

A world class University established in 2014. It comprises over 10,000 researchers and faculty members, and 60,000 students, including 25,000 master's and 5,000 PhD students. Paris-Saclay area represents 13% of the French public research.

Its founding marked a historic moment in the evolution of higher education in France. For the first time at this scale and with such ambition, the three components of the French research and higher education system joined their forces under one roof: 4 "grandes écoles", 3 universities, 7 research organizations.

Université Paris-Saclay offers students the possibility of carrying out research in the natural sciences, engineering and the humanities and social sciences, in several disciplines and/or establishments. Its campus is surrounded by some of the biggest energy, agriculture, agrifood, pharmaceutical and defence companies, as well as small firms and start-ups.

ENS Paris-Saclay's mission is to train students for careers in higher education and research.

Multidisciplinary and innovative graduate school

Founded in 1912, École normale supérieure Paris-Saclay (ENS Paris-Saclay) is a leading institution for multidisciplinary graduate education and research. It trains future researchers and faculty members. Research emphasizes on fundamental issues connected to practical, industrial, technological, economic and social subjects of interest.

The 12 teaching departments and 13 research laboratories offer students the ability to customise their own programme and express their talents.

1700 students

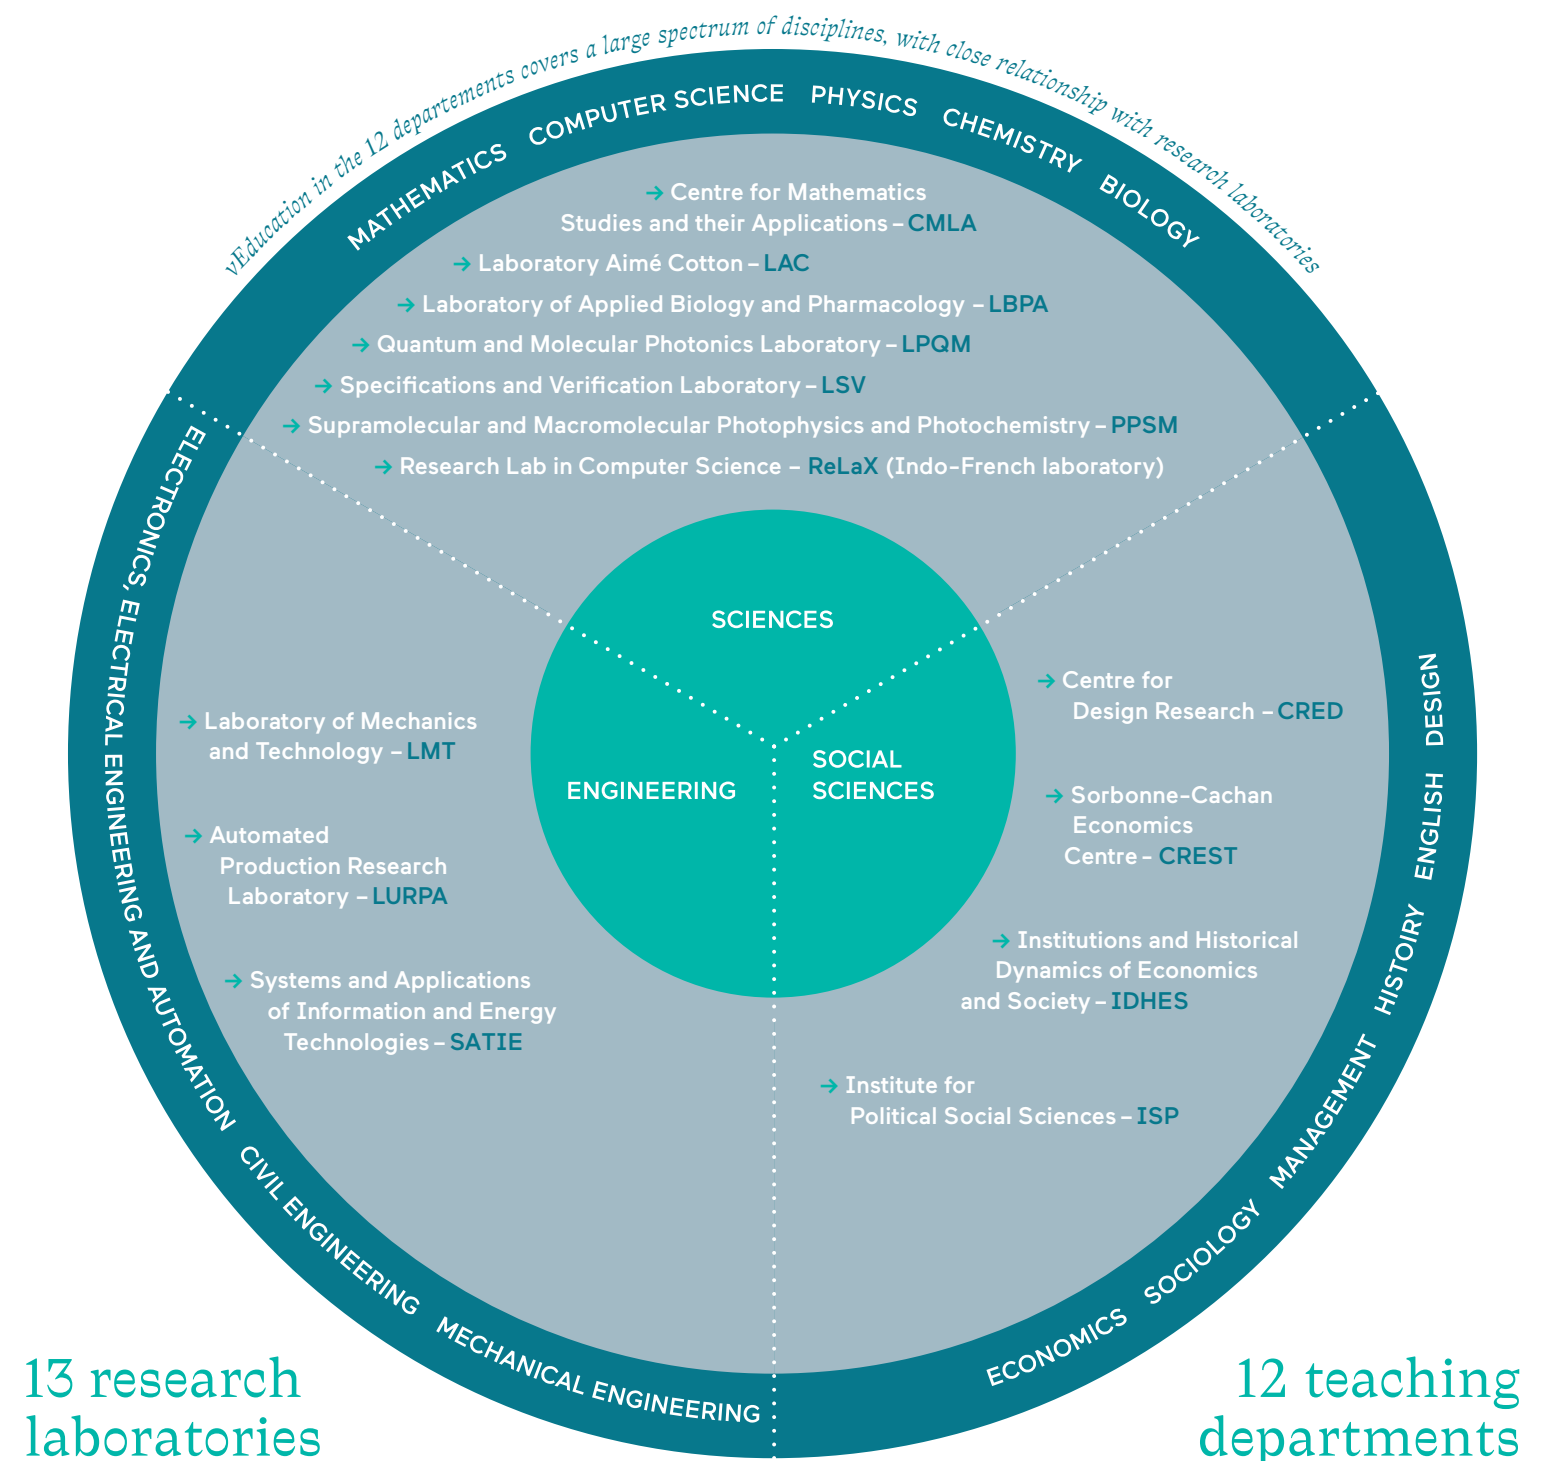

ENS Paris-Saclay is unique in bringing together a vast array of disciplines which no other higher education institution covers in the same way or at the same level: basic sciences, humanities, social sciences, engineering sciences, and design. Students at ENS Paris-Saclay benefit from personalised tutoring and research-based training that combines theory and practice while encouraging interdisciplinary studies.

400 professors and researchers

Cultural and scientific training, a tradition of excellence

ENS Paris-Saclay provides top-quality student mentoring. The close links that exist between teaching departments and research laboratories bring students to quickly become immersed in stimulating research contexts, and to conduct projects overseen by leading researchers. They are also given the possibility to spend a whole year abroad in a research laboratory.

Master to PhD: 75% of our Master graduates proceed to PhD studies
