The MSc Project Management is accredited by the Association for Project Management (APM). The course covers the essential points of managing successful projects, including how to use data during the planning process. After graduating, you will be able to influence important business decisions as a project manager and able to deliver global projects using gold standard techniques.

Career Progression

Project managers are an important part of every business and are highly valuable due to their many skills. In addition to self-employment and/or consultancy, you will be able to apply for the following roles:

- Project Director
- Project Executive
- Technical Project Manager
- Technical Project Lead

Study Mode
Full time

Hours of study

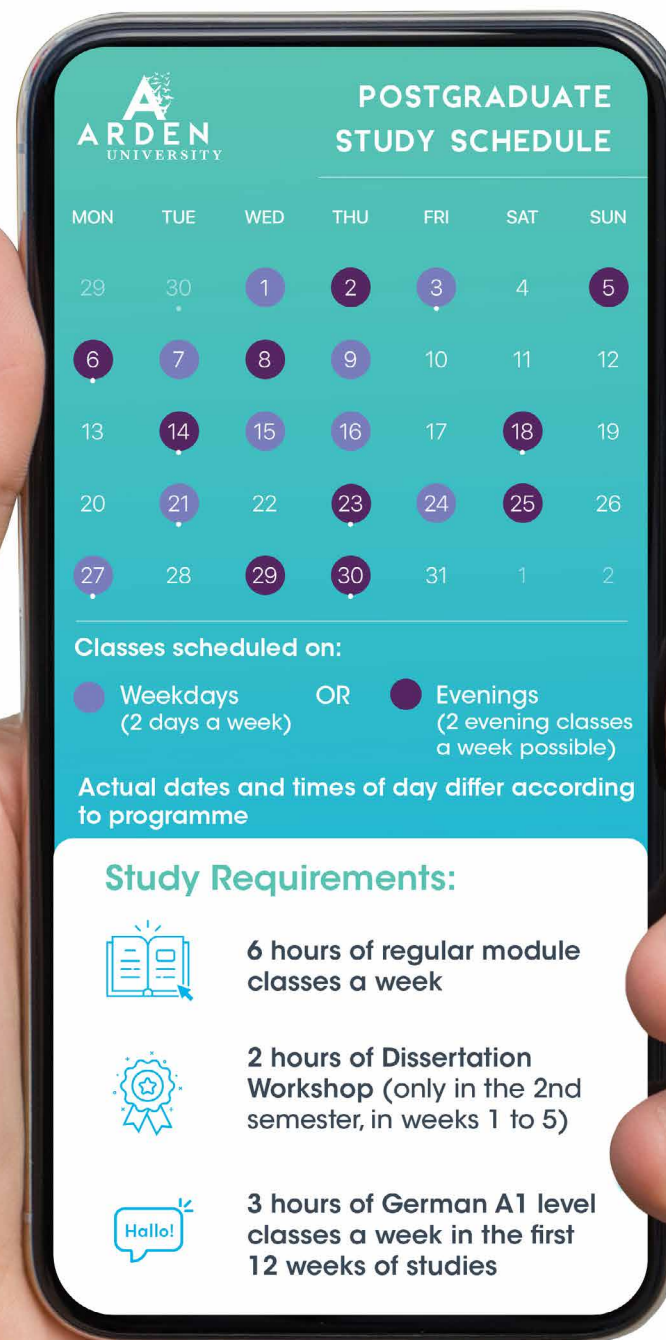

This course is delivered through a blend of online and face-to-face teaching, compressing the number of days you need to be on campus so you can more easily fulfil additional commitments, such as a part-time job.

Entry Requirements

To be eligible for this course you must normally have:
A UK honours degree at a minimum of second class (2.2) or equivalent.

For students whose prior learning was not taught in English:
IELTS 6.0 or equivalent.

If you do not meet the academic requirements, we're more than happy to consider an application from you if you have substantial management experience (typically 5 years) and can show us that you have the motivation to study the programme.

