Greeting

04

Realizing the goal
of the world's top 100 together,
We now aspire to
KU's new mission.

Greetings from Korea University! As President of KU with a strong sense of responsibility and sincerity, I am putting forth my best efforts to make the future of KU stand tall in the world, building upon the proud history of KU as the nation's pride and hope.

We are now standing at a great transitional period in the history of civilization. Our average life expectancy has been extended by more than 30 years, and the world that we live in has become one big global community. Informatization, led by the semiconductor and computer revolution, has dramatically changed human civilization again. Societies, organizations, and knowledge are changing even at this very moment. Moreover, we are facing many issues that are newly threatening humanity, along with these drastic changes.

KU is pursuing a new start with "Pioneering Intellectuals." Established in 1905 as the nation's first private higher education institution, KU has embraced its heritage and history in pioneering the nation's future during the Japanese occupation, emulated Incheon who built the Library (the current Graduate School Building) by traveling all over the country to raise funds, and followed its seniors who have led democratization and industrialization with the spirits of liberty, justice and truth. Bearing its distinguished history in mind, KU is committed to nurturing young and passionate pioneering intellectuals who can lead the future of humanity in the 21st century.

Korea University will nurture young students not as passengers waiting for a cruise ship ready to set sail on a pleasant and comfortable journey but as pioneers who can build their own boats to navigate through rough and heavy seas. To this end, we will endure the excruciating pain and difficulty in the process of innovation and reformation.

KU—The Future, Pioneering Intellectuals and Innovating KU!

These banners are flying over the KU campus. Pioneering, reformations, changes, and challenges have never been easily accomplished. We once again aim to lead the future in a KU-fashioned way. Please join us and support the future that KU strives to pioneer. We invite you on our journey of opening the future and making KU together. Thank you.

President of Korea University

KU History

05

1905

Founded as Bosung College, the first institute of higher education in Korea

Yong-ik Lee, also known as Chungbukgong, Treasurer of the Royal Household of the Korean Empire, established Bosung College, the predecessor of Korea University, with the belief "Education Saves the Nation".

1934

Moved to the Anam Campus

The Main Building, a representation of the aspirations of the Korean people, constructed in Anam-dong.

1946

Korea University, an overarching name

Permission granted on August 15 to establish a university. Name changed to Korea University.

1960

Sparking the April 19 Revolution.

About 3,000 KU students marched in protest against the injustices of the autocratic dictatorial regime, creating the vanguard of the April 19 Revolution.

1980

Sejong Campus, a branch of Korea University, established.

Permission granted in January to establish Seochang Campus in order to nurture intellectuals in the heart of the country. Seochang Campus renamed Sejong Campus.

2002

Building a foundation to enter the world's top 100 universities.

The Central Square, as part of the KU Centennial Project, established.

2005

Celebrating its 100th anniversary, announced the determination to grow from National KU to Global KU.

Celebrated KU's Centennial in 2005.

Selected best university in the 2005 KCUE University Rankings.

NOW

Towards Global KU's new millennium.

Using National KU's 112-year history to build Global KU's next millennium

Inside KU icon

06

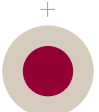

A Global Symbol, the First Step Towards a Global KU

The icon symbolizes KU's global vision to enter the ranks of world's top universities based on its century-old history and tradition.

“Shield”, Education Saves the Nation

The shield symbolizes founder Yong-ik Lee's belief that “Education Saves the Nation”, which lead to the establishment of KU.

“Crimson”, the passion of youth

Crimson symbolizes vitality and passion, embodying KU's academic traditions and nature.

“Tiger”, a roar that shakes the Earth.

As a symbol of both Korea and KU, the tiger represents KU's courage, determination, swiftness and dignity.

“1905”, beginning of National KU

1905, the year of KU's establishment, demonstrates KU's 105 year tradition and depth of academic research.

“Liberty, Justice, Truth”, what makes KU people true KU people

School Motto

The school motto announced in celebration of KU's 50th anniversary represents the realization of human freedom (LIBERTAS), the pursuit of justice (JUSTITIA) in society and an overflowing passion for the search for truth (VERITAS). Intellectuals in action with passionate hearts, not numb and engrossed in texts, are KU's everlasting value; this ideal is what makes KU people true KU people.

KU Tree

The Korean pine which represents fidelity and integrity, perfectly expresses KU's strong will to serve as a cradle for talent.

07

KU's School Song

KU's school song, heard at nine every morning resounding from the clock tower of the College of Liberal Arts building, was announced to celebrate KU's 50th anniversary in May 1955. The lyrics were written by Ji-Hoon Cho, a member of the famous coterie of poets called the Blue-Green Party and a KU professor at that time. The poet was also well known for the poem Seungmu (Buddhist Dance) in which every line contained liberty, justice and truth, the three words representing KU's spirit. The music was written by Isang Yun, a promising young composer at that time.

Lyrics by Cho Ji-hoon

Music by Yun Isang

1. Gaze at the edifice standing tall at the foot of Bukak Mountain. See the light spreading to the hills of Anam. The stone tower is built tall with the spirit and devotion of the people. This is the hall of liberty, justice and truth.

2. Waves of hearts longing for liberty. Conviction for justice. Burning devotion. Honoring the wishes, the ideal rises high. This is the light of liberty, justice and truth.

3. The quiet woods are the cradle of our dreams. The wide fields are the root of our power. The spirit held tight both by those entering and moving onward. This is the road of liberty, justice and truth.

Korea University, Korea University, hometown of my heart.
Korea University, Korea University, shine forever.

KU, Sail with Enthusiasm Towards the Future Campus

Foresight and Courage for Transformation:
KU Spirit Flourishing to Become a World Class University

Boundless Thinking and Creation **π -Ville**

In September 2016, Pioneer Village (π -Ville) was established for knowledge creation. The π in π -Ville comes from the first two letters of the word 'pioneer' and is written as ' π ' to symbolize endless expansion. As expressed in its name, the village intends to become an incubator for infinite challenge, collaboration, and creation in the hopes of expanding KU's pioneering spirits.

A Future Space for Creativity and Immersion **SK Future Hall**

Unlike traditional lecture rooms, the SK Future Hall is composed of 111 small seminar rooms and 111 individual carrels. This space symbolizes KU's new university education paradigm for going beyond simply receiving knowledge and discovering knowledge that can lead the future.

A University with the Greatest Trust and Expectations **A Private University with the Most Donations**

All Korea University members remember the noble dedication of the donors who have shown their love and faith for KU. Based on their support, KU will set a good example of a global university with its innovative educational infrastructure.

Autonomy, Trust, and Responsibility Replacing Proctored Exams, Attendance Checks, and Relative Grading

A Private University with the Most Donations

As other prestigious global universities have done, KU has implemented an academic policy based on autonomy, trust, and responsibility. KU has made a promise to allow its students to take exams with honor instead of having proctors and to prepare for classes autonomously without checking attendance, and its teachers to assess students without grading them on a curve.

Academic System to Promote Autonomy

Implementing a Flexible Term System

The flexible term system offers the freedom of choice and concentration by allowing students to design and manage their own semester flexibly. For example, a student can complete a school term in eight weeks per semester or three semesters per year. It enables the professors to concentrate more on their research and the students to take new challenges, such as overseas internships.

Admissions System to Prioritize Potential and Possibilities

Altering High School Education Through Innovating the Admissions System

University admissions have a great influence on the middle and high school education system. Therefore, it is our duty and mission to lead the nation's farsighted educational framework for future generations. KU presents an innovative admissions system to discover strong applicants with great potential and possibilities.

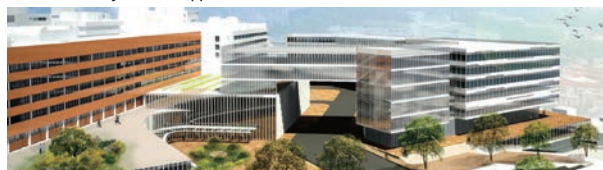

KU, Soar to the Infinite Universe of Research

Leaping to be a research-oriented university as a creative pioneer of the unknown academic fields that will lead the future of humanity

Becoming the Hub of Interdisciplinary Research by Tearing Down All Boundaries

KU-MAGIC

Korea University Medical Applied R&D Global Initiative Center

KU-MAGIC is the realization of KU's relentless challenge in innovatively leading the bio-medical industry, which will be a core industry in the future. It provides the most supportive research environment that allows outstanding scholars to cross boundaries and liberally cooperate with each other to create a sound future for humanity on a global bio-medical research platform. It is expected to serve as a mecca of bio-medicine and enhance Korea's global competence.

