# Foreword from Our Rector

---

Universitas Airlangga (UNAIR) has always been committed to making efforts and playing a more prominent role in the world. All members of its academic community are striving towards quality improvements. Various institutional policies are made to encourage academics to have greater goals and make major contributions to the world's civilization.

The result of those efforts and policies can be seen from the extensive network of international partnerships. Universitas Airlangga has collaborated with hundreds of institutions from various regions of the world. The university continues to conduct various collaborative programs such as joint researches and exchange programs for students, faculty members and administrative staffs. UNAIR is a growing global community with more international engagements.

As one of the best Indonesian universities, Universitas Airlangga has a great responsibility to take a more significant role in global development. This responsibility is shown from the efforts to enhance the quality of education towards global standards, to improve the research and innovation performance, and to conduct community service to the broader community.

Our university is also committed to giving students opportunities to gain the latest global insights as well as to preserve the local wisdom and values of Indonesia. We believe the locals' hospitality, values and heritages make this nation unique. They can be essential points to achieve global success.

Our goal to be among Top 500 World Class Universities will push us to accelerate even faster in various fields of study. Hopefully, this 2020 Prospectus can showcase our achievements and determination to excel even more at global level.

# Campus Experience

Comfortable

Refreshing

Universitas Airlangga grows together in synergy with other top Indonesian universities to create a positive academic climate in its campuses.

Universitas Airlangga is situated near the public facilities such as sports centers, shopping centers, hospitals, police stations, markets and other public spots which greatly support the educational process.

The main campuses are located near the city center, but UNAIR always pays attention to greenery, as Surabaya – the vibrant city where UNAIR is based – shows greater concern on public parks and cleanliness. It creates a comfortable and refreshing atmosphere for the students during their studies.

Despite living in a modern and advanced city, students of Universitas Airlangga always uphold humanistic values and live in harmony in the surrounding communities. The students also make positive contributions to the communities.

For its contribution to the world, Universitas Airlangga continues to make efforts and take a more significant role in global civilization's development. They are conducted through international researches, teaching sessions and community services.

All of those efforts are from the spirit and values from its motto, **Excellence with Morality**. It acts as the foundation for every element of the academic community in Universitas Airlangga to achieve the just and civilized global society.

# Surabaya, Diversity in Modernity

Surabaya, a major port city, has become the second-biggest metropolis in Indonesia. As a historic city taking important role of Indonesian civilization, Surabaya has been home for various religions, ethnicities and communities.

Once called Ujung Galuh, Surabaya was a major trading port city located at the estuary of Brantas River, by the Java Sea and Madura Strait. It had witnessed civilization in the Age of Kingdoms, Colonial Era and the Independence Era.

Surabaya has developed into a friendly and modern city. As one of the higher education institutions established in Surabaya, Universitas Airlangga has taken a more significant role to develop the city and inspire the world. It has also made contributions in various fields, including health, economic, social, political, and cultural fields.

The city has made various achievements and drawn the world's attention. The success of Surabaya's management has inspired other cities in different parts of the world as it has been a modern and friendly home for a global community.

As a hub city of tourism, Surabaya also has interesting tourist destinations in different parts of the city. Submarine Museum, House of Sampoerna, Cheng Hoo Mosque, Surabaya Zoo, Surabaya Night Carnival are amusing spots to visit around the city before heading to natural attractions outside the city.

Furthermore, tourists may enjoy diverse choices of culinary delights in restaurants, diners or street vendors. There are plenty of spicy traditional and local dishes to try, from rawon, rujak cingur, to tahu campur.

# Indonesia, Pieces of Paradise on the Equator

Lying along the equator, Indonesia is blessed with vast seas and beautiful islands. It is the largest archipelagic country in the world, made up of more than 17 thousand islands lying along the equator from Sabang to Merauke. The groups of islands have a stunning view that it could be deemed as pieces of paradise on the equator.

Bali, Bromo, Lombok, Raja Ampat, Lake Toba, Dieng, the Land of Toraja are only a few spots of Indonesian natural wonders. A rich cultural heritage that reflects Indonesia's dynamic history and ethnic diversity also complements the beauty of a country with one of the longest coastlines in the world.

Not only natural beauties, but Indonesia also has great cultural wealth from hundreds of distinct native ethnic and linguistic groups, with different religions and traditions. "Bhinneka Tunggal Ika" which means "Unity in Diversity", is the value upheld by Indonesians. More than 260 million people have lived in harmony and peace showing high tolerance amidst the diversity.

Furthermore, Indonesia lies in a strategic location, between Asia and Australia as well as between the Indian Ocean and the Pacific Ocean. Its archipelago has been an important region for trade since the 7th century, and its history has been influenced by various civilizations of the world.

Its tropical climate makes Indonesia popular among tourists all year round. However, to get the most of Indonesia, the right time to visit is during the dry season from April to October. It offers various natural and cultural attractions. The former can be seen from beautiful beaches, lakes, mountains, valleys and rainforests lie from Sabang to Merauke.

In this regard, Universitas Airlangga as one of the best universities in Indonesia is committed to building civilization. The university also has thorough concerns in realizing the just and civilized Indonesia.

# Faculty of Medicine

Faculty of Medicine (FK) is the oldest faculty in Universitas Airlangga. It was established in 1913, during the Dutch East Indies Colonialism, long before the Independence of Indonesia.

With its historical achievements, it is only relevant if FK UNAIR becomes the focal point and driving force of the university's development and the development of medical studies in Indonesia.

Faculty of Medicine (FK) UNAIR has given a significant contribution to the country. Reliable doctors are produced by the faculty to serve the community. Not only at national level, but they have also shown excellent performance at international level, including in the education and research field. Furthermore, new discoveries in the realm of medicine are also introduced by the academic community.

There are two community laboratories provided to support the fieldwork practice. The laboratories are facilities to support the academic activities of Occupational Health and Safety, Epidemiology, and Environmental Health students. The faculty also provides Audio Visual Aid (AVA) lab, Nutrition lab and computer labs. FKM UNAIR is one of the pioneers of public health education in Indonesia. The graduates have made contribution to society, either in government agencies or private companies. Some of them also continue their education or work abroad. It means alumni of FKM are quite competitive to compete at international level.

