The one and only in Finland

Start with a Bachelor's degree!
TUT offers the only university-level Bachelor's Degree Programme taught in English in the field of technology in Finland. You may choose from three different major subjects: *Mathematics, Physics, Information and Communications Technology.*

You may also apply directly to Master's studies in the following fields:

- > Architecture
- > Business and Technology
- > Electrical Engineering
- > Engineering Materials Science
- > Factory Automation and Robotics
- > Information Technology

Study in cool, green and stable surroundings

Finland is known for its beautiful and clean nature, cool climate and stable society. Environmental issues are highly recognized and valued. Tampere lies between two lakes and is surrounded by vast forests which offer opportunities to enjoy and explore nature. And if you're up for some serious winter action, jump

on a train and you'll be in northern Finland in just a couple of hours.

Most importantly, the Finnish success story is bound by education. We have built one of the world's most appreciated education systems with equal opportunities for everyone. Come and see for yourself.

Apply now and let science be your playground!