Unsparring Support to Inventive Research with Potential

KU-FRG/ Seoktap Research Awards

KU-MAGIC is the realization of KU's relentless challenge in innovatively leading the bio-medical industry, which will be a core industry in the future. It provides the most supportive research environment that allows outstanding scholars to cross boundaries and liberally cooperate with each other to create a sound future for humanity on a global bio-medical research platform. It is expected to serve as a mecca of bio-medicine and enhance Korea's global competence.

Widely Recognized World-Class Researchers

Academic Reputation Ranked No.1 Among Private Universities in Korea by QS World University Rankings

According to the 2016 QS World University Rankings, KU ranked No.1 in academic reputation among private universities in Korea. Academic reputation is a very important indicator that takes up a great proportion of the world university rankings. Including Professor Jong Seung Kim of the Department of Chemistry, who has been named one of "the world's most influential researchers," many KU researchers are receiving global attention with their creative research.

KU, Connect a New Route Leading to a Wider World

Fostering Global Leaders Who Can Embrace the Global Community with Passion and Love for Humanity: Global KU Encountering the World with the Frontier Spirit

global Placing KU Campus inside Renmin University of China

KU-China Global Leadership Project

KU built the KU Global Center in the prestigious Renmin University of China located in Beijing in 2013. Every year, KU sends about seventy students to Renmin University of China and the Harbin Institute of Technology in order to provide

them with opportunities to intensively acquire the language and widely experience the culture in China. The KU-China Global Leadership Project trains students from various academic fields to become regional experts in the Chinese language and culture. The project has been carried out successfully two times a year since 2013. KU is also operating other projects including KU-Silicon Valley and KU-Latin America Global Leadership.

Flourishing to Be Asia's Top International University

International Summer/Winter Campus

Distinguished professors and students from the world's top universities convene at KU every summer and winter vacation. KU offers opportunities for students to attend lectures of professors from the Ivy League and interact and be

friends with about 2,000 students from the prestigious universities of 40 different countries. KU's International Summer Campus, proud to be the largest program of its kind in Korea, has grown to be an international summer campus representing Asia.

Being the First Pioneer in the Rising Land of Opportunity

KU-Latin America Project

Latin America is an emerging market, currently receiving worldwide attention. While other universities pursue globalization focusing on the U.K. and the U.S., KU has launched the KU-Latin American Project by pioneering Latin America for the first time. KU is the first university in Korea to sign an MOU with the University of Habana, located in Cuba. KU continues to march into new territories by building collaborations with the ministries of education in Costa Rica, Peru, Columbia, Mexico, and Ecuador.

Expanding Collaborative Research Networks with World Class Universities

Founding the Korea, China, Japan, Nordic and Benelux Consortium

In 2016, KU founded the East Asia-Nordic/Benelux University Consortium (ENUC). Twelve universities in 10 countries—Korea, China, Japan, Denmark, Sweden, Finland, Belgium, the Netherlands, Norway, and Luxembourg—attended the conference. Members of the ENUC will come together to prepare the future of humanity and the future of higher education based on the groundwork by constructing various collaborative systems such as promotion of joint research, co-development of educational programs, and implementation of societal duties and responsibilities.