To meet the demands of times and to get global recognition, international accreditation is a must. After going through a validation process for a year-long, FKM UNAIR became the first university in South East Asia which has gained international accreditation from APEA (Agency for Public Health Education Accreditation (APHEA). For that achievement, FKM UNAIR makes more significant efforts to establish international collaborations, especially in transfer, exchange programs, joint research and publications.

### Public Health Fact

Was born from the Public Health Education Program in Faculty of Medicine.

Some facilities are supporting the learning process and improving science, such as Applied Psychology Units which were established to serve the communities and to give opportunities to learn in a more practical way. The units are Laboratory of Study and Development of Applied Psychology (LP3T), Center for Applied Educational Psychology (PTPP), Psychological Service Unit, Anak Ceria Early Education Center, and Center for Crisis and Community Development.

Universitas Airlangga has established international collaboration with School of Psychology, Faculty of Health, Queensland University of Technology (QUT) in conducting international class 2 + 2 Articulation Program or known as a double degree program. The 2 + 2 articulation program in Psychology is a joint implementation of double degree education where the first 2 (two) years of study is at Universitas Airlangga and the next 2 (two) years of study is at QUT that will result in a Bachelor of Psychology and Bachelor of Behavioral Science (Psychology). The program will be conducted in two universities, where the first two years of study is done at Faculty of Psychology Universitas Airlangga, Surabaya Indonesia, and the next two years will be implemented at the Kelvin Grove School of Psychology and Counseling Faculty of Health, QUT Australia.

Both educational programs have the same study component, but each has a different distinctive perspective of Psychology disciplines. The Faculty of Psychology Universitas Airlangga studied Psychology in general, especially in 4 areas of interest, Clinical and Mental Health, Development and Education, Industry and Organization, and Social and Personality. The School of Psychology and Counseling Faculty of Health QUT, on the other hand, focuses on the study of Counseling Psychology, especially the application in the field of health.

## Psychology Fact

In 1983, psychology was established in Faculty of Social and Political Sciences.

Programs

To support the education, the faculty provides extensive facilities such as a laboratory for basic human needs, nursing communication laboratory, and children and maternity nursing laboratory with a waiting room, patient reception desk, nurses room, acute patient nursing room and emergency set, inpatient room, patient isolation room, patient and family consultation room, patient dining room, family group counseling room, group therapy room (audiovisual, play, entertainment, reading, singing), playroom / playground, family consultation room, therapy room and educational game set and a study.

## Programs

### **Bachelor's Degree:**

Nursing (A)

### **Master's Degree:**

Nursing (A)

### **Doctoral Degree:**

Nursing

### **Professional Degree:**

Nursing (A)

\*(Accreditation by National Accreditation Agency for Higher Education)

FKP UNAIR is one of the faculties that gained Asean University Network (AUN) Quality Assurance (QA) accreditation. Furthermore, to support UNAIR towards Word Class University (WCU), the faculty has established several international collaborations with Malaysia, Japan, New Zealand, Australia, and other countries.

### **Nursing Fact**

The establishment of Nursing Program was a joint effort of Department of Education and Culture with Department of Health.

# Faculty of Fisheries and Marine

Faculty of Fisheries and Marine (FPK) is one of the newest faculties at UNAIR, which was established in 2008. The establishment of this faculty aims to improve the quality of graduates in their field. Thus, graduates can develop science and technology in the field of fisheries and marine. FPK also aims to produce innovative research in encouraging the development of science and technology both on a national and even international scale.

## Programs

### **Bachelor's Degree:**

Aquaculture (A)  
Aquaculture (PSDKU Banyuwangi) (B)  
Fishery Product Technology (B)

### **Master's Degree:**

Fishery and Marine Biotechnology (A)  
Fisheries Science

\*(Accreditation by National Accreditation Agency for Higher Education)

FPK has many experts in their fields, and one of them is a professor of fish pathology, Hari Suprpto. He conducts a lot of research in the field of fish diseases and aquatic biota. There is also a professor of aquaculture, Mohammad Amin Alamsjah, who has many ideas to accelerate marine biotechnology in seaweed production sector. There is also an expert on animal nutrition, Mirni Lamid, who applies appropriate technology through enzymatic engineering of animal feed.

It is one of the faculties that received Asean University Network (AUN) Quality Assurance (QA) accreditation. To support UNAIR internationalization programs, several international collaborations have been established with institutions from Malaysia, Japan, Australia, Ireland, Taiwan, Thailand and Brunei Darussalam. The collaborations include student and staff exchanges, research, professor visits, International Nursing Student Forum (ISF) and International Nursing Conference.

### **Fisheries and Marine Fact**

One of the young faculties in Unair. It was established in July 2008.

# Faculty of Vocational Studies

3

Departments

21

Programs

Faculty of Vocational Studies is the 14th or newest faculty of Universitas Airlangga. Some of the programs were managed by some faculties in UNAIR at first. However, by merging the management of applied education into one coordinating unit, Faculty of Vocational Studies is ready to be an independent, innovative, a leading faculty at national and international level.

To achieve the vision, there are three missions initiated by Faculty of Vocational Studies, including organizing and developing vocational education in the fields of health, technology, management and business able to compete at the national and international level, conducting innovative applied research based on national values and religious morality to support the development of education and community service, and devoting the expertise of health, technology, management and business to the community in national and international scale.

## Programs

### Three-year Diploma (D3):

Office Administration (B)  
Accounting (A)  
English (B)  
Physiotherapy (B)  
Tourism/Travel (A)  
Nursing  
Occupational Health and Safety (A)  
Marketing Management (A)  
Banking Management (A)  
Hospitality Management (A)  
Automation Instrumentation System (B)  
Veterinary Paramedics (A)

Traditional Healers (A)  
Taxation (A)  
Library (A)  
Information System (B)  
Dental Engineering (B)  
Medical Technology Laboratory (B)

### Four-year Diploma (D4):

Physiotherapy (B)  
Traditional Healers (B)  
Imaging Radiology Technology (B)

\*(Accreditation by National Accreditation Agency for Higher Education)

Even though it is the newest faculty, UNAIR Faculty of Vocational Studies has established international collaboration with institutions in Malaysia, Japan, Korea, the Netherlands, Thailand, Vietnam and Taiwan. The partnerships were established in collaborative academic programs, student exchanges, research and publications, and double degree programs with universities and institutions in China.