Modules

Project Management Techniques

You'll start this module by breaking down the different types of project management, learning solid methods to monitor and control projects from start to finish. We cover the ins and outs of most business projects: managing budgets, resolving complex issues and coordinating the work of others on a project team.

Data Handling and Decision Making

Modern businesses have access to more data than ever. People armed with the skills to handle that data - and who can use it to make informed business decisions - add real value to their workplace. This module focuses on teaching you how to do an analysis of the data environment in an organisation, and crucially once you have that data, how you handle it and what you can do with it - whether that is to make the business more efficient, or lead it in a fresh direction. The key is not just to interpret and understand the data, but to make knowledge driven decisions. We test this through a case study driven task that allows students to apply what they have learnt to a real business scenario.

Management of Projects

This module gives you all the models and methods you need to take charge of projects. You'll learn what it takes to be an effective leader, how to match people to tasks, organise schedules, make sense of costs and budgets, assess risks and maintain quality. You'll also learn how to work out if an investment is likely to be a good one or not.

Project Analytics

Data helps us drive project management decisions; as well as monitor, control and maintain a project throughout its life. This module shows you the context in which these facts and statistics are used to measure how a project is performing. By the end of it all you'll be confident in using analysis to drive decision making.

Quality Management

This module will encourage and support you to understand the key theories and practice of delivering a quality product. Appreciating the importance of quality in both tangible and intangible products will allow you to champion this philosophy in your current or future role. The module will introduce the core principles of quality management and show you the tools and systems you can apply to a real working situation, as well as understanding the ways to measure quality. The assignment will give you the opportunity to put it all into practice, proving you can take these ideas and apply them to specific business needs and objectives.

Sustainability in Theory and Practice

Sustainability is the most important challenge of our time - and this module brings it in line with project management. You'll be exploring the challenges of sustainability and coming up with strategies to solve these problems.

Research Project

The research project is a vital part of achieving master's level - and it is your chance to undertake research into an area of your choosing, related to the programme theme. We'll support you through the first stage with six weeks of sessions to help you create your research proposal - and you can choose from a conventional dissertation or an academic article and presentation. You will develop your critical abilities and produce a piece of work that's relevant in practice and meets the academic standards needed at master's level, and just as importantly, add value to your organisation and career.

A photograph of a classroom. In the foreground, a woman with short grey hair and glasses, wearing a light-colored blazer, stands with her back to the camera, looking towards a group of students. The students are seated at white desks, some looking towards the teacher. The room has large windows in the background. Teal diagonal graphic overlays are present in the top-left and bottom-right corners.

Meet the Arden Berlin team

Dr Tobias Kliem

Dr Tobias Kliem is the Head of Arden University's Berlin Campus. After graduating with a Law Degree at the Universität Bremen, he went to the University of Kent (UK) to complete an LLM and then a PhD in Law. He has since worked at Canterbury Christ Church University and Oxford Brookes University as a Programme Lead, and started at Arden Berlin in April 2020.

Tobias is interested in Academic Management, Learning and Teaching, and European, International and Constitutional Law. In the little free time his job and parenting responsibilities leave him, Tobias enjoys cycling, reading and a little amateur programming on Linux machines. He supports Werder Bremen, but would prefer not to talk about this until his team's fortunes get considerably better!

Dr Phungmayo Horam

Dr Phungmayo Horam is Academic Lead at Arden Berlin and advisor to Steinbeis Renewable Energy Centre, India. He is a Resource Economist with a PhD from Humboldt University, and has over four years' experience in project implementation under the Sustainable Future-Megacities project sponsored by the German Ministry of Education and Research (BMBF).

Horam specialises in Project Management and the application of Economics and legal frameworks for evaluating policy design and transaction risks in the renewable energy sector. He takes great pleasure in collaborating with students and inspiring them to think and question the status quo. In his free time, he enjoys playing badminton, cycling and facilitating discussions on sustainable development through the Sustainability Discourse Berlin discussion forum.