World's Top 50 University

12

Ready To Enter
the World's Top 50 by 2020,
KU Desires
Your Support and Interest

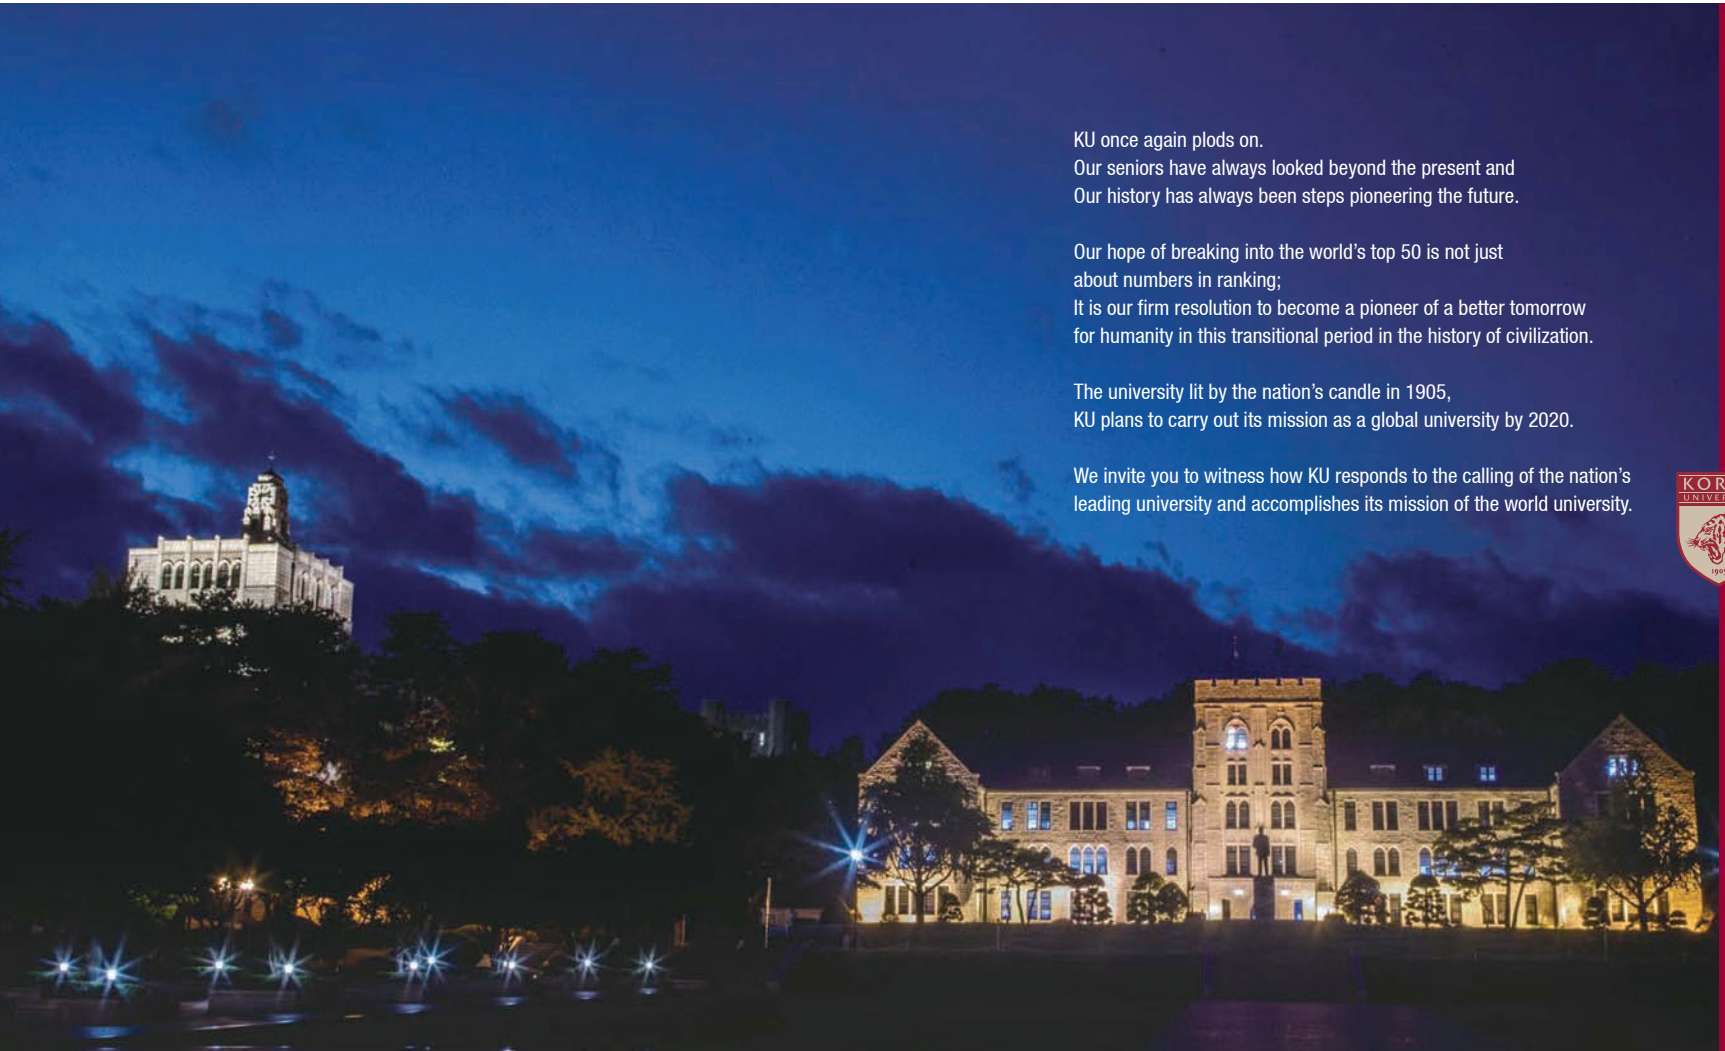

13

KU once again plods on.
Our seniors have always looked beyond the present and
Our history has always been steps pioneering the future.

Our hope of breaking into the world's top 50 is not just
about numbers in ranking;
It is our firm resolution to become a pioneer of a better tomorrow
for humanity in this transitional period in the history of civilization.

The university lit by the nation's candle in 1905,
KU plans to carry out its mission as a global university by 2020.

We invite you to witness how KU responds to the calling of the nation's
leading university and accomplishes its mission of the world university.

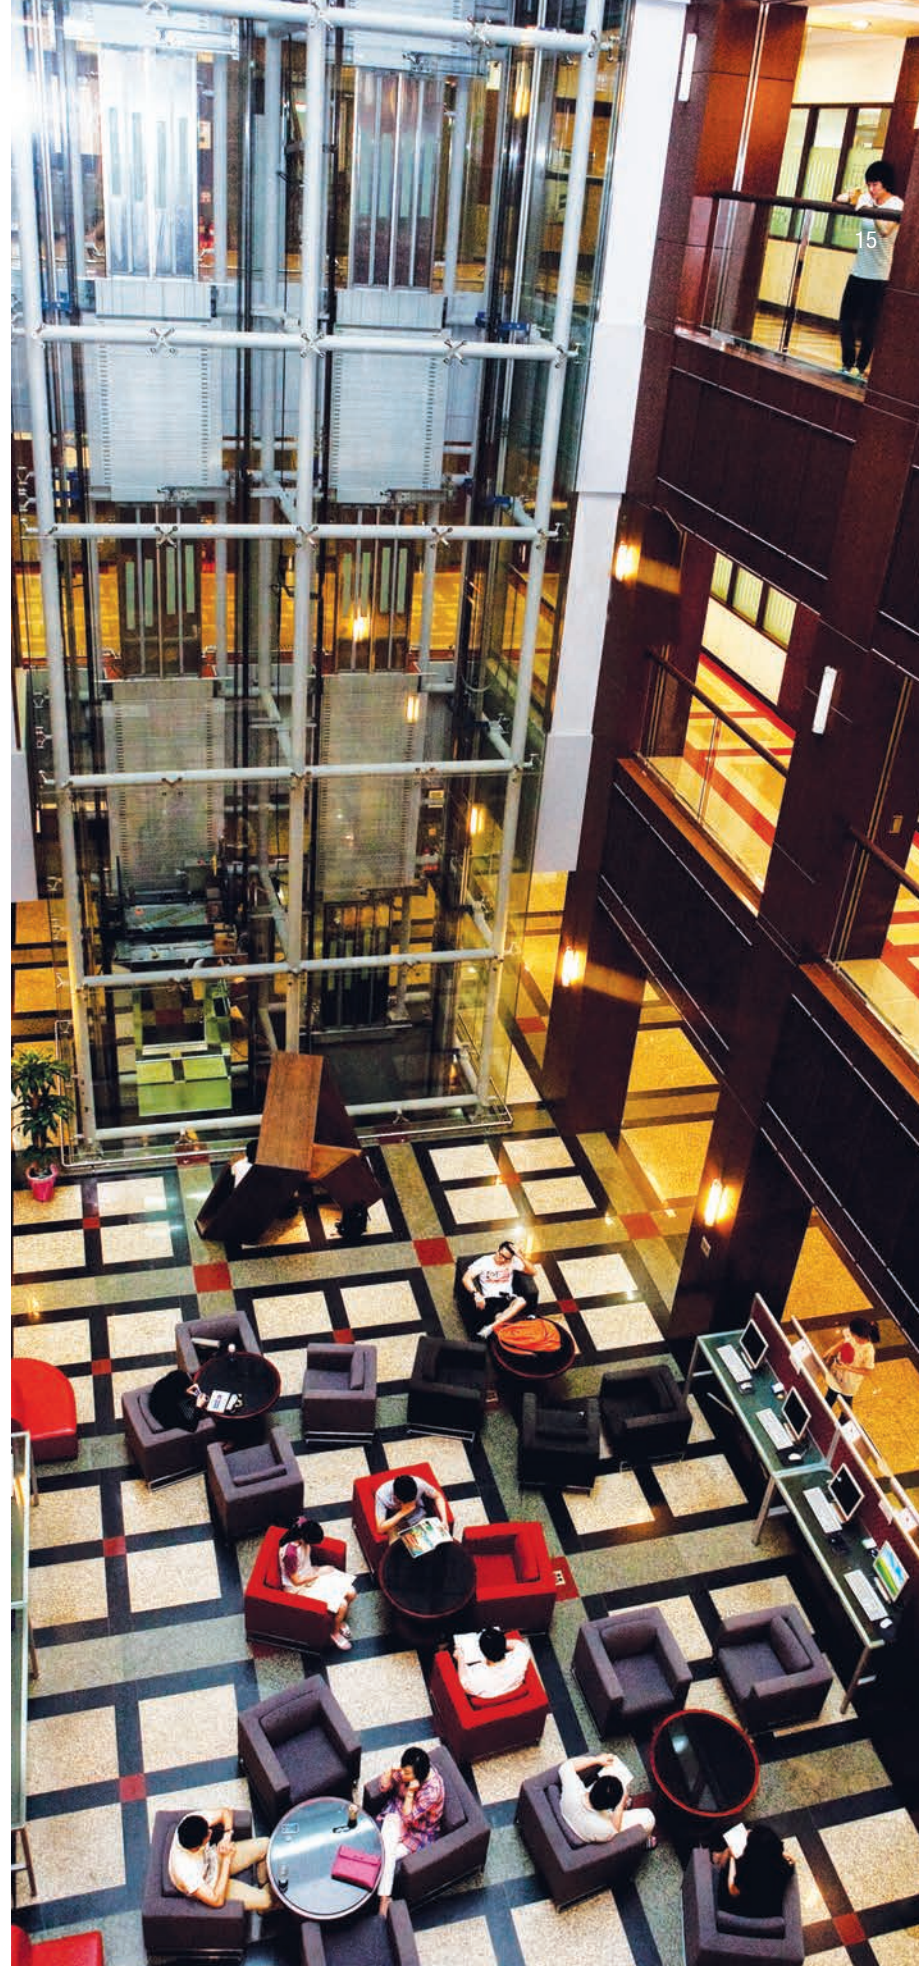

Campus Facilities

Exceptional campus facilities – Delivering the hopes and vision of KU's

What is as important as attracting potential is supporting it with the best possible campus facilities. At KU, the talent who will lead the future of Korea and the world are nurtured in an ideal educational environment.

Main Library

Opened in 1978, the Main Library contains about 1,900,000 works—the largest collection in any private university library in Korea. This beautiful 14,390m² stone structure was completely remodeled in 2004. Equipped with such state-of-the-art facilities as search functions for each room, reference information rooms, and Web-based learning corners, it serves as a proud heart for KU intellectuals by supporting students' academic research activities. With the November 2013 completion of Korea's first RFID system for a university library covering the entire campus, the Main Library offers 24-hour automated lending and returning services as well as systematic collection management and efficient operations.