Faculty of Vocational Studies has some scientific experts such as the laser expert, Prof. Retna Apsari, who develops laser research for cancer therapy. There is also Prof. Widi Hidayat in the business field who conducts a lot of research in the area of organizational and financial auditing.

### Vocational Studies Fact

The 14th or newest faculty of Universitas Airlangga.

[psdku.unair.ac.id](http://psdku.unair.ac.id)

# PSDKU Banyuwangi

PSDKU or Off Main Campus Study Program is a part of Universitas Airlangga that provides bachelor's degree education in Banyuwangi. There are four bachelor's degree programs, Accounting, Veterinary Medicine, Public Health, Aquaculture. The organization of education off main campus was based on the decree of Minister of Education, and Cultural Affairs dated 24 July 2014 number 274/E/O/2014 about the permit for organizing programs of Universitas Airlangga in Banyuwangi.

The establishment of the program was also based on the request of Banyuwangi Regency government in the letter of General Directorate of Higher Education No. 276/E.E2/DT/2014 about the mandate of PSDKU UNAIR programs establishment in Banyuwangi. The national Education Minister Regulation (Permendiknas) Number 20 in 2011 on the establishment of higher education programs off main campus became the legality for PSDKU Banyuwangi's establishment.

4

Programs

There are two campuses of PSDKU UNAIR in Banyuwangi. The first one is at Jalan Wijaya Kusuma 113, Giri Sub-district, Banyuwangi, and the second one is at Jalan Ikan Wijinongko 18-A, Sobo, Banyuwangi Sub-district, Banyuwangi. Giri Campus is for Aquaculture and Veterinary Medicine programs, while Sobo Campus is for Public Health and Accounting programs.

We can use any means of transportation to reach PSDKU UNAIR in Banyuwangi. We can go to Banyuwangi by air through Blimbingsari Airport, Banyuwangi and by land we can use the bus or train. However, the train is preferable transportation to reach Giri Campus as the train railway station is nearby to the campus location. The campus location is close to Banyuwangi railway station. It is only four minutes away to get to the campus from the railway station. It takes 15 minutes to get to Sobo Campus from Giri Campus.

Even though PSDKU UNAIR in Banyuwangi is newly established, it has provided quality education in the south-east of East Java. It has given major supports for its region's potentials in animal husbandry and marine science through its programs. PSDKU UNAIR also educates public health and accounting practitioners in Banyuwangi through its curriculum.

Several student activities are focused on student development and economic potential of Banyuwangi community. Academics are involved in each program seminar and community service. These contributions are to improve the quality of human resources in Bayuwangi district, according to the original purpose of PSDKU UNAIR Banyuwangi campus.

The academic community of PSDKU Banyuwangi also pay great attention to research. It can be seen from numerous scientific paper submissions qualifying in Student Creativity Program. Most of them address the problems faced by the locals. It means the education organized in Banyuwangi is successful as it has shown excellent quality.

### **Bachelor's Degree Programs**

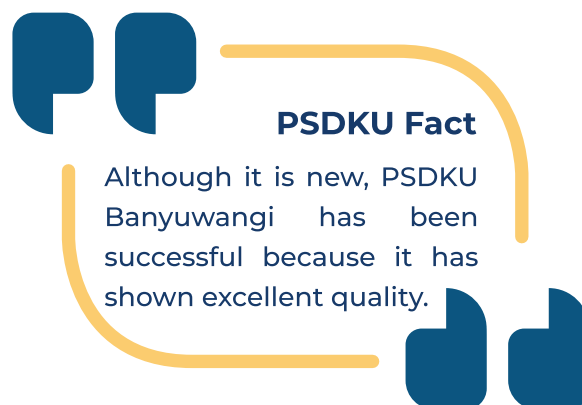

Accounting (B)

# Postgraduate School

Postgraduate School of Universitas Airlangga provides further studies of master's and doctoral degrees. The programs offered are multidisciplinary studies to answer problems existing in society. Postgraduate School of Universitas Airlangga currently has 11 programs, either master's or doctoral degrees. Postgraduate school alumni have acquired essential positions in the government or civilian sectors.

Postgraduate School of Universitas Airlangga only organizes multidisciplinary master's and doctoral programs while the interdisciplinary and monodisciplinary programs are managed by each faculty. This management model is based on Universitas Airlangga Rector's Decree Number 1947/H3/KR/2011 on The Scope of Programs, whether they are monodisciplinary, interdisciplinary or multidisciplinary.

Programs

Postgraduate school graduates excel at master and doctoral with a multidisciplinary perspective that can compete at national and international level. Furthermore, academics and experts of UNAIR Postgraduate school with various research and innovations are able to encourage students to create an academic atmosphere conducive to the development of intellect and professionalism.

## Programs

### Master's Degree:

Forensic Science (A)  
Immunology (B)  
Police Studies (B)  
Disaster Management (B)  
Human Resource Development (A)  
Legal and Development Science (A)

### Doctoral Degree:

Human Resource Development (A)

\*(Accreditation by National Accreditation Agency for Higher Education)

Postgraduate School Universitas Airlangga has Forensic Science program. It is the first in Indonesia. The Forensic Science program offers an education based on various professional backgrounds to improve the quality of human resources in a specific field of science and technology. This program has three focus of study: Forensic Chemistry, Forensic Physics and Forensic Biology.

### Postgraduate Fact

Has Forensic Science Program, first in Indonesia

# International Certified Programs

## ASEAN University Network ( AUN ) Quality Assurance

ASEAN University Network (AUN) is a network of leading higher education institutions in South East Asia to accelerate and develop the quality of higher education in the region. It was a result of 4th ASEAN Summit and established in November 1995. It is expected to hasten the solidarity and development of regional identity through the promotion of human resource development.

