

THE UNIVERSITY OF
AUCKLAND
Te Whare Wānanga o Tāmaki Makaurau
NEW ZEALAND

Postgraduate Prospectus 2019

Honours | Postgraduate diplomas and certificates | Masters | Doctorates

ACHIEVE THE
AMAZING

Welcome to the University of Auckland

Postgraduate study at New Zealand's leading university¹ offers the opportunity to fulfil your academic and career potential, and make a significant contribution to society.

Whether you choose one of our taught or research programmes, you can expect to challenge your thinking, learn new skills and position yourself for the next step in your career, whilst gaining a qualification from a University recognised for graduate employability.

We have been ranked as the most innovative university in New Zealand² and one of the world's top five emerging leaders in entrepreneurship³. As you pursue advanced study and your passion for your subject, you could be involved in the discovery and development of innovations that improve our social, cultural, economic and environmental wellbeing.

As well as innovation through research, we offer specialised innovation and entrepreneurship postgraduate degrees and innovation activities such as Velocity, a student-led entrepreneurship programme.

Our postgraduate students play an important role in the University's innovation ecosystem and are a valued part of our academic community. As such, we offer a wide range of support and opportunities, including:

- More than 130 taught and research postgraduate programmes
- \$40 million in postgraduate scholarships and awards each year
- Extensive pastoral and learning support

I invite you to join us at the University of Auckland and discover the opportunities that postgraduate study has to offer.

STUART MCCUTCHEON
Vice-Chancellor
The University of Auckland

“I see postgraduate study as an investment in my career. It allows me to spend time learning and using the most advanced algorithms and techniques.”

PhD candidate Jamie is working on the collaborative MBIE Multipurpose Orchard Robotics Project, which is developing robots to pollinate and harvest in kiwifruit and apple orchards. Jamie’s part of the project is making the robots drive around the orchards autonomously, while they detect fruit, flowers and other objects.

“Artificial intelligence and robotics is advancing at such a rate that the theory I learnt as an undergraduate 10 years ago has been superseded. As the pace of innovation continues to increase, further study will become more and more important for engineers and scientists in my field.

“The great thing about the robotics group at the University of Auckland is that we are working with the most advanced techniques and applying these to problems in the real world: it makes my work both interesting and satisfying. Waking up and not knowing if what I am going to do today is going to work or not makes this research more of an adventure. I love working with supervisors who are so supportive and shape projects that are a balance of practical applications and pushing the boundaries of what is possible.

“I work with Robotics Plus, the commercialisation partner for our research. We believe that in several years, we could see these robots working in the field. This could lead to higher quality crops, less wastage and robot exports. There is potential for the research to be applied in other industries, including logistics and fulfilment, transport and healthcare. My team, Boon, who won the 2016 Velocity University Research prize, are looking into some of these opportunities for the best potential fit for robotics.”

Jamie Bell, PhD candidate in Computer Systems Engineering.

Get a taste of postgraduate study

Meet our academics and current students, explore our campuses and see what postgraduate study could be like for you.

Postgraduate Information Evenings

July 2018

If you live outside of Auckland, come and meet our academics and current students in Hamilton, Wellington, Christchurch or Dunedin. Don't miss the opportunity to talk to us about postgraduate study at the University of Auckland and the many scholarships available. We can also give you advice about how to apply and what to expect. This is a free event so registration is essential.

www.auckland.ac.nz/pginfoevenings

Fly to Auckland

We're bringing students from around New Zealand to discover postgraduate life at the University of Auckland. Students will have a visit tailored to their research interests, meeting academics and students in their discipline.

www.auckland.ac.nz/fly

3 Minute Thesis

The 3 Minute Thesis competition gives students just three minutes to explain the gist of their thesis. The event is a must-do on the postgraduate calendar – get inspired by other postgraduate researchers or share your own research with the postgraduate community and beyond.

www.auckland.ac.nz/3minutethesis

Exposure – Postgraduate Research Exposition

October 2018

Exposure is both competition and showcase, bringing together some of the best postgraduate research from across the University. It's a fantastic opportunity for our postgraduate students to gain public recognition for their research and to network with peers, academics and industry representatives.

www.auckland.ac.nz/exposure

POST GRADUATE WEEK 2018

21–25 May

Visit us on campus during Postgraduate Week and discover opportunities to start your postgraduate journey.

postgradweek.ac.nz

“When I started, I was the only one researching microbiome in my institute and I had to learn everything: the lab and analysis techniques. I have my supervisor to thank, he is the one who pushed me hard and I learnt a lot in my first year, and now I am teaching these techniques to other PhD students.”

Originally from Sri Lanka, Thilini came to the University of Auckland after completing a research masters at the University of Sydney. Thilini’s work at the Liggins Institute looks at the link between diabetes and the microbes in the intestines of children who are born very pre-term.

“Microbiomes are connected with everything: obesity, diabetes, autism, your emotions, depression. Previous research has shown that these pre-term children have a higher risk of developing diabetes. We now know they have different gut microbes to full-term babies and see links between these microbes and their functions with insulin-resistant pathways.

“My research is part of a large, complex, multi-disciplinary project. We not only check the microbiome of these babies, but also their nutrition, metabolites and other biochemical parameters, as well as collecting information about their physical activity. It’s team work so you get support from other people – especially the supervisors and other team members.

“When you’re doing a PhD, it’s very intensive, you don’t have time to think about other jobs. Having a scholarship helps a lot and was essential for me to do my PhD.

“We are really lucky, we have money in our University PReSS accounts each year to attend international conferences and workshops. I have presented my results at different conferences, including the Wellcome Trust Microbiome Conference in Cambridge, UK, where I was awarded the Student Oral: Best Presentation Award. I also attended a microbiological data analysis course at the University of Chicago, and the PReSS account covered my flights and accommodation.”*

Thilini Jayasinghe, PhD candidate in Health Sciences, is a recipient of a University of Auckland Doctoral Scholarship.

*The University PReSS accounts provide an annual research fund to cover research costs such as conference attendance and travel (see page 35 for more information).

Postgraduate research

Postgraduate research is a cornerstone of the University of Auckland. The breadth of research being conducted at the University means we offer a wide range of disciplines to our research students. There is a wealth of opportunities for you to undertake research as a postgraduate student: from small research projects to in-depth doctoral theses.

Leading researchers

The University has more internationally and nationally esteemed researchers than any other tertiary institution in New Zealand. This means you could be working alongside internationally respected researchers on a project of global significance, whilst building your international networks and a reputation of excellence.

Be part of our research community

As a postgraduate researcher at the University of Auckland, you will be part of a community of like-minded postgraduate scholars that has the largest number of research degree completions in the country.

The University of Auckland

Our researchers*

Academic staff	4,226**
Postgraduate students	8,966
Doctoral students	2,945
International doctoral students	1,351

*2017 data (indicative).

**Academic staff on permanent or fixed-term contracts.

Renowned research-led University

The University of Auckland is recognised as having the greatest depth and breadth of research activity of any university in New Zealand.* The University supports the work of over 57 research units, centres and institutes, including two internationally-renowned Large Scale Research Institutes. The University is also host or co-host to five of New Zealand's Centres of Research Excellence (CoREs).

*Performance Based Research Fund. Evaluating Research Excellence: the 2012 Assessment.

\$40 million

worth of postgraduate scholarships and awards are on offer each year.

FindaThesis

Find doctoral and masters research opportunities at the University on FindaThesis. Whether you're searching by area of interest or looking for a specific project, the online database provides detailed information about available projects, potential supervisors and more.

www.findathesis.auckland.ac.nz

You can also browse the University's staff directory to find potential supervisors who research in your area of interest.

www.unidirectory.auckland.ac.nz

research centres and institutes across the University create knowledge that benefits our social, cultural, economic and environmental future.

“I am constantly engaged in discovering solutions to research questions. Finding new answers becomes almost an everyday habit.”

“As a bachelors and masters student I developed good bench skills, and decided to do a PhD to learn how to carry out research. When I began the PhD, I realised that my previous study was mostly about the knowns in science and a PhD is actually about the unknowns. My days never get dull and I’m always being challenged with new questions.”

Naz’s PhD research at the Auckland Bioengineering Institute (ABI) uses both lab experimentation and computational modelling to study the early stages of heart development. Her aim is to make a computational model of heart development using experimental data.

“Abnormal growth of the heart during embryogenesis causes various congenital heart defects. Decades of studies have identified key factors at different stages of heart development; however, the underlying mechanisms controlling heart development are still unclear. I hope that my research will enable us to ultimately study congenital heart defects in order to develop preventative and treatment approaches.

“ABI has been the ideal place for my PhD research: I can work in a multi-disciplinary environment and I have the chance to combine experimental and computational modelling approaches. I’ve had a chance to meet amazing people at the University of Auckland, including having the honour of being supervised by Professor Peter Hunter, who provided me with this great research opportunity. The academics here are highly skilled, internationally recognised and I have learnt so much from them.”

Naz Ebrahimi, PhD candidate in Bioengineering.

Arts

As one of the world's leading faculties for humanities and social sciences, we are passionate about making a difference and pushing the boundaries of knowledge and understanding.

Our research strengths include:

- Archaeology
- Conflict and terrorism
- Cybercrime
- Disaster recovery
- Histories, cultures and identities
- Indigenous knowledge and development
- Linguistics and language
- Policing and restorative justice
- Public policy
- Refugees and transnational migration
- Sustaining environments
- Transforming societies

Through your postgraduate research, you can contribute to the understanding of the cultures and dynamics that have shaped our world, and influence society and human experience today.

Auckland Bioengineering Institute

The Auckland Bioengineering Institute (ABI) is an innovative institution dedicated to improving healthcare and growing the medical technology industry in New Zealand. ABI offers an inclusive environment that fosters many exciting research and entrepreneurial opportunities for basic and translational research.

Our primary research strengths include:

- Building realistic computational models of the human body
- Developing experimental techniques and instrumentation to measure cell and tissue properties and validate models
- Translating knowledge to improve medical diagnosis, treatment and devices

Research areas at ABI include the Laboratory for Animate Technologies, which is modelling the human face; and the musculoskeletal research group, which is in partnership with the German research institute Fraunhofer IPA to develop human joint sensing and actuation technology for human exoskeletons.

