

## **VNUHCM INTRODUCING SEVERAL OUTSTANDING SCIENCE AND TECHNOLOGY PRODUCTS**

VNUHCM attended the 60th anniversary of establishment of the Ministry of Science and Technology in late November 2019 at the National Convention Center, Hanoi, exhibiting many outstanding scientific and technological products.

Prime Minister Nguyen Xuan Phuc and many leaders highly appreciated the products, such as nano silver bio-colloidal products (International University), stem cells for medical and aesthetic use (Institute of Stem Cells, University of Science), and drones for agricultural service (University of Technology). In particular, Prime Minister Nguyen Xuan Phuc stopped for quite a long time in front of the nano silver bio-colloid booth to listen to Assoc. Prof. Dr. Nguyen Thi Hiep (International University) introducing the research and development process of this product.

The 60-year exhibition of science and technology achievements in 2019 included two exhibition areas under the theme of Science Path, and Science and Technology Application in Enterprises. The exhibition had 60 stalls for 60

enterprises, universities, and research institutes in many fields of agriculture, health, transportation, etc. This was one of the activities of the event series to celebrate the 60th anniversary of the establishment of the Ministry of Science and Technology.

The University of Technology's Drone for spraying pesticide and fertilizer.

The ICDREC's Electronic circuit chips used in the field of national defense and security, and electronic galvanometers. Prime Minister Nguyen Xuan Phuc takes a commemorative photo with Assoc. Prof. Dr. Huynh Thanh Dat and Assoc. Prof. Dr. Nguyen Thi Hiep at the exhibition booth of VNUHCM.

The Stem Cell Institute (University of Natural Science)'s New PRP Pro Kit and 5PRP Kit applied to dentistry, aesthetics, treatment of injuries, and trauma