AUN currently has 30 member universities. From Indonesia, there are four state universities as members, Universitas Airlangga, Universitas Indonesia (UI), Universitas Gadjah Mada (UGM) and Bandung Institute of Technology (ITB).

AUN is tasked as a key implementing agency of ASEAN in the Socio-cultural portfolio. AUN conducts programmes and activities to encourage and promote higher education cooperation and development to enhance regional integration in achieving global standards.

AUN recognizes the importance of quality in higher education, and the need to develop the holistic quality assurance system to raise academic standards and enhance education, research, and services among its member universities. Therefore, AUN initiated AUN-QA (Quality Assurance) to support, enhance, and sustain the level of quality assurance practiced by the higher education institutions in ASEAN.

AUN-QA conducts a systematic, structured and continuous assessment in the member universities. It is a self-assessment by writing SAR (Self-Assessment Report). The papers' completeness then confirmed and Action for Improvement is formulated from the result of SAR. After that, reviewer team visit the university, to assess and review the self-assessment report.

For UNAIR, international certification through AUN-QA is an essential effort to develop its quality of education. Most of Universitas Airlangga's degree programs are encouraged to get international certifications such as AUN-QA. There will be continuous efforts made to increase the number of programs with international certification, not only in ASEAN region but also in greater scale. All those efforts are made to achieve quality of education that meets the global standards.

## AUN-QA Certified Programs at Universitas Airlangga

ASIIN (Accreditation Agency for Degree Programs in Engineering, Informatics/Computer Science, the Natural Sciences, and Mathematics) is a non-profit higher education accreditation organization from Germany acknowledged by international academic communities.

ASIIN offers accreditation for better education quality, or excellent institutional management system in the field of engineering, informatics or computer science, natural sciences and mathematics. In the accreditation process, the quality parameter is evaluated systemically, in an integrated manner.

ASIIN views “education” as a developmental and learning process to acquire various competencies and outcomes. The result of education should support the individual, social and professional success.

The German-based agency sets its objective internationally, to promote higher education quality and develop transparency. To achieve the objective, ASIIN provides its services to educational institutions and higher education systems through accreditations, certifications, evaluations, consults, and training on quality and organizational improvements with contributions from external practitioners in science and the industry.

Universitas Airlangga, through its Quality Assurance Board (BPM), always encourages UNAIR programs to aim for ASIIN accreditation. The effort came into fruition in April 2018 as five programs of UNAIR got ASIIN accreditation. They are programs in Pharmacy, Chemistry, Physics, Biology and Mathematics.

The determination to gain reputation as a university with international standards was shown from the increasing accreditation achievements. As of November 2019, there are eight bachelor's degree programs accredited by ASIIN.

## ASIIN Accredited Programs

- Pharmacy
- Chemistry
- Mathematics
- Physics
- Biology
- Dental Medicine
- Veterinary Medicine
- Aquaculture

ASIIN views “education” as a developmental and learning process to acquire various competencies and outcomes. The result of education should support the individual, social and professional success.

## ABEST 21

ABEST21 or The Alliance on Business Education and Scholarship for Tomorrow, a 21st-century organization, is based in Tokyo, Japan. It was founded in 2005 and recognized as an international business accreditation agency for business schools in the Asia-Pacific region. Its current members are 59 business schools from 18 different countries.

The mission of ABEST21 is to advance education in business schools on a global basis by encouraging mutual cooperation among its member institutions to face the challenges in 21st century. Some prominent Asian companies such as Toshiba, Sony, Toyota Motor, Panasonic, Fuji, Xerox, Nissan and Kodak are some of the partners of this accreditation agency.

This accreditation agency has a long history. In 1994, seven business schools from Japan and abroad joined together in a Global Classroom Conference, and the conference was reorganized as the Global Knowledge Network on June 28, 2002.

Global Knowledge Network considered it an urgent issue to develop a system to enhance the quality of management education at the business schools. With this idea in mind, on June 28, 2004, at the Hakone Conference, the establishment of network aiming at the enhancement of management education at member schools was discussed, and the preparation to establish THE ALLIANCE ON BUSINESS EDUCATION AND SCHOLARSHIP FOR TOMORROW, a 21st-century organization (ABEST21) was started. A year later, on July 1, 2005, assisted by 16 business schools from the world, the Network decided to establish ABEST21 as a mutual evaluation institution.

Universitas Airlangga also collaborates with ABEST21 to support its business education quality. It is important to get global recognition to achieve Top 500 World Universities in 2020. UNAIR program which has achieved ABEST21 international accreditation is Master's Program of Management.

This achievement shows UNAIR's strong commitment to internationalization. It is the key and access to improve quality of Indonesian human resources through higher education. The master's program got its membership, and it has been active in ABEST21 activities. Some other programs in Faculty of Economics and Business are encouraged to submit accreditation requests in order to achieve international standards.

### Program with ABEST21 Accreditation:

- Master of Management

The mission of ABEST21 is to advance education in business schools on a global basis by encouraging mutual cooperation among its member institutions to face the challenges in 21st century.

ASIC is one of the international accreditation institutions chosen by Universitas Airlangga to improve its educational quality

## ASIC

**ASIC stands for Accreditation Service for International Schools, Colleges, and Universities. It is an international accreditation institution based in the United Kingdom (UK) and organized by UK Home Office. ASIC has gained ISO 9001: 2015 accredited certification.**

ASIC is one of the international accreditation institutions chosen by Universitas Airlangga to improve its educational quality. ASIC has been acknowledged and affiliated with the world's prominent education organizations, such as CHEA International Quality Group in the USA, British Quality Foundation, ENQA, European Association for Quality Assurance in Higher Education, GUIDE Association, Global Universities in Distance Education, UN Academy Impact group, and The Association of International Education Administrators (AIEA).

ASIC carries out its mission to be a globally recognized authority on the accreditation of international universities, colleges, schools, training organizations and distance education providers, especially to assist institutions to be providers of quality higher education, respected worldwide. It has a long experience, three-decade experience, in international education. Therefore, it has gained unique insights on global education market.