Business School

At the Business School we have an unconditional commitment to quality teaching and research in topics that are forward-focused and relevant to the commercial world today.

Our academics are engaged in research programmes that contribute to New Zealand's economic and social wellbeing, and their projects frequently involve postgraduate students and collaborations with international colleagues.

Our researchers work in eight disciplinary areas:

- Accounting and Finance
- Commercial Law

We are ranked in the world's top 50 places to study

QS World University Rankings by Subject 2018.

- Economics
- Graduate School of Management
- Information Systems and Operations Management
- International Business
- Marketing
- Property

We also host research institutes and centres that focus on long-term programmes of high relevance, such as building New Zealand's business connections with Asia, enhancing business leadership, retirement policy, Māori business development, and energy and resource use.

Creative Arts and Industries

The Faculty of Creative Arts and Industries is the University's centre of creative research, teaching and practice within the fields of architecture,

urban planning, urban design, music, dance and contemporary art.

Key research strengths include:

- **Architecture and planning:** urban and architectural resilience and sustainability; urban and spatial planning and place making; design research; the history, theory and pedagogy of the built environment, including Māori and Pacific-focused research.
- **Dance Studies:** choreography, performance, community dance, dance education, ethnography, history and technology.
- **Elam School of Fine Arts:** curatorial, critical and theoretical research contributing to local and international contemporary arts discourse.
- **Music:** voice science, 18th and 19th century music history, theory and practice, film music, compositional and improvisational practice, musicians' health, studio pedagogy and music education.

“I am really grateful to have a supportive supervisor who has given me freedom to write about issues of personal and academic importance to me.”

Chloe’s research on the need to secure greater legal recognition for Māori rights uses the experiences of her own iwi, Ngāti Kahu, as a case study.

“I have always been passionate about Māori and indigenous rights and my work as an undergraduate research assistant on two Marsden projects (Onscreen Indigeneity: The case of Māori Television; and The Claimants’ views on the Treaty Settlement Process) influenced my decision to pursue postgraduate studies and in particular, in the area of Māori legal issues and on the premise that I had the freedom to write from a more anthropological basis for my master’s thesis.

“I am fortunate to have support and access to materials that detail perspectives and experiences of Ngāti Kahu in the settlement process. This adds a unique insight into what is a very important legal and political issue. I hope my research can encourage further discussion on these issues, and perhaps, how these same ideas can be applied to Māori legal rights generally.

“Being involved with Te Rakau Ture (Māori Law Students Association) and Ngā Tauira Māori (Māori Students Association) has made my experience as a young Māori woman at the University an enjoyable and worthwhile one. I am also grateful for the expertise, guidance and support of the academics here.

“I am stoked to have Dr Claire Charters as my supervisor: a successful Māori woman who is extremely knowledgeable in Māori and indigenous legal issues. Claire has been amazing and very supportive of not only my ideas, but my journey throughout. For me, having a Māori legal woman as my supervisor was very important. When I explain my ideas and my experiences, I do not feel isolated or as if I’m an ‘other’. Being Māori also, she lives and breathes it every day – she ‘gets it.’”

Chloe Manga (Ngāti Kahu and Te Rarawa) is studying towards a Master of Laws.

Education and Social Work

Research in the Faculty of Education and Social Work contributes to improving the educational and social wellbeing of society. Our research harnesses the vast potential that diversity brings to education, social work, counselling and social and community leadership.

Five sub-themes summarise the key spheres of our research: advancing equity; enhancing indigenous opportunities; leading learning; promoting life-long wellbeing; and supporting intercultural inclusiveness.

Research strengths include:

- Applied theatre in education
- Education and schooling success for diverse communities within New Zealand
- Educational leadership
- Health education, physical education and sports studies
- Māori and indigenous language revitalisation, language education and language policy
- Social work practice strategies for promoting the wellbeing of diverse populations

Our collaborative relationships with schools and communities of practice have enabled the faculty to secure significant funding for its research and professional fellowships, as well as postgraduate study scholarships for outstanding researchers from New Zealand and around the world.

Engineering

The Faculty of Engineering covers a wide range of innovative and exciting research – from pure to applied – with demonstrable positive impacts on society, economics and technology and a commitment to ensuring we lead the way towards a sustainable future.

Some of our major research areas include:

- Energy
- Food
- Healthcare technology
- Infrastructure
- Manufacturing
- Robotics
- Smart materials

We believe in inclusivity – our postgraduate students are valued members of our research teams. Our capacities are further strengthened through collaborations with industry, and other faculties and research institutions, so you're exposed to the best knowledge on offer.

Law

As New Zealand's leading law school, we have a tradition of excellence proven by a strong international reputation for research. Our strength is reflected in the calibre of our award-winning lecturers and supervisors. Auckland Law School has leaders in all major areas of the law.

The New Zealand Centre for Information and Communications Technology Law recently became our fourth renowned research

centre, alongside the New Zealand Centre for Environmental Law; New Zealand Centre for Human Rights Law, Policy and Practice; and New Zealand Centre for Law and Business.

Our broad range of research areas include:

- Contract, torts, equity and other areas of private law
- Corporate and commercial law
- Criminal law and justice
- Family and relationships law and policy
- Indigenous peoples and the law
- International and comparative law
- Land and environmental law
- Legal history and theory
- Litigation and dispute resolution
- Public law, including constitutional and administrative law
- Tax and regulations

Liggins Institute

The Liggins Institute is a world-leading centre for research into maternal, fetal and child health, nutrition, development, epigenetics and translational and implementation science. Our mission is to improve life-long health through excellent research into the long-term consequences of early-life events.

Our multi-disciplinary approach enables us to view 21st century health problems from different angles at once, and our four key research themes reflect this:

- **Determinants of a healthy life** is a ground-breaking area of science that has the potential to understand why and how non-communicable diseases develop.
- **Healthy mothers, healthy babies** focuses on the importance of a mother's environment, diet and lifestyle prior to and during pregnancy for her child's life-long health.
- **Nutrition for life-long health** encompasses every stage of life: from the health of parents at conception, to the impact of diet on muscle health in adulthood.
- **Research to reality** is finding the best ways to translate our research findings into changes in clinical practice.

From cellular research to clinical trials, the Liggins Institute focuses on the application of knowledge, because we know that intervening in people's health early has the biggest impact on life-long health.

Medical and Health Sciences

At the Faculty of Medical and Health Sciences we are committed to improving the health of our local, national and global communities through excellence in research. Our faculty is the largest biomedical research faculty in New Zealand, with a proud history of attracting and growing pre-eminent researchers and talented students and generating high levels of research funding.

Our faculty has fostered a very strong research culture and is host to a number of internationally

renowned and highly regarded research programmes.

Research strengths include audiology, bioengineering, biomedical imaging, cancer, cardiovascular biology, clinical medicine, developmental biology, genomics, immunology, neuroscience, ophthalmology, population health and reproductive biology.

A strong culture of collaboration exists at all levels through the faculty, allowing vital links across faculty, between faculties and with other tertiary research institutions.

Science

The Faculty of Science is New Zealand's leading and largest science faculty. The breadth of scientific research is diverse and a variety of high-quality postgraduate research options are available.

Science plays a vital role in addressing the key issues that confront us and future generations.

For this reason, research in the faculty is regularly successful in funding rounds for a broad range of projects, from searching for early-life in terrestrial hot-springs to improving the process for producing milk powder.

We provide a rich research environment for our students. Our many research strengths include:

- Computational biology
- Food
- Future materials and devices
- Health
- Knowledge sciences
- Science and society
- Sustainability
- Understanding our universe

Our faculty benefits from strong collaborations within the academic community worldwide.

Our relationships with commercial industry are an important aspect of scientific research and innovation, and we are proud of our significant links to the Crown Research Institutes of New Zealand.

Find out more Postgraduate research

www.auckland.ac.nz/postgradresearch

Our researchers on YouTube

www.researchworkswonders.ac.nz

Doctorates were conferred in 2017. Our postgraduates' success is at the heart of our research-intensive University.

“The University offers a vibrant environment for learning and getting in contact with innovative technology.”

Ninna’s PhD research in microbial fermentation has led to the development of technology that produces a range of functional flours made from fruit and vegetable by-products. The flours are high in protein, dietary fibre and vitamins, and use by-products (pulp, peels and seeds) that would normally end up in landfill.

With the support of the Velocity programme at the University’s Centre of Innovation and Entrepreneurship, Ninna and her supervisor, Associate Professor Silas Villas-Boas, started Green Spot Technologies, which has a pilot plant for the production of the flours and is scaling up to commercial production.

“The amount of food that is lost or wasted every year is inconsistent with the global population growth rate and future food demands. Therefore, we need to challenge this situation, and nothing is better than science to propose solutions. My research project is all about innovation, and the Velocity programme was the catalyst for my development as an entrepreneur.

“Having a PhD opens a wide range of professional possibilities and the chance to be involved in problem-solving projects. It is the perfect qualification to get the set of technical and personal skills to work in my area of interest. Working with supportive supervisors who are world-leaders in their field has also played an important role in my professional development.”

Ninna Granucci, PhD candidate in Biological Sciences, is from Brazil and is a recipient of a Bioresource Processing Alliance (BPA) scholarship.

New Zealand's most innovative university

From innovation workshops and challenges to support starting a spin-out company, the University has a strong innovation culture, where every student has the opportunity to develop and pursue their entrepreneurial potential.

The University of Auckland has been identified as one of the world's leading entrepreneurial universities¹ and the most innovative university in New Zealand². We are committed to developing entrepreneurial-minded students and graduates in an innovative environment.

- Many of our academics and postgraduate students are involved in research that has the potential to benefit our society and economy.
- We offer extensive support to students and staff to develop and commercialise their research.
- We provide opportunities and activities to develop your innovation and entrepreneurship skills.
- Network with like-minded students and academics in an environment where collaborations have led to start-ups and spin-out companies.
- We offer postgraduate programmes in innovation and entrepreneurship that will stretch and develop those working, or seeking a career, in commercialisation.

