to students in 2001 offering Bachelors of Science (BS) degrees in Computer Science (CS) and Information Systems (IS). Noting the needs of the community and opportunities for CCIS graduates skilled in the areas of Digital Media Systems, Software Engineering, and Business Computing | E-Commerce, the CS Department crafted a BS-concentration in the first: CS-DMS, offered BS degree in Software Engineering: BSE, and the IS Department did the like with the latter: IS-BCE. Within the frameworks of all CCIS degree programs, students are given the freedom to fashion a good portion of their upper division courses to their individual likings.

COLLEGE OF ENGINEERING

[CE]
The College of Engineering (CE) at PSU has four undergraduate departments: Communications and Networks Engineering, Engineering Management, Architectural Engineering and Interior Design Engineering. The first two departments target male students whereas the last two target female students. These programs are designed to graduate qualified and competent engineers for the local, regional and international job markets. The College has crafted a dynamic strategic plan designed to deliver quality programs that reflect excellence and leadership in higher education in Saudi Arabia and the region.

These programs are designed to graduate qualified and competent engineers for the local, regional and international job markets. The College has crafted a dynamic strategic plan designed to deliver quality programs that reflect excellence and leadership in higher education in Saudi Arabia and the region.
The contents and structures of the programs are comparable to those offered by leading universities in the region and worldwide. In addition, the programs are designed in accordance to the recommendations of the leading professional association (IIE - Institute of Industrial Engineers) and in compliance with the requirements of international accreditation agencies including ABET (Accreditation Board for Engineering and Technology).

All programs lead to an Engineering Bachelor of Science degree after the successful completion of the respective curricula requirements of 138 credit hours. The duration of study is four years in addition to the preparatory year program. Lastly, these programs are guided by the following vision and mission of the College of Engineering.

Prince Sultan University (PSU) College of Law is a leader in Legal Education in Saudi Arabia. The Law College boasts a strong Faculty of Law and enjoys growing numbers of capable and ambitious students. The Bachelor of Laws (LLB) program is noted for the excellence of its design, breadth and distinctiveness. The LLB curriculum was drafted in consultation and concert with Faculty of Law professors from the Universities of Richmond, Harvard and Cambridge with the objective to tailor a program that graduates legal professionals for today's world. Toward that end all Law graduates are schooled in the following fields of law:

<table>
<thead>
<tr>
<th>Administrative Law</th>
<th>International Law</th>
</tr>
</thead>
<tbody>
<tr>
<td>Civil Law</td>
<td>Islamic (Saudi) Law</td>
</tr>
<tr>
<td>Commercial Law</td>
<td>Legal writing Criminal Law</td>
</tr>
</tbody>
</table>

The above specializations were identified by the Law curriculum designers as those most needed by the local and global markets for lawyers and legal professionals. The bilingual nature of the program e.g. over %40 of the PSU courses are in English for those Law students electing the Commercial Law and International Law tracks to optimize the range of job opportunities. To date College of Law students upon their graduation have been well received in a variety of Saudi work place venues with some going directly on to postgraduate programs abroad as well. Summing up, Prince Sultan University's Law College is the place for the youth of today to begin their quest for promising careers in Law.
The features of the LLB Law curriculum design that distinguish it from other Law programs in the Kingdom are its tracks, bilingual hallmark and the wealth of opportunities that await its graduates. The first adds depth to breadth. When the Law students enter their seventh term (i.e. Senior Year), they elect one of three tracks featuring five advanced courses in these fields:

- Commercial Law
- International Law
- Advanced Saudi Law

The above specializations were identified by the Law curriculum designers as those most needed by the local and global markets for lawyers and legal professionals. The bilingual nature of the program e.g. over 40% of the PSU courses are in English for those Law students electing the Commercial Law and International Law tracks to optimize the range of job opportunities. To date College of Law students upon their graduation have been well received in a variety of Saudi workplace venues with some going directly on to postgraduate programs abroad as well. Summing up, Prince Sultan University’s Law College is the place for the youth of today to begin their quest for promising careers in Law.
VISION

• Building on our cultural heritage, shaping our future, focusing on promotion of community outreach by educating the legal experts.
• Strengthening the legal system and the society by developing skilled lawyers who serve diverse communities and promoting professionalism and ethics by furthering discourse and knowledge of Law.

MISSION

• Provide quality legal education and training in both general and specialized legal subjects that promotes the rule of law and serve the societies of the region.
• To produce law graduates both male and females that can anticipate and lead legal change to serve the interests of the society, the region and the international community.
• Prepare lawyers across all sections of Saudi society that can contribute to society in various capacities within the local, national, regional and global governance structures and organizations.