Recently, Universitas Airlangga has gained ASIC accreditation for its programs. There are 14 accredited programs from social sciences, either bachelor's degree or master's degree programs.

### Programs with ASIC Accreditations

#### Bachelor's Degree Program:

- Anthropology
- Public Administration
- International Relations
- Information and Library Sciences
- Communication Science
- Political Sciences
- Sociology
- English

#### Master's Degree Programs:

- International Relations
- Political Sciences
- Media and Communications
- Public Policy
- Sociology

#### Doctoral Degree Program:

- Social Sciences

# International Programs and Partnerships

## Airlangga Global Engagement Programs

Through Airlangga Global Engagement (AGE), Universitas Airlangga continues to make innovations to attract interests of international students to join programs at UNAIR. Here are some of the programs offered by AGE:

### AMERTA (Academic Mobility Exchange for Undergraduate at Airlangga)

This program is designed to allow international undergraduate students to experience diverse culture of Indonesia for one or two semesters. It has been a regular program for five years. AMERTA opens registration in Spring (February-June) and Fall (August-December). More than 60 international students are participating this year. The students are from ASEAN, European and American countries. The participants of Amerta program get a living allowance for IDR 3 million for each quarter of the year. They are given freedom to choose four courses in one semester. They do not only learn in campus, but also from trips to various places to explore and learn the culture of Indonesia.

### CERIA (Community Empowerment Program at Airlangga)

This program is a community service program for international students. It is designed for students who are interested in gaining new knowledge into disadvantaged society in Indonesia. The program is organized for three weeks in June and July, but it is possible to be extended for the partner university's need and request.

### Airlangga Development Scholarship (ADS)

ADS is a scholarship provided by UNAIR for international postgraduate students. Various courses of Economics, Islamic Economics, Public Health, Medicine, Social and Political Science, Media, Literary and Cultural Studies are available. The courses are delivered in Indonesian, so the students learn Indonesian intensively for a year. It is also a program which introduces and promotes Indonesian language to international students.

### Airlangga Summer Program: AIRVENTURE (Airlangga Adventure)

This two week program is for undergraduate and master students. It is designed for students interested in learning more about natural and cultural resources of Indonesia. Through on-site visit, field trips and workshop, the students are expected to get hands-on experience and empower the community through community service, such as learning together with the community on nature's conservation. The students also learn Indonesian with the locals.

### Airlangga Global Day

This program is an international education fair. This year, it is organized for the third time. There are some activities in this event. A lot of information on college studies, scholarships for local and international students are provided. There is also a workshop on preparation to study abroad.

### Indonesian Heritage (JOINT SUMMER PROGRAM UNAIR-UNS)

This program is aimed to give chances to international students to study some of Indonesian treasured assets and understanding about general knowledge of Indonesian cultures, such as making Batik and traditional herbal drink. The program is held for ten days for undergraduate and master students. UNAIR collaborates with Universitas Sebelas Maret to organize this program.

### Summer in SURA-BALI (JOINT SUMMER PROGRAM UNAIR-UKP-UNUD)

This is a community empowerment program through sociopreneurship. The participants are introduced to sociopreneurship and culture of Indonesia, both theoretically and practically in two big regions, Surabaya and Bali. In the end of the program, students are expected to have the competence in identifying sociopreneurship activities, mapping the challenges and offering ideas to improve social enterprises in the global setting. This program is organized in collaboration with Universitas Kristen Petra and Universitas Udayana. (\*)

We aim to be one of the best university in the world, and We keep developing toward that direction.

# Universitas Airlangga

## Hospital

[rumahsakit.unair.ac.id](http://rumahsakit.unair.ac.id)

Established on June 14, 2011, Universitas Airlangga Hospital (RS UNAIR) was appointed by the government to be a pilot project of teaching hospital in Indonesia. UNAIR Hospital which provides service to Healthcare and Social Security Agency (BPJS Kesehatan) patients, also has excellent resources, services and facilities.

UNAIR Hospital does not only provide medical services. It also organizes activities for the senior citizens, research visit, free cataract surgery and other activities. In 2015, UNAIR Hospital was awarded The Most Trusted Hospital and Quality Service of The Year.

As a teaching hospital, it has supporting facilities for educational activities such as lecture rooms, study, Medical Specialist Professional Education (PPDS) Room, discussion and coordinating room, resident room and research ethics room.

Excellent services are given through its Geriatric Clinic, Airlangga Aesthetic Center, Neurosurgery Center Surabaya, Varicose Clinic, Integrated Complementary Traditional Healthcare Service Unit, Microtia Center, Integrated Oncology Clinic, and Integrated Digital Design Research Center for Medical, which is a collaboration unit with Sepuluh Nopember Institute of Technology (ITS).

There are also conventional services such as hemodialysis unit, inpatient services, ICU/CCU/NICU/PICU, 26 specialist and sub-specialist clinics, Medical Check-Up service, radiology unit and laboratories, Home Care Unit, and 24/7 Ambulance and Emergency Installation.

The hospital which has gained the highest level of accreditation by Hospital Accreditation Commission (KARS) and international accreditation in 2019 is currently supported by 121 medical specialists, 32 general practitioners and dentist, 336 nurses and midwives, and other staffs reaching 827 in total.

UNAIR Hospital was awarded The Most Trusted Hospital and Quality Service of The Year.

# Universitas Airlangga

## Dental Hospital

[rsgm.unair.ac.id](http://rsgm.unair.ac.id)

Airlangga University Dental Hospital or Rumah Sakit Gigi dan Mulut Universitas Airlangga (RSGM Universitas Airlangga) provides general, specialist, emergency services including emergency dental care. RSGM is a teaching hospital. It means the treatment is given by a variety of dental professionals, including students, specialists in training or other qualified staff. The Dental Hospital is equipped with 6 beds, High Care Unit with 2 beds and two modern Operating Rooms.