Velocity

Velocity is the University of Auckland's globally renowned entrepreneurship programme. It is student-led, supported by the Centre for Innovation and Entrepreneurship, and runs year-round seminars, workshops and challenges.

Velocity's 100k challenge encourages those with a business or social enterprise idea to test its potential. Shortlisted entrants win a place in the Velocity Launch Pad Programme, where they receive mentoring and workshops. Finalists compete in the \$100k Velocity Grand Final for seed-capital and support in growing their venture.

Velocity has ignited more than 120 ventures and has attracted more than \$220 million in investment.

www.velocity.auckland.ac.nz

Unleash Space: innovation hub and maker space

The University's newly-opened Unleash Space is a hub for innovation and entrepreneurship at the University. Membership is free for all students and staff at the University. It offers workshops, equipment and seminars to inspire and motivate and help you develop your entrepreneurial capability.

Create what you imagine, design for today and prototype for tomorrow. The space houses 3D printers, laser cutters, routers, electronics, vacuum formers, sewing machines, craft and art supplies and other tools and machinery.

www.unleashspace.ac.nz

Commercialise your research

The University offers a range of opportunities for postgraduate students to explore the potential to commercialise your research.

Courses and workshops are offered by the Centre of Innovation and Entrepreneurship, UniServices, and Career Development and Employability Services that:

- Introduce you to the concepts of entrepreneurship, intellectual property and commercialisation
- Equip you with the tools and skills needed to attract investment
- Help you develop networks and a prepare for a career in R&D

Doctoral Skills Programme: Enterprising Researcher module

The Enterprising Researcher module helps doctoral candidates develop their capacity for research enterprise. This online module is open to all doctoral candidates and will help you increase the impact of your research and diversify your career options.

IP Protection and commercial development

At UniServices, we bring ideas to life. We partner with the best minds in academia and business to apply intelligent thinking to ideas that have the potential to change the world.

For nearly 30 years, UniServices has worked alongside postgraduate students, researchers and academic staff at the University of Auckland to transfer world-class knowledge and technology into existing companies and start-ups.

Funding and investment

- The University of Auckland Inventors' Fund, managed by UniServices, is a \$20 million seed investment fund that is accessible to University researchers and students. The fund supports the commercialisation of ideas and inventions, enabling researchers to transform their research into businesses and new products.
- Five Return on Science investment committees, including the student-led Momentum, provide support to founders and inventors.

www.returnonscience.co.nz

Commercialisation and entrepreneurship programmes

The University's Centre for Innovation and Entrepreneurship offers both a postgraduate certificate and a masters programme in commercialisation and entrepreneurship to professionals, innovators and researchers (see page 20).

These unique programmes deliver the knowledge and skills needed to realise the potential of research discoveries, inventions and new ideas.

www.cie.auckland.ac.nz

2. Reuters Top 75: Asia Pacific's Most Innovative Universities 2017.

“The best thing about postgraduate study is the ability to study something you are interested in. It requires a lot of discipline, determination and grit, but it’s worth it.”

After completing a Summer Research Scholarship examining the Social Attitudes Survey on citizenship and political attitudes and a Bachelor of Arts (Honours), Clark is now undertaking a Master of Arts in Sociology. Clark’s masters research looks at the ways young New Zealanders think about their own political participation.

“Doing a summer scholarship showed me how challenging – and therefore rewarding – research can be. It made sense to continue studying for a masters since I’ve always enjoyed learning new things.

“By interviewing young people across New Zealand, I’m getting welcome insight into the reasons why they are reluctant to vote but more eager to participate in other ways. One of the most important flow-on effects of my research is how we can get young people more politically engaged and involved. That’s useful not only for political parties but also policy analysts, media and the general public.

“I intend to pursue doctoral studies in the near future, which I think will be the ultimate test of everything I’ve learnt over the past five years. During my time at University, I’ve been a Teaching Assistant and Tuākana mentor, and eventually I want to make a career of teaching because it’s what I enjoy doing most.

“At University, we get the rare privilege of spending our time trying to make the world a better place. Auckland has been a great place to do that.”

Clark Tipene (Ngāpuhi), Master of Arts in Sociology student, is a recipient of a University of Auckland Māori Postgraduate Scholarship and a Dean of Arts Masters Thesis Scholarship.

Our postgraduate programmes

Postgraduate study enables you to deepen your understanding of your subject, develop specialist skills and knowledge, follow your passion for research, stand out from your peers in a competitive job market or change careers. We offer a wide range of postgraduate programmes to help you reach your goals.

Pathways to our postgraduate programmes

130 postgraduate programmes are on offer across 180 subjects, including PhDs in 100 different subjects. Options range from traditional disciplines to emerging cross-disciplinary subjects.

Masters

We offer an extensive range of masters degrees to allow you to increase your knowledge in your subject, gain a professionally-accredited qualification, follow your passion for research or change career whilst gaining an advanced qualification.

Taught masters provide advanced specialist training in your field and are usually completed by taught courses only, although some can include a dissertation or research project.

Research masters are completed by thesis. They offer the opportunity to follow your research passion whilst developing advanced research skills.

Conversion masters enable you to study a masters in a different subject to your bachelors degree. To find out if a conversion masters is available in your area of interest, contact the postgraduate adviser for that discipline: www.auckland.ac.nz/pgadviser

120, 180 and 240-point masters programmes

Some of our masters are available as 120-point (1 year full-time), 180-point (18 months full-time) or 240-point (2 years full-time) programmes, offering options for direct entry with a bachelors degree (to some 180 and 240-point programmes) or a bachelors (honours) or postgraduate diploma (to 120-point programmes).

Further study

A research masters degree can lead to entry to a doctoral programme.

Bachelors (honours)

Extend the knowledge you gained in your undergraduate degree with a bachelors (honours) degree. Our honours programmes are a great way to explore an area of interest from your undergraduate study in greater depth, develop research skills and give yourself the edge in the job market. Honours degrees are also seen as a pathway to further study.

Bachelors (honours) programmes usually combine taught courses with a research project. Some honours can be completed as a research-only programme.

Further study

A bachelors (honours) degree can lead onto a masters or, if you perform well in your dissertation, some subject areas may allow direct entry to a doctoral programme.

Programme entry

You must have completed an undergraduate degree at a recognised university (or similar institution) in a field relevant to your specialisation, typically with a GPA or GPE of 5.0. Some programmes may require higher scores.

Postgraduate diploma

Postgraduate diplomas offer the opportunity to build on your major undergraduate subject and can be an alternative to a bachelors (honours) degree. Some postgraduate diplomas provide specialised training and the opportunity for advancement in your profession.

Postgraduate diplomas are normally completed by taught courses, but may include practical training, formal study or a research project.

Further study

Postgraduate diplomas can provide an alternative pathway to masters programmes and, in some disciplines, can be used as the first year of enrolment for a two-year masters programme; for example, the Postgraduate Diploma in Business is designed as a gateway to the MBA.

Programme entry

You must have completed an undergraduate degree at a recognised university (or similar institution) in a field relevant to your specialisation, typically with a GPA or GPE of 3.0 or 4.0. Some programmes may require higher scores.

“This programme is providing a space to reflect on and deepen my practice. It is a great mix of theory and practical application: allowing us to incorporate our work experience and lived knowledge with what we know from the evidence and published work.”

“Over the last decade, I’ve held leadership roles in non-profit organisations. A common thread in this work has been change: designing for social change, making changes in the way organisations and systems work, and supporting people to change their attitudes and behaviours. This programme appealed to me because of its grounding in social justice and ethics, and its blend of social innovation, leadership and formal research skills. I also like how the programme is structured to allow a wide range of choices to support different professional interests.

“I’m planning to undertake my thesis on suicide prevention, focusing on community-led responses from rainbow/LGBTI+ communities. Despite being at significantly higher risk of suicidal behaviour than other groups in New Zealand, the rainbow population is not well recognised or resourced within national suicide prevention efforts. I currently work in this area and have been directly engaged with the issue of rainbow suicide prevention for the last six years. Because of this, I’m anticipating that my research will have direct practical application in informing how programmes and advocacy approaches are developed.

“It’s been exciting to be part of the first group to undertake this masters programme. There has been real scope for getting to know where my classmates have come from and what they are interested in. We’ve formed connections that have been supportive and fun.”

Moira Clunie is studying towards a Master of Social and Community Leadership.

Programme entry

120-point masters

You must have completed one year of postgraduate study, following an undergraduate degree, at a recognised university (or similar institution) in a field relevant to your chosen specialisation. Four-year bachelors degrees will be considered where the final year consists of postgraduate-level study.

You will typically require a GPA or GPE of 5.0. If you are applying for the Master of Engineering Studies, a GPA or GPE of 4.0 is required. Some programmes may require higher scores.

180 and 240-point masters

You must have completed an undergraduate degree at a recognised university (or similar institution) in a field relevant to your specialisation (with the exception of conversion masters), typically with a GPA or GPE of 5.0. Some programmes may require higher scores.

Conversion masters

You will need an undergraduate degree with good passing grades. Requirements vary, so please check the relevant programme details: www.auckland.ac.nz/programmefinder

Doctoral degrees

A doctoral degree gives you the freedom to follow your passion and undertake advanced research in your area of interest. You can develop highly transferable as well as specialised research skills relevant to a wide range of careers. Our doctoral candidates work closely with at least one appointed supervisor and many work in a team of researchers.

The Doctor of Philosophy (PhD) is available in 100 different subjects and is offered in all faculties and large-scale research institutes.

The University also offers six named doctorates: Doctor of Clinical Psychology, Doctor of Education, Doctor of Fine Arts, Doctor of Medicine, Doctor of Music and Doctor of Musical Arts.

For the PhD, you will prepare a substantial thesis of original research that contributes significantly to knowledge and understanding in your discipline. Your thesis may include publications you have written under supervision for this degree or, for those in a creative arts or design discipline, you may present a body of creative work for assessment with your thesis.

We offer a wealth of English-language enrichment opportunities to support your studies. All new doctoral candidates take a Diagnostic English Language Needs Assessment (DELNA) as part of their provisional goals. This helps us allocate you any English-language support you might need to ensure your academic success (see page 45 for more information on English-language support).