Dana Alomari

Dana Alomari has been working as a Lecturer at Arden Berlin since 2018, teaching subjects on Marketing and Management and supervising students' Research Projects on Marketing and Digital Media topics. Originally from Bahrain, Dana worked in Media and Marketing before moving to Germany in 2014 to obtain her Master's degree in Media and Communication Management from Macromedia University, Berlin. After completing her degree she worked at the same university as a Lecturer for a semester before joining the Arden Berlin family.

Away from work, Dana loves traveling; she has so far visited 15 different countries around the world, leaving her with only 180 more to visit!

Dr Sara Ravan Ramzani

Sara teaches on a variety of modules in the areas of Management, Business, and Accounting. She was educated at University Putra Malaysia, where she received her PhD in Economics and information systems in 2015, and became an assistant professor in the same year. Sara has published 84 papers to date, and received the “best innovative paper award” from the Sydney International Business Research Conference in 2018. She is also the Chief Executive Editor of the Journal of Development Economics, Horizon journals from 2019 -2022.

Sara has several years of experience as a senior lecturer, programme leader and postgraduate director at International universities, and has supervised 24 PhD students, primarily in the fields of Project Management, Business, and Finance.

Outside of the classroom, Sara enjoys long walks and traveling around the world.

Tobias Stähler

Tobias Stähler has a professional background that comprises corporate communications and roles in management and higher education alike. He has been teaching international students in a variety of management-related subjects for more than nine years, and has also worked as a PR freelancer for companies from the Food & Beverages and Public Health industries. Tobias is a fully trained merchant in wholesale and foreign trade, and holds a Master Artium from Georg-August-University Göttingen in Sociology, Communication Sciences and Cultural Anthropology.

His research and publications are focused on political and organisational communications and qualitative empirics; his academic memberships include INSNA, NAPOKO, IISM Berlin.

In his personal life, Tobias is passionate about badminton, food, and hiking around the Scottish Highlands.

Aleksandra Przybylinska

Aleksandra Przybylinska joined Arden Berlin in January 2018 as a Student Support Coordinator, and was the first full-time employee of the Berlin Study Centre. In August 2018, she was promoted to Centre Manager of Arden Berlin. With responsibilities in the areas of managing centre operations and student support, Aleksandra has managed to gain a great deal of experience and has contributed to the growth of the Berlin study centre.

Prior to joining Arden Berlin, Aleksandra studied English Philology, with a focus on language teaching, and also gained work experience in the field of administration working for a local company in Berlin.

Outside of the office, Aleksandra enjoys travelling, cycling and singing although she hasn't had the chance to show off her skills to the wider public yet.

What do our students say about Arden?

Arden offered me the opportunity to put my years of engineering and technical experience into an academic background. I recommend studying with Arden because of how interactive and engaging the courses are. Thanks to Arden for making my dreams become reality.

Chibueze Iheoha
Arden Berlin student

I would recommend Arden University Berlin due to the multicultural environment and as a way to enter the European labour market. I was able to work in two different firms in Berlin while studying, due to the flexible timing of the course schedule.

Sathesh Paramasivam
Arden Berlin graduate

The best part about studying with Arden is that I can study online as well as in the classroom and have much more time for other activities. Only by having two face-to-face classes a week gives me more time to concentrate on my skills and work.

Taha Hasan
Arden Berlin graduate

The reason why I chose Arden University for my bachelor psychology studies were the possibilities of flexible learning and using the English language. I am lucky that Arden University gave me the chance to prove that I can get my dream degree and even build up on it further, without choosing between working or studying.

Bettina Finna
Arden student, Germany

I would definitely recommend Arden University. I have been recommending it to friends and colleagues, actually! After lengthy research, this could be one of the best available options for those who aspire to develop their professional capacities while pursuing their careers.

Amer Karkoutli
Arden student, Germany

I am an Arden alumni and became a Student Support Officer at Arden Berlin in 2019. I came to Germany in 2018 to study for an MSc Data Analytics and Marketing at the Berlin Campus. My experiences with the Student Support Team were so positive that I decided to join the team after my graduation!

Sarah Bejkar
Arden Berlin graduate