LG-POSCO Hall

This cutting-edge building was completed on a 14,122m² site with KRW 25 billion in funds donated by corporations and alumni. Incorporating the best features of similar facilities at Harvard, Stanford, and the University of California, Berkeley, it is one of the world's premier Business Administration complexes.

Centennial Memorial Hall

Completed in commemoration of KU's centennial, this multiplex unites the past and the future by housing both a digital library and a number of national treasure-level cultural properties.

Haesong Law Library

Opened in 2007, the Haesong Law Library boasts the largest collection of any Korean law facility. Awarded the grand prize in the 2007 Korean Architectural Culture competition in recognition of its cutting-edge functions, unity of composition, and materials, the building is a stirring symbol of KU's highly-regarded law school.

Centennial Digital Library

Being the world's finest both in terms of facilities and size, this high-tech information center plays a pivotal role in maintaining electronic library services.

Media Hall (KU-Cinema Trap)

The Media Hall is equipped with a variety of practical training facilities capable of film production and screening. It also boasts the KU-Cinema Trap, a 144-seat cinema, in which KU students can enjoy movies at a low cost, and the "Crimson Lounge" on the eleventh and twelfth floors.

Hana Square

This gigantic structure of 28,099m² stretching from east to west in front of the Science Library includes one story above ground and three below. Appearing like a ship floating on the ocean, the structure boasts grand beauty with a charming and practical design. Winner of the Award of Excellence in the 25th Seoul Architectural Work Award, it now stands as a proud landmark of KU.

CJ-International House

This hotel-type residential facility is designed to serve the growing numbers of visiting scholars, foreign professors and exchange students. Equipped with study rooms, cafeteria, lounges, conference rooms, a fitness center, and the YBM Lounge, it can accommodate 326 residents--68 instructors and 258 students.

Hwaajeong Tiger Dome

Completed in 2006 on a 18,182m² site, this multi-purpose sports complex with three stories above ground and three below helps students and faculty members maintain good health.

Global KU

18

Nurturing Global Leaders Backed by KU History

In today's international era, KU is emerging as a leading global university that nurtures wise global leaders able to contribute to humankind with new knowledge. The KU tradition passed down over the previous century will serve as a solid foundation in forging students' characters and abilities, thus amplifying the international recognition of the university.

The Cradle of Global Leaders

At KU, which has joined hands with 979 universities and institutes in 95 countries, world renowned scholars offer lectures and the largest international summer campus in Korea is held. Students benefit from an exchange program in Paris and internships at the UN and on Wall Street –This is KU and KU is in the wider world.

19

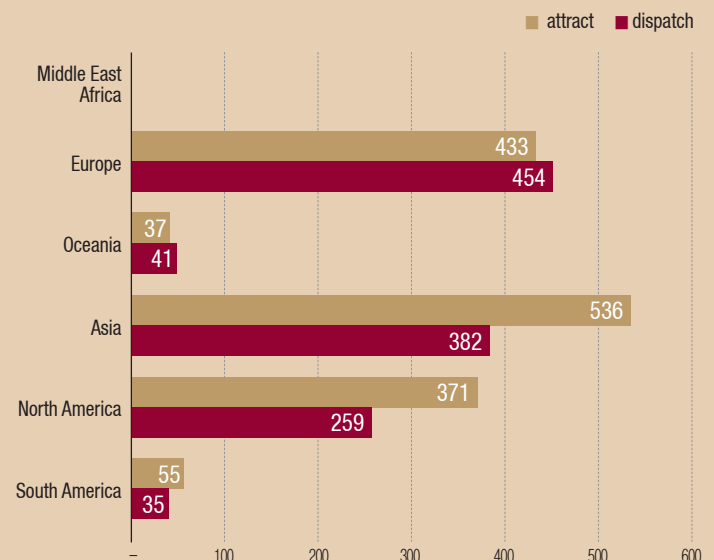

Nurturing Regional Experts Through Specialized Programs

Program Name	Description*
KU-China Global Leadership Program	<ul style="list-style-type: none"> - An eight-week language and cultural experience program (four weeks at KU, and four weeks at Renmin University of China or East China Normal University), including field trips to local companies - Aims to nurture experts on Korea-China relations and foster development of global leaders in the humanities - Held each summer and winter since May 2013
KU Exploring the World Program	<ul style="list-style-type: none"> - Field trips to Vladivostok, which was central to Korea's independence movement, to raise awareness of Balhae history and instill leadership in students (15 students sent abroad in 2016)
KU-Latin America Global Leadership Program	<ul style="list-style-type: none"> - An eight-week visit to the University of Costa Rica for 160 hours of Spanish language learning, field trips to local businesses, and cultural experiences

The Best Student Exchange Programs (SEP) and Visiting Student Programs (VSP)

Led by the years of experience of KU's Office of International Affairs and the warm guidance of the many who have finished the programs, KU's SEPs and VSPs serve as ideal student exchange programs to offer students invaluable opportunities to build a global point of view.

2016 Exchange Programs - Visiting Student Programs

KU Heads Towards the World, The World Heads Towards KU

20

ISEP with 300 Prestigious Schools Worldwide

ISEP (International Student Exchange Program) includes 300 member institutions in 43 countries throughout the world. KU is one of the select number of member universities in Korea to join the program. Every year KU students taking part in ISEP's various exchange and study abroad programs gain invaluable experiences together from other member institutions throughout the world.

Overseas Internships

Internship program sends a number of talented interns not only to international organizations such as the UN and UNESCO, but also to renowned global corporations like UBS, Merrill Lynch, Tiger Fund, GE, and Bloomberg in New York, Paris and the third world. The number of corporations and institutions affiliated with this program is growing every year.

Foreign Language 7+1 Program

KU has also adopted the "7+1" system, which makes it a prerequisite for students majoring in foreign languages to study for, out of a total eight semesters, at least one semester overseas in a country where their target languages are spoken as a mother tongue. This special program offers students the opportunity not only to polish their language skills to a native speaker level but also to learn the culture and broaden their full spectrum of understanding as they develop expertise in the foreign languages and literature which are considered a must in this globalized world.

International Summer/Winter Campus

KU's International Summer/Winter Campus offers over 120 challenging course taught by distinguished faculty from prestigious universities around the world as well as Korean culture workshops, field trips, and a special lecture conducted by noted experts. Students participating in the International Summer/Winter Campus attend top lectures by internationally renowned scholars and engage in exchanges with students from all over the world.

Language Study on Campus

Every KU student takes at least five English language courses, and rigorously screened international faculty members offer high-quality English lectures. This program helps KU students develop their cosmopolitan outlook and global competitiveness.

KUBA & KUISA, One-on-One Buddy Programs Between International and KU Students

KUBA (Korea University Buddy Assistants) and KUISA (Korea University International Students' Assistants) are an one-on-one partnering program between local KU students and international students studying at KU. Through KUBA, international students get help with their new lives in Korea both on and off campus, such as classes, trips and international festivals. KU students get to develop friendship with their international

CampusLife@ KU

Filled with Crimson Passion and the Energy of Youth

Experience the joys of sharing and service through KUSSO (Korea University Social Service Organization). Develop friendship through competition at the Ko-Yon-Jeon (Korea-Yonsei Games). Make memories and enjoy the excitement of student club activities at the Great Granite Tower (Seoktap Daedong) Festival. Communicate and nurture a burning passion and lofty dreams. These are proud KU Tigers.

Annual Ko-Yon-Jeon (Korea-Yonsei Games), Competition and Friendship that Lead Korea

Each fall, Jamsil Stadium comes alive with the competition and friendship between longstanding rivals Korea University and Yonsei University. The origin of the Games dates back to the Japanese colonial period when the two rivals Bosung College and Yonhi College began holding sporting events that helped many Korean people endure the hardships of colonial rule. Over the past 90 years, Ko-Yon-Jeon has radiated the burning passion of youth, having become a festival of not simply two universities, but also the whole country. Today, together with the five matches of football (soccer), baseball, basketball, ice hockey, and rugby, the Games have developed into a variety of celebrations such as joint academic and broadcasting events and exchanges among departments and clubs. Ko-Yon-Jeon and the two prestigious rival universities will continue in everlasting friendship.

Over the past 90 years, since the period of Japanese colonial rule, Ko-Yon-Jeon has radiated the burning passion youth, having become a festival of not only two universities, but also the whole country.