Programme entry

Acceptance to our doctoral programmes is based on academic merit.

You must be able to demonstrate an ability to carry out independent research and have already completed a significant research project, dissertation or thesis, at university.

If you have New Zealand postgraduate qualifications, you need to have completed a postgraduate bachelors (honours) degree with first class or second class (division 1) honours, or a masters degree with first class or second class (division 1) honours, in a field related to your doctoral studies.

If you have overseas qualifications, you will need to have completed a masters-level qualification in a field related to your doctoral studies. You must have a GPE of at least 5.5.

Your acceptance into a doctoral programme is dependent on the availability of appropriate supervision and study facilities.

Calculating your GPA/GPE

Grades or marks achieved at the University of Auckland are given a grade point average (GPA).

Grades or marks achieved at other institutions are given a grade point equivalent (GPE). Use our GPE calculator for an indication of your GPE: gpecalculator.auckland.ac.nz

English-language requirements

The minimum requirement is an overall IELTS academic score of 6.5 with no band less than 6.0, or an approved equivalent. Some programmes require higher levels of English proficiency, see:

www.auckland.ac.nz/pg-english-reqs

Academic integrity requirement

The University of Auckland requires all students admitted into a programme to complete the Academic Integrity Course in their first semester.

www.auckland.ac.nz/academicintegritycourse

International student fees

Postgraduate programmes (per subject area)	2019 estimated annual tuition fee for international students (NZ\$)³
Science	\$41,167
Interfaculty programmes	*
Doctoral programmes	2019 estimated annual tuition fee for international students (NZ\$)³
Doctor of Clinical Psychology (DClinPsy)	\$41,111
Doctoral programmes	2018 estimated annual tuition fee for international students (NZ\$)³
Doctor of Philosophy (PhD)	\$6,970 ⁶

- Part-time study options are generally not available to international students on student visas. International students must be enrolled full-time to meet the requirements of their student visa.
- 1 December start available for 120-point research masters only, subject to supervisor availability.
- Based on annual tuition fees for full-time study of 120 points except: programmes that require 60 points to complete (the annual tuition fee for 60 points is shown); some one-year programmes offered by the Faculty of Education and Social Work require 150 or 160 points to complete (the annual tuition fee for the points required to complete these programmes is shown); business coursework masters students complete 150 points in the first year (the annual tuition for 150 points is shown). Tuition fees are indicative only and the fees for 2019 will be set at the end of 2018. All students will also pay a student services fee. As an indication, this fee is \$813.60 for students undertaking a full-time load of 120 points in 2018. Students taking fewer than 120 points pay proportionately lower fees.
- Semester Two start may not be possible for all subjects/majors/specialisations and only if places are available.
- Upon the recommendation of the Academic Head and approval from the Board of Graduate Studies, a candidate may present a corpus of creative work for assessment with a written thesis, comprising an integrated whole.
- New international PhD students will be accorded domestic status for the purposes of tuition fees, subject to supervisory and residency requirements. A new international PhD student is defined as a foreign student enrolled for the first time in a Doctor of Philosophy programme at a New Zealand university. Note that to be eligible for the domestic fee, you must reside in New Zealand for the duration of your doctoral programme. However, you may undertake research activities overseas during your doctoral programme (for a cumulative total of no more than 12 months).
- Part-time only.
- Professional programme accredited by the relevant professional body.

9. Part-time study is subject to prior approval by the School of Architecture and Planning.
10. Available to qualifying students who have completed Parts I, II and III for the Bachelor of Fine Arts with the required grades. It is not available to students who have already graduated with a BFA (these students may apply to the PGDipFA or MFA two-year option).
11. After completing the initial two years of full-time study a candidate may apply for permission to continue as a part-time student.
12. This programme will be offered every two years from 2018.
13. This programme will be offered in 2019 subject to approval.
14. Research option only available for Food Process Engineering and Medical Devices and Technologies specialisations.
15. Full-time study may not be possible for all subjects/majors/specialisations.

16. Part-time study may not be possible for all subjects/majors/specialisations and only if places are available.
 17. Must be registered with the Medical Council of New Zealand.
 18. Must be registered with the Pharmacy Council of New Zealand.
 19. Semester Two start may be possible subject to prior approval by the Head of Programme.
 20. Must have completed Master of Health Psychology.
 21. Must be registered with the Nursing Council of New Zealand.
 22. Taught option only available for Optometry.
 23. This programme has a limited intake each year and is open to New Zealand and Australian citizens and permanent residents only.
 24. Programme starts in early January.
 25. Taught option available for a limited range of majors.
- *Tuition fees will be charged at the respective rate for the subject.

“The Summer Research Scholarship was an opportunity to discover a deep interest for new forms of technology in architectural representation. The support and insight I gained gave me the confidence to pursue postgraduate study.”

After completing a Summer Research Scholarship at the University, LiWen is now researching architecture and film for his Master of Architecture (Professional) thesis.

“The masters programme provides an important incubation period for students discovering their voice as designers. I needed time to discover a potential career as a production designer/art director in the entertainment industry. Postgraduate study has given me the freedom to experiment with potential interests, while providing guidance along a strong backbone of architectural inquiry.

“I would like my research to contribute to a critical understanding of film practice and architecture. I hope it will enable architectural students to expand their research into these fields, and pursue careers in the entertainment industry.

“I have met great people during my time as a masters student; some will become lifelong friends and many move on to amazing endeavours. I have learnt something from each person and that is what I cherish the most.”

LiWen Choy is studying for a Master of Architecture (Professional).

Funding your studies

The University of Auckland believes in investing in our postgraduate students – that’s why we offer postgraduate scholarships, awards and prizes to a total value of over \$40 million each year. It pays to investigate funding possibilities as early as possible, so you know what you may be eligible for and when applications are due. Other options also exist to help you meet the costs of your study.

Guaranteed postgraduate scholarships

The University offers guaranteed scholarships to research students who meet grade point average (GPA) thresholds from their qualifying programme. Our guaranteed postgraduate scholarships are some of the most generous scholarships on offer in New Zealand.

As a high-achieving domestic research student, you could be eligible for:

Guaranteed postgraduate scholarships

University of Auckland Postgraduate Honours/ PGDip Scholarships

University of Auckland Māori Postgraduate Scholarships

University of Auckland Pacific Postgraduate Scholarships

University of Auckland Research Masters Scholarships

University of Auckland Doctoral Scholarships

International students

We offer guaranteed University of Auckland Doctoral Scholarships to international PhD applicants who meet GPA thresholds in their qualifying programme from a New Zealand university.

For more information see www.auckland.ac.nz/makethegrade

Other postgraduate scholarships

In addition to guaranteed scholarships, the University offers a range of other postgraduate scholarships, awards and bursaries including:

Postgraduate scholarships

Health Research Doctoral Scholarships

Senior Health Research Scholarships

Universitas 21 Doctoral Mobility Scholarships

Various subject-specific scholarships

Our Scholarships Office provides access to a comprehensive database of external scholarships to give you information about the widest range of funding providers.

For detailed scholarship information, including criteria, closing dates, online applications and application forms, visit:

www.auckland.ac.nz/scholarships

Summer Research Scholarships

Summer Research Scholarships are a great way to gain valuable research experience over the summer months, boost your CV and help you think about pursuing postgraduate study.

The scholarships provide a \$6,000 tax-free stipend and are open to high-achieving domestic and international students. Applications are especially welcomed from international students, Māori students, Pacific students and students from other New Zealand universities.

www.summer.ac.nz

Doctoral scholarships and support funding

University of Auckland Doctoral Scholarships are a generous postgraduate scholarship – paying fees and providing a stipend (living allowance) of \$27,600 per annum for three years of full-time doctoral study, which may be extended by a further six months (on application).

Doctoral scholarships are awarded to both domestic and international students. There are no closing dates or extra application forms: when you apply, just tick the box to request assessment for the scholarship and we’ll do the rest. Scholarship offers are made alongside offers of places in doctoral programmes.

Under a New Zealand Government scheme, new international PhD students who reside in New Zealand during their doctoral study will pay the same annual tuition fees as New Zealand students (NZ\$6,970; US\$5,088** per annum in 2018). Including compulsory health insurance for international students (NZ\$620, see pg. 50) and the Student Services fee (NZ\$814) the total fee in 2018 was NZ\$8,404 (US\$6,135** per annum).

www.auckland.ac.nz/pg-international-tuition-fees

*Exchange rate as at 31 January 2018: NZ\$1 = US\$0.73.

PreSS accounts

If you’re a doctoral student undertaking supervised research, you’re automatically entitled to research support funding through a University PreSS account. PreSS accounts provide at least \$1,200 per annum (discipline dependent) over the four year period of your registration (or until first submission). You can use the money for costs such as attending conferences, research-related travel and accommodation, and research consumables.

www.auckland.ac.nz/press-accounts

Student loans and allowances

Student loans and allowances are administered by StudyLink, a service of the Ministry of Social Development.

New Zealand citizens and permanent residents may be eligible for financial assistance to support them during their studies.

www.studylink.govt.nz
Phone: 0800 88 99 00

Employment during study

Advanced postgraduate students are often employed as tutors, laboratory demonstrators or teaching assistants for undergraduate courses. Tutoring is a great way to gain valuable professional and teaching experience during your masters or PhD study.

Other opportunities include part-time research assisting, administrative duties or library work. There may be limits on allowable work hours (particularly for scholarship and international students), so you need to check any conditions that may apply. If you are working outside of the University to finance your study, it’s important that you discuss your work commitments with your department’s postgraduate adviser or your supervisor to ensure you can balance your workload realistically.

\$27,600

The annual tax-free stipend provided by the University of Auckland Doctoral Scholarship (fees are also covered).

Enhancing your career potential

Whether you want to change career, prepare yourself for a career in academia, develop your research portfolio or learn new skills, postgraduate study can help you stand out amongst your peers.

Postgraduate study can give you the edge in a crowded market place. It can also offer the opportunity to change careers, upskill or prepare for the next step in your career. Our graduates are highly sought after in New Zealand and around the world. This is reflected in our QS Stars five-star rating for employability, and our ranking in the top 75 universities in the 2018 QS Graduate Employability Rankings and in the top 150 universities in the Times Higher Education Global University Employability Ranking 2017.

