## FACTS ABOUT BAJA CALIFORNIA

Baja California is a peninsula located in Northwestern Mexico, between the Pacific Ocean and the Sea of Cortez. Since time immemorial, it has been a pathway for the Cucapá, Kumiai, Kiliwa, Pai Pai and Cochimí indigenous groups, which have bequeathed us their ancestral wisdom through their cosmogonic myths and their worldwide known cave paintings.

The European explorers arrived to the region in the XV century. Among them were Jesuit, Franciscan, and Dominican missionaries; “gambusinos” seeking fortune, engineers and prospectors that delimited their land; and pioneers from all over the world that transformed an unexplored deserted territory into a defying challenge project of life.

Baja California, located to the north of the peninsula, is nowadays an entity that collides with the United States of America, strategically, with the State of California.

Our entity is vibrant in the diversity of its people: Mexican, Chinese, Japanese, Russian, Jewish, Spaniard, Italian, Latin American, English and Korean, among others. This widely diverse community joined efforts to build a dynamic and progressive entity, which is socially, culturally, politically and economically developed at a national level.

Baja California is formed by five Municipalities, each of them with its own particular characteristics. Ensenada is a port and a city of maritime sciences, natural sciences and exact sciences research, with entire valleys that practice viticulture and enology in a Mediterranean weather.

Mexicali, as the capital of the State and home to its three powers of government, was a technified agricultural valley in the middle of the dessert. Nowadays, it is an industrial first-rate city, which generates electric energy for exportation.

Rosarito is known for its beautiful beaches, and also for being home to the Fox Film Studios, where movies like Titanic and Pearl Harbor were filmed.

Tecate is a mountain village famous for being the city where the beer crafting company of the same name is located. It is the municipality where La Rumorosa reaches its higher mountain range, and was recently acknowledge as “Magic Town” by the Ministry of Tourism of Mexico.

Tijuana is a culturally developed city with the highest cross-border flow in the entire world, and constitutes a bilateral sum of efforts with the Port of San Diego.

# UNIVERSIDAD AUTÓNOMA DE BAJA CALIFORNIA

Since 1957, the Universidad Autónoma de Baja California (UABC) is a public higher education institution independent from the State and with full legal capacity to address the important activities of teaching, research, and promotion of culture and services.

It is located in the State of Baja California with 63,600 students in its undergraduate programs, and 1,783 graduate students. A total of 133 bachelor's degree programs are offered, along with 43 graduate study programs at the 3 campuses along the state in the cities of Ensenada, Mexicali, and Tijuana. There is a total faculty of 1,321 full time professors, of which 700 hold PhDs, 870 have been granted the acknowledgment of quality professors, and 336 are part of the National Researchers System (SNI, in Spanish).

The University has 181 academic bodies conducting research linked to the productive sectors, particularly the industry. There are 121 research areas and more than 670 research projects in different areas of knowledge with government, private, and its own funds.

Due to the aforementioned reasons, the UABC was ranked in the 122<sup>nd</sup> position of the QS Ranking in Latin America, and 7th among the state public universities in Mexico.

## UABC ENSENADA CAMPUS

Vice Chancellor's Office, Ensenada Campus

The Ensenada Campus is located west of the coastal municipality of Ensenada, which is considered the largest in the world regarding territorial extension. This campus is home to the Vice Chancellor's Office, where the Vice Chancellor, and temporarily the Chancellor, takes care of issues. There are 11,329 students registered for undergraduate programs, and 411 for graduate studies, as students of one of a total of 36 undergraduate programs, 10 areas of general education, and 32 graduate study programs, 1 major, 9 master degrees, and 6 doctorates. All of these programs are available at 2 schools, 8 faculties and 2 research institutes, on three university sub campuses, or extensions: El Sauzal, Valle Dorado and San Quintín.