Great Granite Tower Festival, Festival of Resurgent Youth

The Great Granite Tower Festival (Suktap Daedong Festival) in May is KU's premier festival, inviting not only the wider KU family but also the local community. The festival fills the entire campus with the energy of youth. During the festival a variety of events are held and the intellectual spirit and romance of the campus are felt everywhere. The cheering festival Ipseleti, the most passionate and popular event, academic seminars of sharp analysis and discussion, joint broadcasting events with Yonsei University and street festivals on Chamsari Street go on all week.

KUSSO (Korea University Social Service Organization), Living the True Value of Sharing

Since its launch on December 23, 2008, KUSSO has been working vigorously to practice "noblesse oblige" under the motto of "Intellectuals to take action, leaders to think, a university to serve the society". In order to fulfill the responsibilities of true intellectuals required by our times, it strives to make greater efforts to serve not only Korea but also all humankind everywhere in the world.

Club activities to support dreams, love and romance

Student club activities are often considered the gem of campus life. Joining others who share similar hobbies, interests and talents and growing together are an essential pleasure in KU life. There are over 150 clubs on the Anam and Sejong campuses including the 80 clubs on the Anam campus focused on society, social sciences, life and culture, exhibitions and creative art, language studies, performance art, religion, and sports, as well as the 20 clubs on the Aegineung (Science Campus) for culture and sports, society and religion, performance art, and scientific research.

KU Paper, KTN, KUBS, Driving Force of the 21st Century Media

The KU Paper, the first university newspaper launched in 1947, is delivered to KU students every Monday and features on- and off-campus news analyzed with sharp perceptiveness. KUBS, launched in 1961, is the on-campus broadcasting system representing the students' voices. It runs regular audio and internet broadcasting. Opened in 1997 as the first campus TV station, KTN broadcasts news and more for 24 hours a day through an on-campus CATV network and the Internet.

Student Ambassador Yeoul, Pride Surpassing the Face of KU

Yeoul, KU's student ambassador team, was launched in 1998 to help spread the word about KU. Yeoul, meaning "Let KU flow", expresses the pride of student ambassadors. Serving as the face of KU through their love for and pride in the school, Yeoul not only serves visitors on campus but also goes off campus to run a variety of PR programs.

College of Law

— Law Education's 100 years of Realizing Social Justice

Since its 1905 establishment in the early modern era as part of Bosung College, the Department of Law has been home to legal education in Korea. The department has been nurturing leaders equipped with legal expertise as well as international communicative capabilities.

With over a century of tradition in teaching and accumulating know-how, since the liberation of the nation this department has produced countless legal experts and leaders based on the philosophy of building a foundation for Korean law and realizing social justice through the law. KU's law department is proud of nurturing the most highly respected legal practitioners in Korea. Its exceptionally capable faculty is devoted not only to transferring legal knowledge to students but also to helping them develop leadership skills and functional personalities. The law department is considered one of the best in Korea across numerous areas, such as systematic curriculum, quality of lectures and seminars, and active exchanges with the law departments of other prestigious universities around the world.

The tradition and influence of the College of Law was handed down to the current Law School in 2009. Supported by the active publication and research activities of the Legal Research Institute of Korea University and the high-tech educational infrastructure of Haesong Law Library, KU College of Law is leading the global era as the foremost institution of legal education in Korea.

Business School

— All-time Leader in Business Administration with Unrivaled Global Competitiveness

KU Business School is committed to leading not simply Korea's future, but also the global economy. The business school shares the full history of Korea University, beginning in 1905, and the history of the remarkable economic growth of Korea. From the infancy of the Korean economy to the present advanced economic state, KU Business School has been laying a foundation for business administration studies and producing leaders in the field.

With a world-class faculty, students, and curriculum, combined with robust globalization efforts, KU Business School intends to become the leading business school in Asia and enter the top 30 in the world by 2030.

Its globally competitive curriculum, faculty and student exchanges with the world's most prestigious universities and international internship programs are turning heads around the world.

For the first time ever in Korea, the school was academically accredited in 2005 by the AACSB, the most renowned scholars' group in the US. It acquired EQUIS approval, the world's leading international accreditation for business schools, from EFMD. The school acquired renewed accreditation from both institutes in 2010, and in December 2014 succeeded in becoming the first institution in Korea to renew its five-year AACSB accreditation twice in a row. As of September 2016, the KU Business School is ranked 77th in the world and the 1st in Korea in the number of papers downloaded from the SSRN. It has gained a reputation as the nation's top business school by producing the highest number of candidates who passed the 51st CPA Examination.

College of Liberal Arts

31

— Driving Force behind Making KU the University of the Korean People

The College of Liberal Arts, founded in 1946, spans 15 departments. This college is leading efforts toward internationalization and globalization: Korean studies sheds light on the national culture from a unique angle, while humanities and foreign literature studies actively engage in world-class research and education.

Since its foundation, the College of Liberal Arts has been not only focusing on the development of the basic humanities, including literature, philosophy and history, but also turning its eyes to applied sciences such as sociology and psychology. As demonstrated by KU's installation of Chinese and Russian language and literature departments 20 years prior to the restoration of formal diplomatic relations and by KU's initiation earlier than any other university in Korea of studies in Spanish language and literature, Japanese and Classic Chinese as well as linguistics, the college has invariably shown foresight in a rapidly changing world by deliberating on the values that Korean society needs to possess.

The college has pioneered a '7+1' program designed to develop global leaders, through which students study for a semester at one of KU's sister universities abroad. In addition, the KU international internship program provides students with on-the-job experience at well-known international organizations. The college has invited a large number of international students and professors and conducts numerous classes in foreign languages, thus establishing an international learning environment.

College of Life Sciences & Biotechnology

Incubator of Biotechnology Leaders for the 21st Century

The College of Life Sciences is the nation's largest biotechnology college, consisting of the departments of Life Sciences, Biotechnology, Food Bioscience and Technology, Environmental Science and Ecological Engineering, and Food and Resource Economics. It is home to 100 full-time faculty members, 1,650 undergraduate students and 460 graduate students. As an integrated bioengineering hub for KU, this college drives the creative and future-oriented progress of education, research, and industry by fusing biotechnology, engineering, and information technology.

This college encompasses research and education in a wide spectrum of fields, ranging from animal, plant, microorganism and biomedicine to economics and business administration for bioindustry. Through interdisciplinary research and team teaching, it transforms creative young talents into 21st-century life science leaders. By promoting innovative, experiment-based educational content and infrastructure, the college is enhancing its research competitiveness while nurturing next-generation leaders in biotechnology through the operation of innovative academia-industry joint research programs.

As a leading partner in creative talent cultivation, biotechnology, and eco-leader cultivation under the government-sponsored BK21 Plus program, the college is pioneering research and education in the field of biotechnology in Korea and enhancing its already-respected brand value based on world-class research achievements.

College of Political Science & Economics

Leading the Development of the Social Sciences

Dating back to 1905, the history of the College of Political Science and Economics shares the history of Korea University and has kept actively abreast of changing times. It is comprised of four departments: political science and international relations, economics, statistics and public administration as well as programs in PEL (Politics, Economics and Law), law and public administration and financial engineering. Around 70 full-time professors actively engage in academic research at home and abroad.

In addition, a number of affiliated institutions, such as the Institute of Economic Research, Asiatic Research Center, Peace and Democracy Institute, Ilmin International Relations Institute, Institute of Statistics, and Institute of Governmental Studies as well as the Graduate School of Policy Studies, remain in active operation, enabling finely specialized education, reeducation and research, and providing depth to the learning environment.

Using this range of programs and highly advanced research environment, the college provides education that combines theory and practice in order to nurture talented students with in-depth expertise and leadership across various areas of society.

College of Science

Core of Basic Science: Foundation for Technological Innovation

Starting with three departments in 1952, namely math and physics, chemistry and biology, the College of Science has been producing top-tier human assets to lead academic and technological development through their in-depth understanding of basic science.

With a rapidly increasing rate of development, basic science is more important than ever. The principles of nature learned through basic science research are swiftly being applied to changing the world and creating vast amounts of wealth. The incredible driving force of scientific developments such as the smartphone revolution and significantly enhanced cancer cure rates was derived from basic science research. Basic science is the root of a dream that promises future prosperity.