The value that employers place on postgraduate study is reflected in the levels of remuneration and employment that those with a postgraduate qualification enjoy. According to a Ministry of Education report on post-study earnings, employment rates increase with the level of qualification gained and people with postgraduate qualifications command high earnings, with many earning twice the national median.*

**Young, domestic graduate outcomes – earnings. Ministry of Education, 2017.*

Whatever your motivation, a postgraduate taught qualification will provide you with the chance to:

- Explore new and emerging fields of study.
- Acquire further specialist knowledge and theory.
- Gain advanced knowledge of professional practice (depending on your programme).

A postgraduate research qualification will give you the opportunity to:

- Demonstrate mastery of specialist knowledge and theory.
- Define and manage a research project.
- Undertake original research and practice.

Learn new skills

To augment and enhance the skills and knowledge you receive as a postgraduate student, the University provides a range of skills programmes.

The Doctoral Skills Programme offers a variety of courses to help develop academic and professional skills and to help with career planning and professional development (see pg. 39).

www.auckland.ac.nz/doctoralskills

The Doctoral Academic Leadership Initiative (DALI) prepares mid-phase doctoral students for life in academia, focussing on academic leadership, research and teaching. Applications open in October each year. DALI is facilitated by the Centre for Learning and Teaching in Higher Education.

www.clear.auckland.ac.nz/app/dali

Career Development and Employability Services

At any stage of your study at the University of Auckland, you can access Career Development and Employability Services' (CDES) award-winning careers service**. CDES offers a range of professional services that will help you to recognise and grow your capabilities so you can make a successful transition into employment and/or further study.

The CDES website (www.cdes.auckland.ac.nz) is the first stop to help you manage your world of work, life and learning. Here you will find useful tools and resources to assist you, including MyCDES, your personalised career management system, a job board, workshops, large industry expos, recruitment events, workshops and career resources. You can also make an appointment with a dedicated postgraduate Career Development Consultant.

Attending workshops, presentations or events will assist you to:

- Understand the employment market.
- Identify your unique brand and develop a strategy to market yourself.
- Make a successful transition into employment.

Discover how Career Development and Employability Services can assist you on your career journey.

***Best Careers Service. The New Zealand Association of Graduate Employers (NZAGE) Industry Awards 2016.*

RANKED NUMBER 1
IN NEW ZEALAND FOR EMPLOYABILITY*

*Times Higher Education Global University Employability Rankings 2017

“My friends who have a Master of Commerce encouraged me to take this opportunity, although none of them said it was easy. I think this is the experience of a lifetime.”

Kevin is an international student from China, researching the potential impact of political connections on the valuation of Chinese-listed firms.

“Connections between businesses and governments are prevalent all over the world. While most existing studies focus on the US market, my research may provide novel evidence for the potential impact of political connections. Proving such impact could help Asian investors to converge mainstream finance theories, and more importantly, price firms more accurately.

“Postgraduate study at the University of Auckland has offered me the opportunity to learn from world-class leading researchers, work closely with top performing students, and improve myself in all aspects. I’ve also had so much help from the postgraduate advisers: they have provided excellent advice with course planning and have been supportive throughout my postgraduate studies.”

Kevin Jing, is studying a Master of Commerce in Finance.

Gaining an international qualification

Our partnerships with leading universities around the world open up a range of opportunities for you to interact with your counterparts, including joint research projects with partner universities, international networking, exchanges, conferences and workshops.

Take advantage of our international partnerships and programmes

The University of Auckland is in the top 40 of the Times Higher Education's world's most international universities, reflecting our international outlook. We have more than 100 Memoranda of Understanding with research institutions around the world, including universities in Australia, Canada, China, Germany, Japan, Sweden, the UK and the US.

360 International

The 360 International Exchange Programme creates opportunities for you to complete part of your University of Auckland degree overseas. Taught postgraduate study may be done on exchange for one semester of a one-year programme. You must discuss feasibility and timing with your faculty.

The countries that you can visit on a one- or two-semester exchange currently include Australia, Belgium, Brazil, Canada, Chile, China, Denmark, England, France, Germany, Iceland, Ireland, Italy, Japan, Korea, Mexico, the Netherlands, New Caledonia, Norway, Scotland, Singapore, Spain, Sweden, Taiwan and the US.

www.auckland.ac.nz/360

Association of Pacific Rim Universities (APRU)

Established in 1997, the Association of Pacific Rim Universities (APRU) is a consortium of 50 leading research universities in the Pacific Rim. APRU aims to promote scientific, educational and cultural dialogue and collaboration among Pacific Rim economies.

A number of opportunities exist for students, including participation in APRU research conferences and research symposia.

Universitas 21 (U21)

Universitas 21 is an international association of comprehensive, research-intensive universities in 17 countries. The aim of U21 is to facilitate interchange between members. It provides a framework for international collaboration, capitalising on the established reputation and operational reach of each of its members. The University of Auckland is the only university in New Zealand with membership of U21.

U21 Doctoral Student Mobility

The University of Auckland offers scholarships for confirmed doctoral candidates to visit U21 partners for the purpose of research. The scholarships provide up to \$5,000 towards the recipient's mobility. Applications are accepted year-round and are assessed monthly.

Worldwide Universities Network (WUN)

The Worldwide Universities Network comprises 23 research-intensive institutions spanning five continents. The WUN creates new, multilateral opportunities for international collaboration in research and graduate education.

Many of WUN's initiatives encourage the participation of doctoral students and early career researchers in international collaborations.

www.auckland.ac.nz/internationalnetworks

China Scholarship Council (CSC) China to New Zealand

Top Chinese PhD students can study at the University of Auckland through a scholarship programme developed in collaboration with the China Scholarship Council (CSC). Students who receive a scholarship are given a living allowance by the Chinese Government for the term of the scholarship, return airfare to New Zealand, student visa fees and the cost of overseas student health cover.

www.auckland.ac.nz/china-csc

New Zealand to China

The Confucius Institute in Auckland, in cooperation with the China Scholarship Council (CSC), offers up to 10 full scholarships for Chinese language study in China each year. The scholarship provides a monthly allowance and also covers tuition fees, teaching materials, accommodation and on-campus medical care.

ci.ac.nz/what-we-offer/scholarships/nz-china-scholarship

“Unlike similar programmes, this masters allows students to have active experience with clinical clients. It makes the programme challenging and offers an invaluable opportunity.”

Andy is an international student from the US who has recently completed a Master of Science in Clinical Exercise Physiology, which combines taught courses and a dissertation with practical training in the University's Health and Performance Clinic.

“The exercise physiology field is incredibly broad, and the programme allows for a wide range of experiences and exposure, letting you discover what parts are most interesting and exciting. The programme offers an academic and professional environment to build the knowledge and practical skills necessary for certification as a Registered Clinical Exercise Physiologist with the American College of Sports Medicine (ACSM) or Clinical Exercise Physiology New Zealand (CEPNZ), including all of the practical hours.

“My particular interests have focused on cardiac and cancer rehabilitation. Those who have undergone cancer treatment are often left with lasting effects and in serious need of long-term recovery options after the harsh treatments of surgery, chemotherapy and radiotherapy are completed. My end goal is to own a fitness centre, where part would be dedicated to helping people, such as cancer patients, better their own health once it has taken a hit.

“The adjustment to postgraduate study is a big one. I used several of the Library services, including support with database research and reference management tools, which helped me bridge the technology gap from my undergraduate study 12 years ago. As well as the professors, who are there for advanced guidance, one of the greatest resources has been my classmates. They are the start of my professional network; they each have different strengths and interests, making them the best sounding boards for working things through.”

Andy Cosgrove has recently completed a Master of Science in Clinical Exercise Physiology and was supported in his study by a Post 9/11 GI-Bill – US Veterans Benefit.

Utilising student services and support

When you embark on the challenge of postgraduate study, it's important to feel confident that you have the support you need to succeed. Our extensive range of student services ensure that help is readily available; we can assist you with everything from research skills to career planning.

School of Graduate Studies

The School of Graduate Studies has overall responsibility for the development and oversight of policies and procedures for graduate programmes and for the promotion of graduate study, and provides advice to all doctoral students and their supervisors.

You can access the information and advice they offer at www.auckland.ac.nz/school-of-graduate-studies or by emailing postgradinfo@auckland.ac.nz

The School of Graduate Studies coordinates a range of events for postgraduate students throughout the year, including monthly Doctoral Morning Teas and the university-wide 3 Minute Thesis competition.

www.auckland.ac.nz/3minutethesis
www.auckland.ac.nz/postgradevents

Postgraduate Students' Association (PGSA)

The PGSA aims to make postgraduate life more enriching and fulfilling, and is the voice of postgraduate students (along with AUSA) within the University and the community.

The PGSA hosts social and academic events, produces a newsletter and acts as a representative for postgraduate students on various boards and committees at the University. Membership is free and allows you access to the Postgraduate lounge and gets you a discount at Strata café, both of which are situated on Level 4 of the Kate Edger Information Commons. For membership details see www.pgsa.org.nz.

The PGSA also supports Exposure, an annual postgraduate research exposition.
www.auckland.ac.nz/exposure

To learn more about its work, have your say about University issues and receive the latest information about events, you can like the PGSA Facebook page: www.facebook.com/pgsa.uoa.

Alumni Relations

Everyone who graduates from the University of Auckland becomes part of our community of more than 180,000 alumni in New Zealand and around the world. The Alumni Relations team keeps you connected with your fellow graduates and the University community through events and reunions, international alumni networks and social media.

There are many benefits and services available to our alumni. Visit the alumni and friends website at www.alumni.auckland.ac.nz or email alumni@auckland.ac.nz to find out more.

Doctoral Skills Programme

The Doctoral Skills Programme offers a variety of workshops to support and assist doctoral candidates in two ways: to help further develop the academic and professional skills needed to complete a doctorate successfully and in a timely manner; and to help with career planning and professional development.