It offers a wide range of services such as dental cleaning, gum diseases, tooth filling, orthodontic treatment, crowning, tooth replacement with denture in partial or full denture, dental implant, tooth extractions, wisdom tooth removal, root canal, and other treatments. It also provides oral and maxillofacial surgery for patients who needs surgical intervention as in oral and maxillofacial trauma, infections, cleft lip and palate and correction of maxillofacial skeletal deformities by orthognathic surgery. Its experts have the most advanced technologies in handling the patients and keeping their oral health at its best.

There is also a special treatment on dental health, growth and development for children, in its relation with dental health and psychological problems, managing behavior in dental health by experienced specialists that provide services of comfortable and safe dental treatments.

### Specialist Dental Care:

- Oral and Maxillofacial Surgery
- Prosthodontics
- Conservative Dentistry
- Periodontics
- Orthodontics
- Oral Diseases
- Pediatric Dentistry

### Supporting Facilities:

- Inpatient service
- Dental Laboratory
- Dental Radiology
- Ambulance Service
- Central Sterilization Service Department (CSSD)
- Emergency Service

# Veterinary Medicine

## Teaching Hospital

Veterinary Medicine Teaching Hospital was built to develop an ideal veterinary hospital with modern facilities, professional and competent hospital staffs that uphold ethical values while continuously provides and improves excellent service to the community.

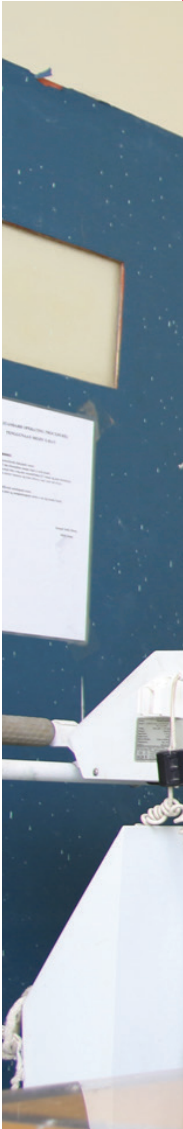

The four-story building is located in Campus C of Universitas Airlangga, right next to Faculty of Veterinary Medicine on Jalan Dharmahusada Permai, Mulyorejo. The building was officially inaugurated in April 2018. However, the hospital has been operating since 2004.

The veterinary medicine teaching hospital is expected to expand the scope of veterinary service provided for livestock commodity and pets. The hospital is also referred by vets, regional laboratory and veterinary health centers (Puskesmas) in East Java.

This hospital opens on weekdays (Monday-Friday) from 8 AM to 5 AM. On Saturday, it opens at 9 AM and closes at 1 PM. The clinics provide services to 75 patients in a day, and they are always encouraged to improve the service.

Veterinary Medicine Teaching Hospital of Universitas Airlangga is expected to perform three functions, providing veterinary service, conducting education and giving recreational service. The first one is about providing medical treatments to animals. For its educational function, academic community of Universitas Airlangga, either resident students or instructors, are always involved in the service. For the last function, there is a vaccination and grooming service for pets. It is aimed to provide comforts to animals.

The synergy of Faculty of Veterinary Medicine and this hospital is aimed to optimize their roles, especially about the learning or education. The hospital is expected to improve the competences of Faculty of Veterinary Medicine graduates.

Veterinary Medicine Teaching Hospital is expected to perform three functions, providing veterinary service, conducting education and giving recreational service.

Since October 2017, it has provided treatments to 15,000 patients, including 1,778 surgeries.

# Ksatria Airlangga

## Floating Hospital

[ksatriaairlangga.org](http://ksatriaairlangga.org)

Ksatria Airlangga Floating Hospital was initiated by alumni of Faculty of Medicine Universitas Airlangga (FK UNAIR) in the Symposium on Adventure and Remote Medicine during the commemoration of 62nd Anniversary of UNAIR in November 2016. The hospital is an alternative solution in health problems in remote areas to achieve “Health for all.”

The floating hospital has the vision to realize healthy, happy, and content people in remote islands with a clean, healthy, and sustainable environment as a manifestation of social justice for all Indonesian people. There is a spirit to ensure all the people in the archipelago have access to complete healthcare services.

Ksatria Airlangga Floating Hospital provides basic health services, including general examination and treatment, dental and oral health services. It also provides proactive referral health services, including surgical, eye disease, obstetrics and gynaecological, internal medicine and paediatric health services.

Ksatria Airlangga Floating Hospital also conducts primary research and resuscitation by building basic data on the health of the maritime community through identification of urgent problems, resuscitation of 100 days, material provision for definitive planning of development in the health sector (with reference to basic data).

The hospital is equipped with 2 operating rooms: general and eye surgery, recovery room, sterilization room, administration room, changing room, medicine storage room, laboratory, medical team space, cabin crew room and kitchen.

In a certain period of time, before heading to certain remote islands, the floating hospital always recruits volunteers, from doctors, medical specialists, dentists, anaesthetic staff, surgeons, nurses, pharmacists, public health practitioners to documentation personnel.

Since October 2017, it has provided treatments to 15,000 patients, including 1,778 surgeries. From one mission to Bawean Island, Kangean Island, Sapeken Island, and Kalimas port, 3,512 patients were handled, with 574 surgeries performed, including 32 surgeries after an earthquake hit North Lombok.

# UNAIR Libraries

lib.unair.ac.id

Universitas Airlangga has three libraries located in three campuses, Campus A, Campus B and Campus C. The main library and the biggest one is the one in Campus B. There are 60 staffs working and supporting the students in the libraries. They consist of 25 librarians and 35 administrative staffs.

Libraries of Universitas Airlangga offer some services such as e-library, special collection services, magazine service, reference service, training service, reading room, discussion room, American Corner and Aussie Corner.

## Printed Information Service

It is a collection of UNAIR Library accessible online through OPAC (Online Public Access Catalogue) on <http://ailis.lib.unair.ac.id/opac/>. The collections include Special Collection I, Special Collection II, general collection, reference collection, magazine and printed journals.

The number of books in the libraries, as recorded by the new system of Airlangga Integrated Library System (AILIS) reached 139,469 titles with 197,738 total copies. They are divided into Campus A, B and C. In addition to the three libraries, each faculty in UNAIR also has its own library.