The College of Science conducts adventurous research with an endless curiosity and passion for natural phenomena for the future prosperity of humankind. It has received BK21 project sponsorship from the Ministry of Education since 1999, encouraging student research.

Moreover, the Seoul branch of the Korea Basic Science Institute, which is located on the KU science campus, contributes enormously to basic and applied research at the college and facilitates joint academic-industry research. Also boasting a total of nine related institutes, including the KU Basic Science Institute created in 1971, the college is highly regarded as one of the foremost in Korea in terms of both education and research.

College of Engineering

— Alpha and Omega of Korean High Technology

With the aim of nurturing future-oriented, creative and talented individuals, the College of Engineering has instructed around 20,000 students since 1963. This college has played a significant role in bringing Korean engineering education and industry up to the standards of advanced nations. In the new information and knowledge era of the 21st century, the college is accelerating its efforts to nurture science and technology leaders who will enhance Korea's international competitiveness.

Possessing the far-looking vision that engineering education is closely related to industry, research bodies and government policy, the college established in 1996 for the first time in Korea the Korea Techno Complex to promote research cooperation between academia and industry. All this creates a hub for high tech research in Korea.

By providing nearly 3.5 hectares of research labs on campus to large firms and venture companies, the college offers its students the opportunity to gain hands-on experience with practicing engineers. In addition, the college works with 16 other R&D centers at KU and has been awarded large-scale government-sponsored projects including through BK21. As a government-designated graduate-school-led institution of higher education, the college produces almost 1,000 engineers and scientists a year who are expected to lead the knowledge-based industry of Korea.

College of Medicine

— The Birthplace of Global Medical Talent & The Standard of Medical Education

Based on the principles of freedom, justice, and truth, the College of Medicine aims to cultivate outstanding doctors who protect human dignity and health, realize social justice, and explore the truth of learning.

With the completion of the Moonsook Medical Center on March 2014 following the completion of the main medical center in 2012, the College of Medicine has become the nation's leading educational institution of medicine, equipped with the best learning environment and facilities, specialized research infrastructure, and an excellent education system. It provides state-of-the-art education through the nation's only exclusive teaching and learning support center for the College of Medicine. It has also produced monumental research achievements in the history of medicine, such as the development of the world's first Epidemic Hemorrhagic Fever vaccine. It has played a pivotal role in medical developments and public health: The College of Medicine was selected as a BK21Plus project partner, and Anam and Kuro hospitals were selected as national research hospitals.

As part of Korea's only member of Universitas21 (U21), a global network of research universities, the College of Medicine is creating the standard of Korean medical education through an internationally standardized health care curriculum, research-based education programs, and international exchanges.

The college has produced approximately 7,500 medical personnel through 2013, including a total of 2,891 medical doctors. These health care professionals practice medicine with love and care and bring honor to KU Medical School.

College of Education

— Cultivating Creative Global Education Experts with Personality and Intelligence

The College of Education was established in 1972 on the basis of Korea University's educational objective "to deepen the character of knowledge (ci), virtue (tek) and physical health (chey), inculcate creative academic research and professional practice skills, and foster open-minded leadership, and thereby contribute to Korea and the global community." The college consists of eight academic departments with the explicit goal of cultivating creative global education experts possessing both personality and intelligence. It has consecutively received the highest ranking with outstanding evaluations for excellence among all Korean education colleges by the Ministry of Education.

The College of Education provides both a Kongseonsahuwon study room and a group study seminar room for the national teacher qualification examination and houses an estimated 1,600 text books in the textbook reference room to help students realize their goal of becoming teachers. It also offers a satowen study room solely for students who are preparing for national administrative exams to become education administrative experts.

Moreover, to nurture education experts by instilling global competencies and experiences in various educational environments, the College of Education has signed an agreement with the Federal Way Education Association to allow students to practice their teaching as student teachers in affiliated middle and high schools. The college offers various opportunities including but not limited to the Into the World Challenge program where students can benchmark renowned overseas education institutes and trainee programs in overseas Korean schools and practice their teaching skills over a 4-week period. It also provides scholarships to students to support their participation in these beneficial programs.

In addition, in order to engage in advanced and creative research activities regarding Korean education policies and education developments, the college hosts eleven research institutes, including the Education Research Institute and the BK21Plus (Edu-hub in Asia) program, that yield many excellent research accomplishments.

College of Nursing

Nurturing Talented Future-Oriented Nurses

The goal of the College of Nursing is to produce creative leaders and globally competitive scientists in nursing under the founding philosophy of "National Salvation Through Education."

Korea University's 110 years of scholarship and the College of Nursing's celebrated 74-year history have produced over 3,500 alumni who have served as nursing leaders in professional institutions, including domestic and overseas laboratories and universities, public sector entities, health institutions, elementary, middle, and high schools, health related business sectors, elderly-care facilities, and medical centers.

With an excellent educational environment equipped with excellent faculty with rich research and educational experience and state-of-the-art lab facilities, the College of Nursing provides future-oriented nursing education for students to build their leadership skills and scholarly qualities. It also pursues a variety of globalization strategies such as providing exchange programs for professors and students with other major universities across Asia, the US and Europe, as well as offering community service opportunities at home and abroad.

As a prominent educational institution in Korea and the world, the KU College of Nursing is taking a leading role in producing capable and proactive nursing talent for the 21st century.

College of Information

Korea's Top Software-based Leading University Centered on Creative Thinking

Founded in 2014 by consolidating existing software-related departments, the College of Information aims to nurture software talent with the global competitiveness and creativity required to lead developments in software-based convergence technology. The undergraduate program in the College of Informatics consists of two departments. The Department of Computer Science and Engineering is a newly established department through the merger of the Department of Computer and Communications Engineering from the College of Information and Communications and the Department of Computer Education from the College of Education that focuses on software education. The Department of Cyber Defense was founded in cooperation with the Ministry of National Defense with the aim of nurturing professional cyber security officers to protect the nation from threats of cyber warfare. It provides four-year tuition and the faculty of the Graduate School of Information Security, Korea's foremost information security education institution, are in charge of professional information security education training. Being the largest software oriented college, the College of Informatics with its renowned faculty members and outstanding students is performing world-class software research.

The College of Information has recently attracted large national projects of government agencies and research foundations, and has been supporting industrial technology development through collaborated research with industry. In addition, it has designed a software-centered curriculum to lead the digital industry, and increased the number of English-mediated lectures to become a global software-oriented university. Selected as a software-specialized university by the government in 2012, the college is promoting the cultivation of global software talent through overseas training programs and a tuition assistance system for undergraduate students in interdisciplinary programs. In particular, through state-of-the-art educational facilities completed in 2011 and outstanding research infrastructure, the College of Information is growing into one of the leading software universities in Korea.

The College of Information envisions being in the world's top 50 in the field of software by 2020 by nurturing software talent with creative thinking and global competitiveness and by fostering customized research human resources through industry demand-centered education. It is establishing itself as a research university leading the development of software industry not only in Korea but all over the world.

College of Health Science

A Future Growth Engine of Convergence Science

The College of Health Science focuses on creating new future value through interdisciplinary convergence education and research encompassing science and technology to achieve global public health free from diseases and harmful toxic aggressors to policy research for the health and welfare of humanity. It does so through cultivating problem-solving professional health and medical intellectuals and developing world leading health and medical technologies.

Leaping to become a future-driven research-based college, the College of Health Science reorganized its existing eight departments into four undergraduate programs in March 2014. In January 2015, it moved into the Hana Science Hall located in the Anam Science & Engineering Campus and constructed state-of-the-art infrastructure for convergent education and research.