All doctoral candidates are required to attend an Induction Day and complete a development needs analysis with their supervisor. Doctoral candidates can then choose to attend workshops from any of the following strands:

- Academic integrity
- Academic writing
- Digital scholarship and IT skills
- Literature review
- Personal and professional development
- Presenting your research

11,911 

postgraduates form a community of like-minded scholars pursuing their passion for learning.

Learning support

Libraries and Learning Services

Libraries and Learning Services provide resources, workshops and advice to help you successfully complete your study.

From the Libraries and Learning Services website you can access diverse collections of electronic resources, including databases, e-journals and e-books. Your University username and password allows you to access the electronic resources anytime, anywhere. Within the libraries you can access large collections of print, multimedia and microtext materials, including unique manuscript and archive collections.

Workshops on a variety of topics are offered at key times throughout the year. Topics include finding articles, time management, reading effectively, critical thinking and reference management. Online resources to support masters research and thesis writing are also available.

Subject Librarians offer research consultations to help you identify appropriate information sources, create search strategies and help you to stay current with research.

Libraries and Information Commons (IC) facilities also provide more than 4,000 study spaces, many with computers and access to printers, scanners and photocopiers. IC Helpdesks provide support for student computing resources and services including username and password, student email, internet access, the wireless network and student file storage.

www.library.auckland.ac.nz

Study space

In addition to the plentiful general study spaces, the postgraduate students' commons has a quiet study/meeting space reserved for postgraduate students. Many faculties, schools and departments also offer dedicated postgraduate workstations or research facilities – for example, the Arts Graduate Study Centre provides computers and study space specifically for postgraduate students in Arts. Check your faculty website for details, or request more information from the postgraduate adviser in your department.

Māori and Pacific student support

The University is committed to being safe, inclusive and equitable. We welcome and support Māori and Pacific participation and achievement in all aspects of University life.

Waipapa Marae (City Campus) and Te Aka Matua o Te Pou Hawaiki (Epsom Campus) provide a home away from home for our Māori students and their whānau.

Our Fale Pasifika is the centre of the University's Pacific community. It houses the Centre for Pacific Studies, and provides a space for discussion and support.

The Equity Office's Kaiārahi and Pacific Equity Adviser can provide advice and guidance to help ensure our Māori and Pacific students succeed here.

All our faculties offer Tuākana, a learning community enhancing the academic success of Māori and Pacific students through academic mentoring and workshops, and pastoral support.

www.auckland.ac.nz/tuakana

Te Fale Pouāwhina (TFP) is a programme co-ordinated by Māori and Pacific Learning Advisers. TFP provides a friendly and professional service that encourages Māori and Pacific scholars to thrive. Learning advisers assist students through wānanga, workshops, study groups and advisory sessions.

www.library.auckland.ac.nz/tfp

Postgraduate Hui/Fonotoga

The Equity Office hosts networking events for Māori and Pacific postgraduate students throughout the academic year. For more information email Naomi Fuamatu, Student Equity Adviser: n.fuamatu@auckland.ac.nz

www.auckland.ac.nz/maoristudents
www.auckland.ac.nz/pacificstudents
www.equity.auckland.ac.nz

Personal support

Students with disabilities

Student Disability Services provides support for students with a wide range of impairments, both visible and invisible. Our services include advocacy, assistance with access, dedicated study spaces and lab support, as well as special accommodations for tests and exams. Contact us early so we can confidentially assist you with your support requirements.

www.disability.auckland.ac.nz

Support for student equity groups

'Equity' means fairness. The Equity Office leads the University's commitment to ensuring everyone who has the potential to succeed at our University can do so. We have a range of initiatives, resources and support for our students and their whānau and families. Check out the websites below or visit

www.equity.auckland.ac.nz

International student support

The University provides a comprehensive range of support services for international students to help make your transition to life in Auckland as smooth as possible. This includes learning and academic support, English language support and personal support (see pg. 44-45).

www.international.auckland.ac.nz

Students who are parents

Accommodation

The University offers a limited range of one, two and three-bedroom apartments to postgraduate students with young families (see pg. 42).

www.accommodation.ac.nz

Childcare

The University Early Childhood Centres offer assistance with juggling childcare and study. All of our centres follow the New Zealand early childhood curriculum, Te Whāriki.

There are six on-campus early childhood centres providing care for children of our students on the City, Grafton and Epsom Campuses. Bookings are essential as there can be a waiting list at each centre.

Phone: +64 9 923 9714

www.auckland.ac.nz/childcare

Two of the centres are Māori medium centres: Hineteiwaiwa Kohanga Reo on the City Campus and Te Puna Kōhungahunga on the Epsom Campus. For further information about these centres, please contact: +64 9 623 8837.

Parent Space and breastfeeding facilities

Parent Space (available at Tāmaki and City Campuses) offers facilities for students with children under 16, including study space, computers and WiFi, a high chair and port-a-cot, toys and books, and a place for you to relax. Breastfeeding facilities are available on all of our campuses.

www.auckland.ac.nz/parentingsupport

Health and counselling service

Your health and wellbeing is key to your success while you're studying. Our health and counselling service has practitioners who specialise in student needs, offering you quality advice, support and care. Our main centre is at the Information Commons on the City Campus. Clinics are also open throughout semester on the Epsom, Grafton and Tai Tokerau campuses. Students who register the service as their primary health organisation are eligible for discounted healthcare.

www.auckland.ac.nz/healthandcounselling

AUSA Advocacy

AUSA Advocacy is a professional service that provides advice to students with a range of academic, administrative and welfare related issues. All students can access this free, confidential service, which is completely independent from the University.

We provide advice about your rights and responsibilities within the University, in a respectful, non-judgmental and timely manner. Our services include advocacy, support, assistance, information and referrals on any issues that may affect your ability to meet your academic goals. We aim to empower you to negotiate University policy and grievance procedures and to develop an environment where the privacy, dignity and respect of all parties are maintained.

AUSA Advocacy

Rooms G15 or G09, Old Choral Hall, City Campus

Recreation and entertainment

Cafés and bars

Whether you're lunching with friends or just grabbing a snack, there's an outlet on campus to suit your needs. Our wide range of retailers and vending machines ensure you don't need to travel far, giving you time to enjoy the vibrant campus culture. A variety of food trucks frequently visit the City and Epsom Campuses during semester.

www.auckland.ac.nz/foodandretail

Strata, the postgraduate area on the fourth floor of the Kate Edger Information Commons, features a postgraduate lounge – a large, quiet study area – and a licensed café with a balcony that overlooks the City Campus. The PGSA hosts a number of postgraduate functions throughout the year on and off-campus.

Doctoral students are welcome to join the Staff Common Room (SCR) Club at Old Government House on the City Campus. Primarily a social club, the SCR operates a café and bar, and organises social functions for its members. To join, email t.biggs@auckland.ac.nz.

Clubs

There are more than 200 student clubs and societies, ranging from cultural organisations to academic interest groups and clubs for hiking, skiing, art, fitness and yoga. Attend the Clubs Expo at the start of semester to meet the current club members and find out more.

www.auckland.ac.nz/clubs

Sport and recreation

Play sport, get fit and have fun, whether it's by using our gym facilities, taking part in one of our Group Fitness classes or signing up for a sport. Our Sport and Recreation Centre offers a well-equipped gym with weights and cardio machines, sports hall and squash court, as well as a number of Group Fitness classes you can join. The professional Sport and Recreation staff can talk you through the many options to get involved, as well as offering personalised advice on health, fitness and general well-being to ensure an active body and mind.

You can choose to represent your faculty in one of twelve sports in the Interfaculty Sports Championship, or get some friends together and sign up for one of the UNIM8S Social Sports Leagues. If you are playing a sport at a high level, there are opportunities to represent the University in tertiary sports. There are also some 30 student-run university sports clubs that you can join if you want to continue a sport or try something new or are looking to make new friends.

You can hire equipment for swingball, gutterboard, Viking chess and more to bring informal activities to your faculty. See our website for more information.

www.universitysport.auckland.ac.nz

Music and culture

You can often enjoy free musical events in the City Campus Quad. 95bFM broadcasts from the City Campus, providing news, views, music, gig guides and an accommodation guide. Visit www.95bfm.com for live streaming or to volunteer.

Visit the Gus Fisher Gallery to see work by established New Zealand and international artists or try the George Fraser Gallery for a taste of the talent at Elam School of Fine Arts.

Drama students frequently present productions in our Drama Studio.

Details of music concerts, dance performances and art exhibitions produced by the Faculty of Creative Arts and Industries can be found at www.creative.auckland.ac.nz, where you can sign up to receive regular updates.

What's On is your online hub for events at the University. Join the What's On events email list or like the What's On Facebook page to keep up-to-date with what's happening on campus.

www.auckland.ac.nz/whatson
www.facebook.com/uoawhatson

UniGuides

As a new student at the University of Auckland it can be challenging to meet new friends, learn about campus resources and services or find out where classes are located. The UniGuide Programme is a free service designed to help make your first semester easier, by connecting you with a student mentor who can show you the ropes. You will meet your UniGuide at your Faculty Orientation Day.

www.auckland.ac.nz/uniguide

Finding accommodation

As a postgraduate student, you need a living environment that allows you to focus on your studies, while enjoying all the social and recreational opportunities that the University and city of Auckland have to offer.

University-managed accommodation

Furnished, self-catered options

All of our residences offer the opportunity to meet and make new friends with other students from New Zealand and around the world. In residences that house both postgraduate and undergraduate students, postgraduate students are housed close together so that they can form their own community.

55 Symonds

Opened in 2017, 55 Symonds is the University's newest purpose-built student accommodation. These modern, air-conditioned studio deluxe and studio deluxe double apartments are suitable for both singles and couples. As well as the amenities offered in your studio, shared facilities include a large communal kitchen and dining area opening onto a spacious courtyard, TV room, lounge and additional study areas.

Carlaw Park Student Village

Located in Parnell, Carlaw Park is only a 5-minute walk from the City Campus and accommodates 697 students in a combination of two, three and four bedroom apartments spread throughout seven buildings. The two bedroom apartments and one three-bedroom apartment are exclusively designated for students with young families. Each building has direct access to shared common areas, including a large study room, games room, large outdoor area and laundry facilities.