## e-Library

It provides information and references in digital forms such as e-journals and e-books. UNAIR subscribes e-resources consist of 57 databases, 35,964 titles of e-journals, 14,498 e-books and 1.5 million collections of dissertations subscribed from providers.

## Corner Service

1. American Corner and Education USA
2. Aussie Corner
3. National Building Corner (NBC)

### Library Class

UNAIR Library gives classes for the academic community on the provided services, such as on Online Research Management (ORM), Library101, Reference Manager, Plagiarism Checker, Ms. Word Optimization, e-Journal subscription.

### Creative Programs

The libraries of UNAIR also hone the students' soft skills through creative programs such as Entrepreneur Talk, Musicoustic, Secondhand book fair, Meet The Author, and Community Parade.

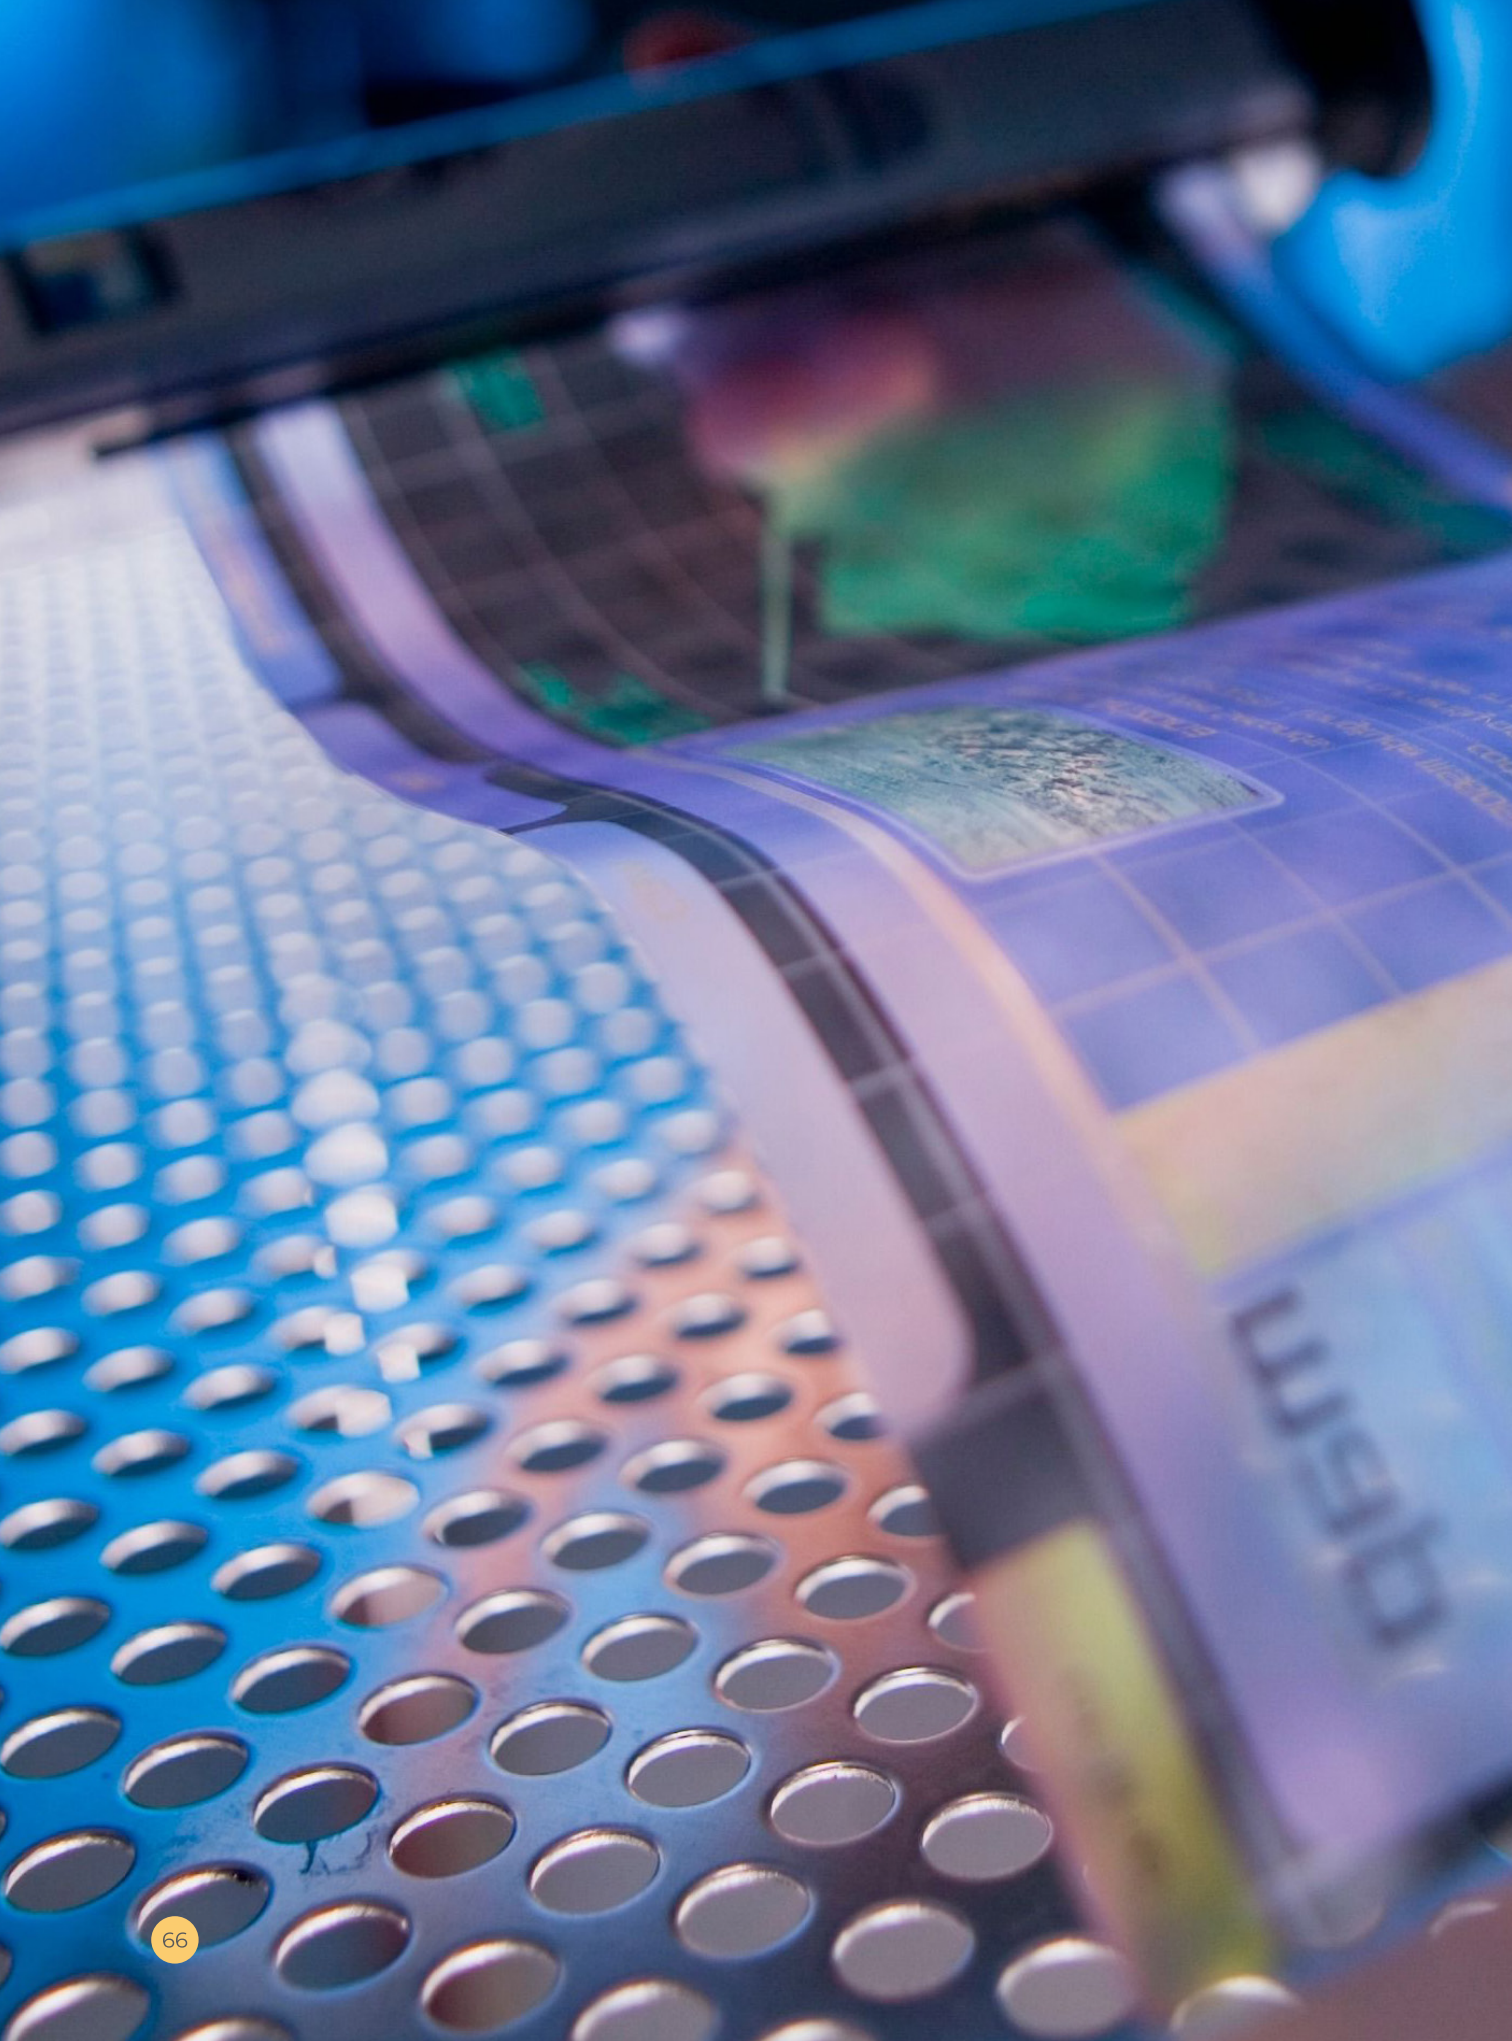

### Domestic Partnerships

FKP2TN (State Higher Education Collaborative Forum)  
FPPTI (Indonesian College Library Forum)  
Indonesian Information and Scientific Documentation Centers

### International Partnerships

AUNILo (ASEAN University Network Inter-Library Online)  
AMCOR (American Corner) and Education USA - US Embassy  
Aussie Corner – General Consulate Australia in Surabaya

# School of Advanced Technology and Multidisciplinary

In 2020, Universitas Airlangga is opening five new programs:

## Industrial Engineering

This program provides insights and knowledge needed in an industrial process, which covers various fields. It includes industrial system and process optimization, especially the efficiency and productivity aspects. Students will also study the role of the organization and human's role in an industry, so the students will also have managerial skills.

## Electrical Engineering

This engineering discipline concerned with the study of electricity, electronics and electromagnetism and their application in daily life. It includes the concept, design, development and production process of electrical and electronic devices.

## Nanotechnology Engineering

The program is the practice of engineering on the nanoscale. Nano-sized materials are manipulated to create a new object with desired characteristics. One of the examples of nanotechnology product is the clothes made of specially-engineered fibers that make the people wearing them stay warm in winter.

## Robotics and Artificial Intelligence Engineering

This engineering discipline focuses on robots and artificial intelligence development. Students will be taught how to build a robot or artificial intelligence such as Sophia, Siri, Alexa and Cortana.

## Data Science Technology

Data is currently considered as the most valuable currency. Learning Data Science Technology will be beneficial for the future. It is a multi-disciplinary field that uses scientific methods, algorithms and systems to acquire an in-depth understanding of some data, either in a well-structured form or otherwise.