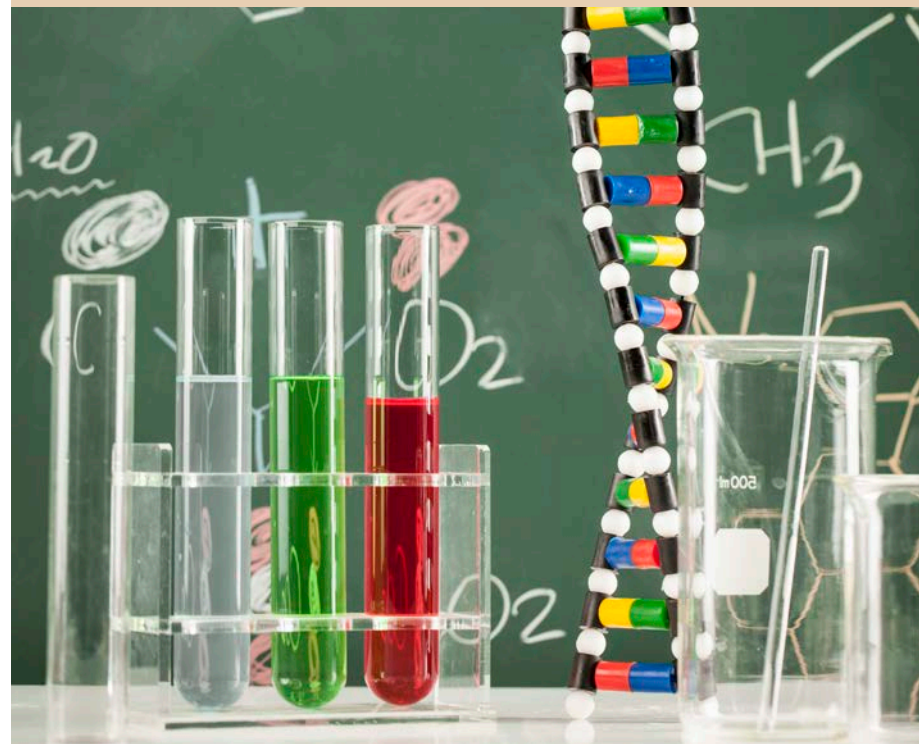

Through selected, concentrated education and research, the four undergraduate programs specialize in globally competitive academic fields. The college comprises the School of Biomedical Engineering (which concentrates on solving biological and medical problems through integrating fundamental science, medical and life science and applied engineering), the School of Biosystem and Biomedical Science (which leads preventive and functional bio-food and biomedical sciences industries through integrating the fields of fundamental medical life and bio-food and nutritional science), the School of Health and Environmental Science (which focuses on preventing diseases and constructing integrative systems to minimize the outbreak of harmful toxic substances in our environment), and the School of Health and Policy Management (which deals with efficient healthcare policy and management for the betterment of the nation's and communities' public health).

The College of Health Science possesses outstanding research abilities and oversees two types of BK21PLUS programs. It also administers three specialized research institutes alongside its very own Instruments Center for Health and Medical Science and the Center for Laboratory Animal Resources that actively support and facilitate leading research.

Division of International Studies

— Cultivating global leaders, the spearhead of Korea University's Globalization

Since its establishment in 2002, the Division of International Studies has been devoted to nurturing world-class global leaders. It is currently establishing itself as Korea's leading college. In 2014, it was ranked 1st in Korea and 26th in the world by the Quacquarelli Symonds (QS), a famous British higher education evaluation agency, in July 2012; and 2nd in Korea by the U.S. News & Report, a prestigious American university evaluation system.

The faculty, comprised of 18 full-time professors, visiting professors and part-time lecturers, is unrivalled by any standard – including SSCI paper publication and lecture evaluation. If education in international studies has been focused on interdisciplinary studies concerning language proficiency and global mindsets, the next wave of education needs to concentrate on cultivating strategic professionals with concrete problem-solving abilities with regard to global climate change, terrorism and multinational corporations as well as enhancing second and third foreign language proficiencies.

To this end, the Division of International Studies has designed an educational system to foster expertise in the following five fields: international development and cooperation, international commerce, international peace and security, regional studies, and Korean studies. In addition, to provide the opportunity to obtain practical experience, it established a close cooperative relationship with external organizations.

In 2010, the Division of International Studies brought the UNDP Seoul Policy Center, a global network of the UN, into the KU International Studies Hall. In 2014, it founded the EU Center in collaboration with the KIEP and SBS. With climate change being one of the major perennial global issues, the Division hosts the Model United Nations Climate Change Conference. It also hosts the English Debate Championship and Model UN Competition as extracurricular student club activities, enabling it to take pride in being the foremost in Korea in terms of academics and scale. It is also actively conducting courtesy training necessary for graduates advancing to international organizations, and providing various international internship opportunities in cooperation with international organizations such as the IAEA.

School of Art & Design

— Developing Global Leaders of Culture Creation through Design and Fine Art

The department of art education under the College of Education, established in 1989, was restructured in 2000 into four departments (oriental painting, western painting, sculpture, and industrial design) of the School of Art and later into two departments (fine art and industrial design) in 2007. Under the motto "Nurturing culture creators and global leaders," the school was reborn as the School of Art and Design and started on a new path toward further growth.

With an aim of becoming a first-class center for art and design, the school has been developing and applying an innovative teaching curriculum and has transferred its classrooms to a newly erected state-of-the-art building. In order to facilitate globalization, the school pursues a variety of exchange programs with prestigious universities and businesses around the world.

The department of industrial design offers a competitive program that covers not only product design but also interface, interaction, and interior, graphic, and entertainment design from the past to the future. The Department of Fine Art offers a quality curriculum that spans Korean painting, western painting, and sculpture as well as emerging subjects that reflect the new cultural environment. In addition, in a bid to satisfy the convergence demands of society and students, the school is introducing more interdisciplinary majors such as fashion design, environmental design and industrial design engineering.

School of Media & Communication

Incubator of Creative Global Media Talent

The journalism department, established in 1965 as the first of its kind in Korea, was expanded into the School of Media & Communication in 2010 in a bid to nurture the kind of creative global professionals required in the new media era. The school is regarded as one of the most distinguished incubators of talent in the Korean media industry, having produced more than 400 journalists and over 100 professors in the field. In addition, comprehensively considering the employment rate of the graduates and the capabilities of professors and other factors, KU School of Media and Communication can be said to be the leading institution for education in media and communication in Korea.

The school covers both theory and practice by providing courses on basic theory such as media economics and media effects, as well as practicum subjects such as drama production and creative advertising.

Students are able to exercise and apply the knowledge and skills that they develop at the school through academic society activities which closely mimic those in the real world. In addition, the comprehensive media education system installed within the Media Hall completed in 2011 provides a multi-dimensional learning environment encompassing broadcasting, newspaper, online activities, advertising, and PR.

Media and Communication

School of Interdisciplinary Studies

Multi-disciplinary Studies Tailored to Civic Leadership

The School of Interdisciplinary Studies was founded in 2009 to train students who wish to be civic leaders or enter law school. Modern society requires not merely in-depth knowledge in one specific area, but also generalized knowledge traversing a number of different fields. In order to keep pace with this trend in society, the school offers a multidisciplinary course comprised of varied subjects spanning disciplines.

At this school, students are able to design their own majors based on their aptitudes or future career goals. Students who seek to become public leaders are required to possess legal knowledge and encouraged to build area-specific knowledge and solid character.

This school, as the former College of Law, produced a great number of social and national leaders who succeeded at national exams. Since the school retains the knowhow that made this possible, it is the best choice for those who aspire to become public servants. Because the full faculty of the KU Law School teaches here as well, this school is also the ideal home for students who aim to engage in legal practice.

College of Global Business

A New Model of Business -

The College of Global Business was formed in 2017 by combining the College of Humanities and the College of Business & Economics at the Sejong Campus.

The world's progress can be viewed largely in terms of three regions: the Anglosphere, China, and Germany. Against this backdrop, the College of Global Business seeks to nurture business leaders who possess basic knowledge in Korean studies, British and American studies, Chinese studies and German studies. In doing business in the age of globalization, a key to success is having a good understanding of foreign cultures. In order to understand foreign cultures, we must first understand our own culture and become aware of the differences. Attaining success in business would be difficult without education in the humanities.

Korea University is taking the initiative to create a new paradigm in business by integrating regional studies. The College of Global Business has been designed to embrace risks and to challenge tradition so as to adapt to a constantly changing business environment.

With state-of-the-art facilities made possible by a generous donation from Samchully, outstanding faculty, and highly qualified students with CPA licenses, the college has a strong foundation for further success.

College of Science & Technology

Creative Research that Transcends the Boundaries of Science and Technology

The College of Science and Technology pursues special creativity through interdisciplinary research for the next generation. Established in 1980, the college consists of departments focused on basic science, advanced science, and the life sciences. Rooted in core science, where the fundamental rules of natural phenomena are explored and new natural laws are defined, the college offers advanced applied studies in fields such as cybersecurity, display convergence, computer convergence software, electronics and mechanical convergence, food, biotechnology, and the environment.