Grafton Student Flats

Grafton Student Flats offers single and twin-share accommodation, and a limited number of studios, to 55 postgraduate and undergraduate students. Grafton Student Flats are located on the Grafton Campus and are a 15-minute walk to the City Campus.

UniLodge Anzac Beach

Located only a 5-minute walk from the City Campus, UniLodge Anzac Beach provides an independent-living environment in self-catered studio, studio deluxe, or one or two bedroom apartments. There are a number of recreation facilities for you to enjoy, including a swimming pool, sun deck, BBQ area, games room, theatre and gymnasium. UniLodge Anzac Beach is not suitable for families.

UniLodge Whitaker

UniLodge Whitaker is a high-rise apartment complex just a short walk from the City Campus. This residence offers 270 studio apartments and 30 deluxe studio apartments, each with their own en suite bathrooms and kitchenette facilities. Residents also enjoy modern shared facilities including a large communal kitchen, lounge with Sky TV, study room, games room and small onsite gym.

Waikohanga House

Located at 44 Symonds Street, just a 5-minute walk from the City Campus, this beautifully refurbished building is the University's newest accommodation for couples and families. Waikohanga House offers fully-furnished one, two and three bedroom apartments. Residents have access to onsite laundry and printing facilities.

How to apply

You can apply online for a place in a University-managed residence for 2019 from 1 August 2018 at www.accommodation.ac.nz

Accommodation for couples and families

We provide a range of accommodation for couples and families. Demand is high for this accommodation and availability is limited, especially if you are applying outside of Semester One. If you are applying in Semester Two or between February and November, we recommend you contact our Accommodation team for assistance in finding accommodation that best fits your needs.

 PG = postgraduates.

Private accommodation

Apart from our University-managed student accommodation facilities, there is a range of apartments and flats around Auckland. The University is located close to the city's central business district and is served well by public transport from all areas.

If you are interested in seeking accommodation outside of the University residences, our Accommodation Solutions team can assist you with comprehensive information about renting in Auckland, including rental agents, useful websites, tenancy requirements, bus timetables, maps, school information and more.

Private accommodation can be difficult to find during January and February, with large numbers of students looking for accommodation. We suggest that you start your search early to secure accommodation.

Please note that we do not inspect or guarantee the quality or availability of private accommodation.

Renting

If you rent a house or a flat in a nearby suburb you will need to sign a tenancy agreement with the landlord. City flats or apartments are generally furnished, while those in nearby suburbs are often unfurnished, although a stove and oven will be provided.

Homestays

In a homestay you live in a New Zealand family home where you will have a fully-furnished room. Your host will provide breakfast and dinner each weekday and three meals each day during the weekends. Note that most homestays are not usually located within walking distance of the University campuses and may be a bus ride away. We use a homestay agency for placements.

Flatting

Share a house or flat with other students. You are responsible for paying the rent, electricity, gas, insurance, water, garden maintenance and phone charges, according to the details in your tenancy agreement. You will need to provide basic furniture such as a bed and a desk.

We hold regular speed flatting events during February–early March, where you can meet other students looking for shared accommodation in a safe and fun environment.

Arriving from abroad

The University of Auckland warmly welcomes students from all over the world. Studying with us offers you a wonderful opportunity to gain an internationally recognised qualification in a stimulating environment. Our diverse student population includes over 7,000 international students from more than 120 countries, so you'll be part of a genuinely global academic community.

Why study in New Zealand?

- As a safe and politically stable country with a high standard of living, New Zealand is an ideal place to enjoy your postgraduate study.
- New Zealand enjoys a global reputation for technical innovation supported by its world-class education system and reputation for research excellence.
- Education in New Zealand is not just about imparting knowledge, but also about generating new ideas and fostering independent thinking.
- Studying at the University of Auckland, New Zealand's leading university,* will equip you for the global marketplace with an internationally recognised qualification.

*www.worldranked.ac.nz

Domestic fees for PhDs

Under a New Zealand Government scheme, new international PhD students who reside in New Zealand during their doctoral study will pay the same annual tuition fees as New Zealand students (NZ\$6,970; US\$5,088** per annum in 2018). Including compulsory health insurance for international students (NZ\$620, see pg. 41) and the Student Services fee (NZ\$814) the total fee in 2018 was NZ\$8,404 (US\$6,135** per annum).

**Exchange rate as at 31 January 2018:
NZ\$1 = US\$0.73.

Benefits of studying for a PhD in New Zealand

- Your dependent children will be classified as domestic students in New Zealand primary and secondary schools.
- Your spouse or partner will be able to apply for an open work visa valid for the duration of your course of study.
- On completion of your PhD, you can apply for a one-year Post-study work visa (open) through Immigration New Zealand.
- If you are able to find a suitable job in your chosen field, you can apply for a two-year Post-study work visa (employer assisted).
- During that two-year work visa period, you are eligible to apply for permanent residency under the skilled migrant category, provided that you meet the points requirement set out by Immigration New Zealand.

www.immigration.govt.nz

Support for international students

As an international postgraduate student, you will have access to the extensive support services the University of Auckland offers to all its students. There are also specialist international student support services to help you adjust to life in New Zealand and enjoy your studies at the University.

International Orientation

The International Office arranges an Orientation programme at the beginning of Semester One and Two for new international students. It is designed to give you all the information you need about the University and living in Auckland. In addition, the University puts on a number of social, sporting and cultural activities that provide great opportunities to make new friends. The Business School also provides an Orientation for its coursework masters students in Quarters Two and Four.

When you arrive, you can sign up for a Uniguide – a current student who can answer your questions and help you find your way around campus during your first few weeks.

www.auckland.ac.nz/is-orientation

Pastoral care for international students

Our international student advisers can help if you need to talk to someone about any difficulties. They offer a free, confidential service to help you sort out issues related to your studies, accommodation, health, budgeting, work, immigration or adjusting to life in New Zealand.

www.auckland.ac.nz/is-advisers

Scholarships

The University of Auckland administers scholarships that are open to international students wishing to pursue postgraduate study.

The International Office also works with external scholarship agencies and government bodies to provide opportunities for international students who meet entry requirements.

A selection of available scholarships is listed below. For a full list please visit our website.

Postgraduate scholarships for international students

University of Auckland International Student Scholarships
University of Auckland Doctoral Scholarships
New Zealand International Doctoral Research Scholarships
Agnes Paykel PhD Scholarships
Asian Development Bank – Japan Scholarships
AUEA Braithwaite-Thompson Graduate Research Awards
Dean's International Doctoral Scholarship (FMHS)
Education and Social Work Postgraduate International Student Scholarships
Faculty of Arts International Masters Degree Scholarships
Faculty of Creative Arts and Industries International Masters Scholarships
Faculty of Science Masters Awards
New Zealand Aid Programme scholarships
University of Auckland Fulbright Scholarships
University of Auckland Health Research Doctoral Scholarships
University of Auckland International Business Masters Scholarships
University of Auckland Law School's Dean's Doctoral Scholarships
University of Auckland Senior Health Research Doctoral Scholarships

For more information on scholarships available to international students, including selection criteria, application forms and closing dates, visit: www.auckland.ac.nz/is-scholarships

Guaranteed scholarships

The University offers guaranteed University of Auckland Doctoral Scholarships to new international PhD applicants who meet grade point average (GPA) thresholds in their qualifying programme from a New Zealand university.

For more information see www.auckland.ac.nz/makethegrade

English-language support

If English is not your first language, you will be required to provide proof of your English-language proficiency to be accepted for postgraduate study (see www.auckland.ac.nz/pg-english-reqs for more information about English-language requirements). The University provides plenty of support to help you further develop your academic English skills during your studies.

DELNA

DELNA (Diagnostic English Language Needs Assessment) is a free service that determines the level of English language support you will need to succeed in your studies.

www.delna.auckland.ac.nz

English Language Enrichment (ELE)

English Language Enrichment (ELE) provides opportunities for students to develop their academic communication skills through workshops and individual consultations. You can get advice about your English, join language learning groups and find language exchange partners through the Language Exchange programme (LEX).

ELE Online provides language learning materials, including vocabulary, grammar and pronunciation tools to help improve your academic English. Your student online access allows you to use these resources anytime, anywhere.

www.library.auckland.ac.nz/ele

Working while you study

If you are enrolled as a full-time student at the University of Auckland, you may be eligible to work during your programme of study.

For up-to-date information on work rights while on a student visa in New Zealand please visit:

www.immigration.govt.nz/study

Career Development and Employability Services (CDES)

Career Development and Employability Services (CDES) can help you build your preferred future.

Our team of career development consultants works closely with organisations and each faculty to create specialised programmes tailored to meet specific student career development needs. CDES also hosts events such as careers expos, networking opportunities and employer presentations to help you to meet and talk with potential employers.

Services are free for current students and graduates up to three years after graduation.

www.cdes.auckland.ac.nz

Before you arrive in New Zealand

Immigration

You must apply for a student visa to cover the period you intend to study in New Zealand. You must show evidence that you have been accepted into a programme, have paid your tuition fees and have sufficient funds to cover your costs while in New Zealand. You must apply for your visa before entering New Zealand.

Full details on rights to employment in New Zealand while studying are available through Immigration New Zealand, and can be viewed on its website at www.immigration.govt.nz/study

7,000
International students
bring perspectives from over 120
countries to our campuses.

“I have experienced a truly internationally diverse setting at the University. Moreover, New Zealand has remarkably welcoming and considerate people, which helped my wife and I settle in smoothly.”

Soheil is an international PhD candidate student from Iran. He is researching the measurement of visual function in humans, using eye movements.

“The University’s high ranking, and intelligent and considerate professors and students make it a desirable place to study. Having a University of Auckland Doctoral Scholarship has helped me to focus on my research during my PhD.

“Research has always been my passion and the practical aspects of research, which might improve the quality of human life, have always fascinated me.

“We are developing an efficient and entirely automated system for assessing visual function in humans, using an involuntary eye movement known as optokinetic nystagmus (OKN). This is done mainly using eye tracking devices and signal processing. This research could lead to development of objective optometry tests, which would be remarkably beneficial when an individual (such as a young child) cannot communicate during an optometry test.”