The efficient, practical educational programs at this college encourage students to develop creative knowledge. At the same time, small group activities designed to pursue both tradition and diversity help students grow into capable and well-rounded talents. Among its other resources, the college's youthful and capable faculty and the well-designed educational environment make all of the above possible.

College of Pharmacy

Nurturing Professional Pharmaceutical Experts to Lead the Development of Pharmaceuticals and Advanced Health and Medical Research

As the nation enters an advanced era in the 21st century, public health has become a key concern. In order to keep pace with this trend, KU founded the College of Pharmacy in 2011 to play a central role in public health management. Consisting of departments focused on the life sciences in pharmacy, clinical pharmacy, industrial pharmacy, pharmaceutical science, social and administrative pharmacy, among others, the College of Pharmacy offers a wide range of education and research to nurture professional, future-oriented experts able to lead the development of advanced medical research and develop new medicines in Korea, thus contributing to the betterment of humanity.

To nurture world-class professional pharmaceutical experts in the development of new pharmacological products and services in fields related to life science in pharmacy, pharmaceutical science, clinical pharmacy, industrial pharmacy and social and administrative pharmacy and thus contributing to humanity, the College of Pharmacy performs its role as a core educational institution working with national research institutes and related businesses in the Daedeok Research Complex as well as many others.

College of Public Policy

The College of Public Policy can be broadly divided into the areas of economics and statistics, public sociology and Korean unification, and public administration. With the relocation of various central government offices and national research institutions to Sejong, the city has become the key area for establishing government policies, leading to a demand for research and education in public policy. In response to such needs, departments in the fields of social science and public policy under the College of Business and Economics, College of Humanities, and the School of Public Administration have been integrated to form the new college.

In the School of Economics and Statistics, students learn how to analyze the economy and acquire an understanding of both statistics and the foundation of government policy. The School of Public Sociology and Korean Unification-Diplomacy focuses on the Public Sociology required for social developments, with studies geared toward the relationship between North and South Korea, and the potential for Korean unification. The School of Governmental Administration supports students studying the administration of the government, and in particular, the need to improve the efficiency of administration.

At the College of Public Policy, students have an opportunity to explore five different majors in three schools and choose an additional major for their future career, while completing their coursework for their first major. Graduates may work for government, public or research institutions, financial institutions, and private enterprises, or they may gain admission to graduate school in order to develop expertise in their field.

At the College of Public Policy, students can learn from world-renowned faculty and participate in exciting research projects.

Graduate School

— Leaping toward Becoming a World-class Research Institution by Creating Knowledge

While conducting global projects to fuel its emergence as a worldclass institution of higher education, Korea University has been making intensive investment in developing its graduate school into a research-centered institution. By facilitating academic exchanges with prestigious counterparts around the world and developing and operating inter-disciplinary courses and academic-industry cooperation programs, the school has been producing outstanding research personnel year after year. The school, established in 1949 with an aim to add depth to creative studies and produce some of the top experts in the world, is making strenuous efforts to elevate the quality of its research to the level of leading global institutions.

In particular, by making active use of academia-industry partnership programs, the school is providing its students an unparalleled opportunity to access the high-quality educational infrastructure of industry.

Professional Graduate Schools

— Nurturing Top-tier Experts in Each Area

The professional Graduate Schools at Korea University are endeavoring to become the best in all areas of education and research. In order to meet the demands of society for leading experts in each field, the school has been securing top-notch faculty and highly advanced teaching infrastructure. Among their many advantages, the schools offer differentiated, high quality educational services designed to nurture flexible leadership in the rapidly changing future environment. The programs currently available at KU Professional Graduate Schools have been appraised as the most successful models in areas ranging from academic-industry cooperation, overseas internships and student exchanges in multiple-degree courses with overseas sister universities.

— Graduate School of International Studies

KU Graduate School of International Studies aims to develop highly advanced global experts in five major tracks: international development and cooperation, international commerce, international peace and security, regional studies and Korean studies. Its faculty consists of 40 professors, including 18 full-time professors, invited or visiting professors and part-time instructors. All classes are mediated in English. The UNDP Seoul Policy Center, a local contact point for the UN, is situated within KU's International Studies Building. A variety of internship opportunities are offered in cooperation with global organizations, including UNIDO, UNECA, and IAEA. The school is an official member of the Association of Professional Schools of International Affairs (APSA), comprised of 29 universities in the US, Asia and Europe.

Business School

The KU Business School has received national and international recognition as a globally competitive school. The Ministry of Education has ranked it first among national MBA offerings for five years in a row (2007-2011). The school has placed 24th in the world (1st in Korea) in the Financial Times Executive MBA Rankings.

The Graduate School of Business Administration offers five MBA programs to meet the diverse needs of students. Part-time programs include the Korea MBA course, the first and largest in Korea, and the Executive MBA course, ranked 24th in the world by the Financial Times in 2016. The Finance MBA provides specialized education in finance, while GMBA&MIM allows students to earn a dual degree in CEMS MIM and EBS or ESCP in addition to the basic GMBA degree. The S³ Asia MBA is a dual degree program operated with China's Fudan University and the National University of Singapore.

Law School

Since its establishment in 1905 as part of Bosung College, the Department of Law has been the home of legal education in Korea. The Department of Law at KU is overflowing with a sense of responsibility and its spirit of challenge has served as a driving force behind national development throughout the ups and downs of national history. In line with the fundamental revolution in national legal education policy, the KU College of Law, with more than 100 years' of tradition and expertise in legal education, has been converted into the KU Law School, competing with prestigious institutions around the world by nurturing legal experts with practical skills and international communication proficiency. In particular, the Clinical Legal Education Center (CLEC), established by KU Law School as the first legal clinic in Korea, has produced highly successful results, serving as a model for other law schools in Korea.

Green School (Graduate School of Energy and Environment)

As a graduate school of energy and environment policy for both Korea University and the Korea Institute of Science and Technology (KIST), the Green School was founded as a professional graduate school with a new paradigm. It has the capabilities to conduct the development of advanced technology and establish long-term national strategies in the field of energy and environment simultaneously through research converging policy and science technology, aiming to make science technology a growth engine. The Green School has built a differentiated academy-research cooperation system between KU and KIST based on accumulated mutual trust. By designing a futuristic education system converging science engineering and the humanities, it also nurtures creative talent and wise global leaders. As a leader of global trends, the school is leaping forward as a world-class energy and environmental graduate school, and is expected to play a pivotal role in convergence education and research in Korea. The Green School will grow rapidly into one of the world's top 20 energy and environmental graduate schools by 2020.

Graduate School of Management of Technology

The KU Graduate School of Management of Technology aims to nurture chief technology officers capable of proactively adapting to the future technology environment by integrating management and engineering. It also nurtures chief growth officers able to invent new growth engines by developing innovative technology through management competency. This graduate school is proud of its excellent faculty staffed with business-directors-turned-professors with abundant business experience, a curriculum specifically tailored to technology management and in-depth discussions and information exchanges among students from diverse backgrounds. In addition, the school engages in joint research with prestigious universities and businesses at home and abroad, all while providing internship and overseas study programs.

KU-KIST Graduate School of Converging Science and Technology

Backed by the 'academy-research faculty system' with its faculty members actively involved in both academia and research institutes, the KU-KIST Graduate School boasts top-caliber faculty with superb research capabilities. It serves as a link among research, education, and industries, conducting convergence education and research between KU and KIST.

With an enrollment capacity of 40 students, the school offers a Nano-Bio-Information Technology (NBIT) program, and provides stable financial support to help students to immerse themselves in education and research. The KU-KIST Graduate School aims to provide the best education and research environment, such as a mentorship program with world-renowned scholars and a joint advisor system involving professors from KU and KIST.

Special Graduate Schools

Center of Knowledge for Self-development

In order to meet the demands of individuals and businesses to additionally hone the competitiveness of graduates, Korea University operates a variety of special graduate schools where students can study in parallel with their work. KU special graduate schools boast prominent faculty with extensive academic expertise and abundant field experience, worldclass educational infrastructure and up-to-date teaching content. It has earned deep trust not only from students but also from businesses and institutions.