Soheil M Doustkouhi, PhD candidate in Optometry is a recipient of a University of Auckland Doctoral Scholarship.

How to apply

Honours, postgraduate certificate, postgraduate diploma and masters programmes

Before you apply

- Check the entry (www.auckland.ac.nz/pg-entry-requirements) and English-language (www.auckland.ac.nz/pg-english-reqs) requirements for your programme.
- Check the application closing date (pg. 48). We recommend you apply as early as possible. You don't need to wait to meet the requirements before applying – as long as you meet them before the programme begins.
- If you are applying for a 1-year masters with a research project, you will need to provide evidence that a member of academic staff has agreed to supervise you. See FindaThesis (www.findathesis.auckland.ac.nz), the research webpages for your area of interest or contact the postgraduate adviser for your programme/faculty for potential supervisor details.

Ready to apply?

New to the University of Auckland or a former student?

1. Apply for admission online:
www.apply.auckland.ac.nz

Current student?

1. Make an Add/Change programme request online:
www.apply.auckland.ac.nz

2. You will receive an acknowledgement email listing the supporting documents we require, and a Student ID number for logging on to your Application for Admission. You can check your application status online and see what supporting documents you will need to provide. Your application will be assessed once we receive sufficient information (such as uploaded transcripts, other academic results, references or a portfolio) or you have attended an interview.

2. We will assess your application and inform you of the outcome via email. The status will show on the 'Your applications' section of the Application for Admission.

3. Accept (or decline) your offer online at www.apply.auckland.ac.nz. If you have a conditional offer, you should accept your offer straight away. There is no need to wait to meet the conditions before accepting your offer. We encourage you to submit the required information to meet the conditions as soon as you are able.*

4. Enrol in your courses. The postgraduate enrolment process is faculty-specific. See www.auckland.ac.nz/pgenrolment

Applying for a Graduate School of Management programme

For information on how to apply to a Graduate School of Management programme, visit www.gsm.auckland.ac.nz

Need help applying?

Find answers to frequently asked questions:

www.askauckland.ac.nz

Email: postgradinfo@auckland.ac.nz

Phone: 0800 61 62 65

Find a postgraduate adviser:

www.auckland.ac.nz/pgadviser

*Conditional offers

Conditional offers are made when your place in a programme is subject to one or more conditions. For example, you may need to supply final results or complete a prerequisite course.

When you receive a conditional offer:

1. Accept (or decline) the offer.
2. Meet the conditions.
3. Submit evidence that you have met the conditions.

PhD or named doctorate

Before you apply

- Read the academic entry requirements: www.auckland.ac.nz/doctoral-entry-requirements
- Decide on, and clarify as much as possible, your potential research topic or area of research. Look at the faculty or department websites relevant to your topic, and consider the research interests and publications of academic staff.
- Check the English-language requirements for your programme: www.auckland.ac.nz/pg-english-reqs
- If you are applying for the Doctor of Clinical Psychology or Doctor of Education, check the application closing date (pg. 48). Applications for all other doctoral programmes may be submitted at any time of the year.
- Have electronic copies of the following ready:
 - Relevant academic transcripts
 - Statement of Research Intent
 - If English is not your first language, any approved English language test scores from the last two years
 - CV or résumé

You may be subsequently asked to supply your research dissertation/thesis from your qualifying degree and/or relevant refereed publications.

- Arrange for two referees to support your doctoral application. Doctoral referee reports must be submitted directly from your referees.

For Statement of Research Intent and Doctoral Referee Reports forms see www.auckland.ac.nz/applydoctorate

Ready to apply?

1. Apply for admission online: www.apply.auckland.ac.nz

2. You will receive an acknowledgement email listing the supporting documents we require, and a Student ID number for logging onto your Application for Admission. You can check your application status online and see what supporting documents you will need to provide. Assessment of your doctoral application can take eight weeks or longer.

3. When a decision is made, the status will show on the 'Your applications' section of your Application for Admission and we will inform you of the outcome via email. If you indicate in your application that you would like to be considered for a University of Auckland Doctoral Scholarship, you will be informed of the outcome in the same email.

4. Accept (or decline) the offer online.

5. When you accept an offer of place, you are admitted to your programme. We will acknowledge your acceptance by email with information on how to enrol. Domestic applicants have 3 months to enrol; international applicants have 6 months to enrol.

International applicants

Follow the guidelines on pages 46–47.

Read the entry requirements for non-doctoral programmes for international applications: www.auckland.ac.nz/is-pg-entry-requirements

We recommend you apply as early as possible to allow sufficient time to apply for visas.

We have a number of official agents and overseas representatives who can help you with the application process in person: see www.auckland.ac.nz/overseasrep

Dates to remember

Application closing dates

Please make careful note of the application closing dates listed below. Applications submitted after the closing date will be considered if places are available. If you wish to apply to begin your study in Semester Two 2019, you should check with your faculty to see if there are specific closing dates for the programme you wish to study.

Doctoral applications (excluding DCLinPsy and EdD) may be submitted at any time of the year.

Applications to Law postgraduate programmes may be submitted at any time of the year.

Closing dates for applications for admission in 2019¹	
Semester One admission	
Master of Audiology Master of Health Sciences in Nutrition and Dietetics Master of Speech Language Therapy Practice	1 October 2018
Bachelor of Medical Science (Honours) Bachelor of Science (Honours) in Clinical Psychology ² Graduate Diploma in Teaching (Early Childhood Education/Primary/Secondary) Postgraduate Diploma in Applied Psychology Postgraduate Diploma in Clinical Psychology Postgraduate Diploma in Counselling Theory Postgraduate Diploma in Forensic Science Postgraduate Diploma in Health Psychology Postgraduate Diploma in Science in Speech Science ² Master of Counselling Master of Science in Forensic Science Doctor of Clinical Psychology	1 November 2018
Bachelor of Arts (Honours) in Psychology ³ Bachelor of Science (Honours) in Psychology ³ Postgraduate Diploma in Arts in Psychology Postgraduate Diploma in Science in Psychology Master of Arts in Psychology Master of Health Psychology	1 December 2018
Postgraduate programmes not otherwise specified⁴	8 December 2018
Postgraduate Diploma in Counselling Theory Master of Counselling	22 January 2019
Master of Science in Psychology	8 February 2019
Semester Two admission	
Master of Creative Writing	1 April 2019
Doctor of Education	31 May 2019
Postgraduate programmes not otherwise specified⁴	4 July 2019
Late Year (December) research masters admission	
Research masters ⁵	Check with faculty

1. Dates to be confirmed.

2. This programme will be offered in 2019 subject to approval.

3. The corresponding date for this programme applies to students applying for the Clinical Psychology specialisation only. All other students should contact the School of Psychology for application admission dates.

4. Subject to places being available. Check with your faculty to see if there are specific closing dates for the programme you wish to study.

5. December start is available for some 120-point research masters, subject to supervisor availability. Please check with your faculty for further information.

Information for international students

The Education (Pastoral Care of International Students) Code of Practice:

The University of Auckland has agreed to observe and be bound by the *Education (Pastoral Care of International Students) Code of Practice*.

www.nzqa.govt.nz/the-code

Immigration: To complete enrolment, students must have a current valid visa that permits them to study at the University of Auckland.

Full details of visa requirements, advice on rights to employment in New Zealand while studying, and reporting requirements are available through the New Zealand Immigration Service, and can be viewed on their website at www.immigration.govt.nz/study

Eligibility for health services

Most international students are not entitled to publicly funded health services while in New Zealand.

If you receive medical treatment during your visit, you may be liable for the full costs of that treatment. Full details on entitlements to publicly funded health services are available through the Ministry of Health and can be viewed on their website at www.health.govt.nz

Medical and travel insurance

All international students are legally required to have appropriate health and travel insurance. The University of Auckland's recommended policy is Studentsafe Inbound University, a scheme that meets New Zealand government requirements. When you enrol you will automatically be covered by Studentsafe Inbound University and the insurance premium will be added to your student account. You will receive details with your offer of admission letter from the University.

www.auckland.ac.nz/is-insurance

Costs

All costs are shown in New Zealand dollars and are expressed inclusive of New Zealand Goods and Services Tax if applicable.

Privacy

The University of Auckland undertakes to collect, store, use and disclose your information in accordance with the provisions of the Privacy Act 1993. Further details of how the University handles your information are set out in a brochure available from the AskAuckland Central student information centre or by phoning 0800 61 62 63.

Disclaimer

Although every reasonable effort is made to ensure accuracy, the information in this document is provided as a general guide for students and is subject to alteration. All students enrolling at the University of Auckland must consult its official document, the current *Calendar of the University of Auckland*, to ensure that they are aware of and comply with all regulations, requirements and policies.

Glossary

This is a quick guide to common University of Auckland terms used in this prospectus. These are not intended to be legal definitions; refer to the University Calendar when interpreting these terms: www.calendar.auckland.ac.nz

Application for Admission

The first step in the application process is to apply for admission to the University and your postgraduate programme:

www.apply.auckland.ac.nz

Course

The basic component of your programme of study. Courses are normally taught and assessed over one semester or two consecutive

semesters in the same academic year. A course is sometimes referred to as a "paper" at other universities.

Enrolment

Once you have applied and been admitted to the University and your programme, you will need to enrol in the courses that will make up your programme of study (see pg. 46).

Faculty

There are eight faculties at the University: each offers and administers programmes within their discipline or group of disciplines. In addition, you can undertake postgraduate programmes at one of our large-scale research institutes:

Auckland Bioengineering Institute and Liggins Institute.

Programme

A programme is a prescribed set of one or more courses or other work (such as a thesis). A certificate, diploma or degree is awarded on the successful completion of the programme.

University of Auckland Calendar

You will find regulations and requirements for all of our postgraduate programmes in the University Calendar, available in print and online: www.calendar.auckland.ac.nz

Find out more

There are a number of online and printed resources to help with your decision making. Our advisers are here to provide guidance and there are a number of opportunities to visit us on campus (see pg. 5).

Postgraduate newsletter

Sign up for the postgraduate newsletter, *Explore*, for the latest on postgraduate study at the University of Auckland.
